

A Comprehensive Introduction to Vista Operating System

Table of Contents

Chapter 1 - Windows Vista

Chapter 2 - Development of Windows Vista

Chapter 3 - Features New to Windows Vista

Chapter 4 - Technical Features New to Windows Vista

Chapter 5 - Security and Safety Features New to Windows Vista

Chapter 6 - Windows Vista Editions

Chapter 7 - Criticism of Windows Vista

Chapter 8 - Windows Vista Networking Technologies

Chapter 9 - Vista Transformation Pack

Abstraction and Closure in Computer Science

Table of Contents

Chapter 1 - Abstraction (Computer Science)

Chapter 2 - Closure (Computer Science)

Chapter 3 - Control Flow and Structured Programming

Chapter 4 - Abstract Data Type and Object (Computer Science)

Chapter 5 - Levels of Abstraction

Chapter 6 - Anonymous Function

Table of Contents

Chapter 1 - Introduction to Linux

Chapter 2 - Linux Kernel

Chapter 3 - History of Linux

Chapter 4 - Linux Adoption

Chapter 5 - Linux Distribution

Chapter 6 - SCO-Linux Controversies

Chapter 7 - GNU/Linux Naming Controversy

Chapter 8 - Criticism of Desktop Linux

Advanced Software Testing

Table of Contents

Chapter 1 - Software Testing

Chapter 2 - Application Programming Interface and Code Coverage

Chapter 3 - Fault Injection and Mutation Testing

Chapter 4 - Exploratory Testing, Fuzz Testing and Equivalence Partitioning

Chapter 5 - Unit Testing and Integration Testing

Chapter 6 - GUI Software Testing and Software Performance Testing

Chapter 7 - Regression Testing and Acceptance Testing

Chapter 8 - Security Testing and Test Automation

Chapter 9 - Testing Tools & Features

Table of Contents

Chapter 1 - Introduction to Computer Networking

Chapter 2 - Network Topology

Chapter 3 - Local Area Network and Metropolitan Area Network

Chapter 4 - Wide Area Network and Wireless Network

Chapter 5 - Bootstrap Protocol and Preboot Execution Environment

Chapter 6 - Computer Networks and Internet Technology

Chapter 7 - Computer Network Diagram and Electronic Data Interchange

Chapter 8 - Load Balancing (Computing) and Home Network

Chapter 9 - Mylogon and Router

Chapter 10 - Bridging (Networking) and Virtual Private Network

Chapter 11 - Proxy Server

Advances in Computer Security

Table of Contents

Chapter 1 - Introduction to Computer Security

Chapter 2 - Access Control List and Capability-based Security

Chapter 3 - Firewall (Computing) and Access Token

Chapter 4 - Application Firewall and Asset (Computing)

Chapter 5 - Attack (Computer) and CAPTCHA

Chapter 6 - Cloud Computing Security and Computer Security Incident Management

Chapter 7 - Confused Deputy Problem and Cyber Security Standards

Chapter 8 - Data Loss Prevention Software

Chapter 9 - Dynamic SSL and Information Security

Chapter 10 - Information Assurance

Algorithm and Data Structure (Concepts & Applications)

Table of Contents

Chapter 1 - Algorithm

Chapter 2 - Algorithm Examples

Chapter 3 - Empirical Algorithmics and Program Optimization

Chapter 4 - Recursion & Parallel Algorithm

Chapter 5 - Concurrent Data Structure and Data Model

Chapter 6 - Linked Data Structure

Chapter 7 - Tagged Union and Record (Computer Science)

Chapter 8 - Array Data Structure

All About Web Search Engines and Optimization

Table of Contents

Introduction

Chapter 1 - How Web Search Engines Work

Chapter 2 - Search Engine Indexing

Chapter 3 - Search Engine Optimization

Chapter 4 - Most Famous Search Engines

Chapter 5 - List of Search Engines

An Introduction to Computer Programming

Table of Contents

Chapter 1 - Introduction to Computer Programming

Chapter 2 - Programming Language

Chapter 3 - Programmer

Chapter 4 - Algorithmic Skeleton and Control Table

Chapter 5 - Nassi–Shneiderman Diagram

Chapter 6 - Template Metaprogramming & Quine (Computing)

Table of Contents

Chapter 1 - Introduction to Information Theory

Chapter 2 - Entropy

Chapter 3 - Noisy-Channel Coding Theorem and Mutual Information

Chapter 4 - Quantities of Information and Coding Theory

Chapter 5 - Channel Capacity and Binary Symmetric Channel

Chapter 6 - Kullback–Leibler Divergence

Chapter 7 - Rate–Distortion Theory and Algorithmic Information Theory

Chapter 8 - Inequalities in Information Theory and Information Flow

Chapter 9 - Fisher Information and Turbo Code

An Introduction to JavaScript

Table of Contents

Chapter 1 - Introduction to JavaScript

Chapter 2 - JavaScript Syntax

Chapter 3 - Client-Side JavaScript and JavaScript Engine

Chapter 4 - Ajax (Programming) and Cross-Site Scripting

Chapter 5 - JSDoc and JSON

Chapter 6 - Jscript, JsonML and Seed (Programming)

Chapter 7 - Unobtrusive JavaScript and XMLHttpRequest

An Introduction to Theory of Computation

Table of Contents

Chapter 1 - Theory of Computation

Chapter 2 - Computability Theory

Chapter 3 - Computational Complexity Theory

Chapter 4 - Automata Theory and Quantum Computer

Chapter 5 - Models of computation

Chapter 6 - Parallel Computing

Table of Contents

Chapter 1 - Computer Animation

Chapter 2 - Computer-Generated Imagery and Wire-Frame Model

Chapter 3 - Motion Capture and Skeletal Animation

Chapter 4 - Crowd Simulation

Chapter 5 - Special Effect

Chapter 6 - Rotoscoping

Chapter 7 - Machinima

Chapter 8 - Motion Blur

Chapter 9 - PowerPoint Animation

ASCII Art & its Applications

Table of Contents

Chapter 1 - Introduction to ASCII Art

Chapter 2 - ANSI Art and Tiled Printing

Chapter 3 - ANSI Escape Code and TheDraw

Chapter 4 - ASCII Stereogram and BSAVE (Graphics Image Format)

Chapter 5 - Cowsay and FIGlet

Chapter 6 - .nfo

Chapter 7 - Shift_JIS Art and Text Mode Demos

Chapter 8 - Binary-to-Text Encoding

Basic Concepts in Computer Science (Data & Data Structures)

Table of Contents

Chapter 1 - Associative Array and Array Data Structure

Chapter 2 - Data Structure and Data Type

Chapter 3 - Database and Hash Table

Chapter 4 - List (Computing) and String

Chapter 5 - Tree (Data Structure) and Closure

Table of Contents

Preface	VII
Chapter 1 Introduction to C++	1
i. C++	1
ii. Programming Language	15
Chapter 2 Programming Languages Related to C++	33
i. C (Programming Language)	33
ii. Ada (Programming Language)	52
iii. CLU (Programming Language)	68
iv. ALGOL 68	70
Chapter 3 Types of C++ Programming Language	101
i. C++03	101
ii. C++11	101
iii. C++14	146
iv. C++17	153
Chapter 4 Language Extensions of C++	156
i. Managed Extensions for C++	156
ii. AspectC++	164
iii. C++/CLI	165
iv. C++/CX	168
v. Cilk	171
Chapter 5 Techniques and Features of C++	182
i. Copy Elision	182
ii. Template (C++)	184
iii. Input/Output (C++)	190
iv. Decltype	196
Chapter 6 Methods and Tools of C++	201
i. C++ Classes	201
ii. Subroutine	217
iii. Exception Safety	232
iv. Rule of Three (C++ Programming)	233
v. Trait (Computer Programming)	237
vi. Charm++	242
Chapter 7 Various C++ Compilers	248
i. C++Builder	248
ii. IBM XL C/C++ Compilers	254

C++: The Programming Language

iii.	Turbo C++	256
iv.	Norcroft C Compiler	257
v.	Watcom C/C++	258
vi.	Visual C++	262
Chapter 8	Diverse Aspects of C++ Programming Language	269
i.	Generic Programming	269
ii.	Metaprogramming	295
iii.	Compatibility of C and C++	299
iv.	Criticism of C++	305
v.	Sieve C++ Parallel Programming System	311
Chapter 9	C++ Standard Library: An Integrated Study	314
i.	C++ Standard Library	314
ii.	C++ String Handling	320
iii.	Functional (C++)	323
iv.	Sequence Container (C++)	327
v.	Standard Template Library	345

Index

Table of Contents

- Chapter 1 - Code Generation (Compiler) & Register Allocation
- Chapter 2 - Name Mangling
- Chapter 3 - Instruction Selection & Instruction Scheduling
- Chapter 4 - Software Pipelining
- Chapter 5 - Just-in-Time Compilation
- Chapter 6 - Compiler
- Chapter 7 - Library (Computing)
- Chapter 8 - Dynamic Recompilation
- Chapter 9 - Data Structure Alignment
- Chapter 10 - Compiler Description Language
- Chapter 11 - Cross Compiler
- Chapter 12 - Data-Flow Analysis
- Chapter 13 - Static Single Assignment Form

Coding Theory & its Applications

Table of Contents

Chapter 1 - Introduction to Coding Theory

Chapter 2 - Channel Coding

Chapter 3 - Reed–Solomon Error Correction

Chapter 4 - BCH Code

Chapter 5 - Applications of Coding Theory

Table of Contents

Chapter 1 - Computer Networking

Chapter 2 - Computer Security

Chapter 3 - Cryptography

Chapter 4 - Wireless Network and Wide Area Network

Chapter 5 - Virtual Private Network and Home Network

Chapter 6 - Access Control List and Capability-Based Security

Chapter 7 - Application Firewall and Asset (Computing)

Chapter 8 - Vulnerability (Computing)

Chapter 9 - Transposition Cipher and Substitution Cipher

Chapter 10 - Cryptographic Hash Function and Avalanche Effect

Chapter 11 - Ciphertext and Code (Cryptography)

Chapter 12 - Deniable Encryption

Compiler Construction

Table of Contents

Introduction

Chapter 1 - Interpreter (Computing)

Chapter 2 - Lexical Analysis

Chapter 3 - Regular Expression

Chapter 4 - Finite-State Machine & Preprocessor

Chapter 5 - Left Recursion

Chapter 6 - Parsing

Chapter 7 - Extended Backus–Naur Form & Backus–Naur Form

Chapter 8 - Parsing Expression Grammar

Chapter 9 - LR Parser

Chapter 10 - Bottom-Up Parsing

Chapter 11 - Recursive Descent Parser

Chapter 12 - Operator-Precedence Parser

Compiler Theory and Construction Handbook

Table of Contents

Chapter 1 - Compiler

Chapter 2 - Compiler Optimization

Chapter 3 - Cross Compiler and Just-In-Time Compilation

Chapter 4 - Aspect Weaver and Compiler Description Language

Chapter 5 - Context-free Grammar

Chapter 6 - Interpreter (Computing)

Chapter 7 - Lexical Analysis

Chapter 8 - Regular Expression

Chapter 9 - Finite-State Machine & Preprocessor

Chapter 10 - Left Recursion

Chapter 11 - Parsing

Chapter 12 - Extended Backus–Naur Form & Backus–Naur Form

Chapter 13 - Parsing Expression Grammar

Chapter 14 - LR Parser

Table of Contents

Chapter 1 - Compiler Optimization

Chapter 2 - Peephole Optimization

Chapter 3 - Constant Folding

Chapter 4 - Strength Reduction

Chapter 5 - Inline Expansion

Chapter 6 - Return Value Optimization

Chapter 7 - Dead Code, Unreachable Code & Dead Code Elimination

Chapter 8 - Loop Optimization & Loop Nest Optimization

Chapter 9 - Loop Unwinding

Chapter 10 - Interprocedural Optimization

Chapter 11 - Vectorization (Parallel Computing)

Chapter 12 - Lazy Evaluation

Chapter 13 - Automatic Parallelization & Polytope Model

Chapter 14 - Global Value Numbering & Partial Evaluation

Components & Elements of Internet Protocol and Suite

Table of Contents

Chapter 1 - Internet Protocol and Internet Protocol Suite

Chapter 2 - Transmission Control Protocol

Chapter 3 - Advanced Message Queuing Protocol

Chapter 4 - Border Gateway Protocol and Character Generator Protocol

Chapter 5 - Domain Name System and Domain Name System Security Extensions

Chapter 6 - Gopher (protocol) and Ping

Chapter 7 - IP Multicast and IPsec

Table of Contents

Chapter 1 - Computer Network

Chapter 2 - Computer Networking

Chapter 3 - OSI Model

Chapter 4 - Physical Layer

Chapter 5 - Data Link Layer

Chapter 6 - Transport Layer

Chapter 7 - Session Layer, Application Layer & Presentation Layer

Chapter 8 - Spanning Tree Protocol

Chapter 9 - Ethernet

Chapter 10 - Link Aggregation

Chapter 11 - Network Topology

Chapter 12 - Local Area Network and Metropolitan Area Network

Chapter 13 - Wide Area Network and Wireless Network

Chapter 14 - Bootstrap Protocol and Preboot Execution Environment

Chapter 15 - Computer Networks and Internet Technology

Chapter 16 - Computer Network Diagram and Electronic Data
Interchange

Chapter 17 - Load Balancing (Computing) and Home Network

Chapter 18 - Mylogon and Router

Table of Contents

Preface	VII
Chapter 1 Introduction to Information and Computer Science	1
a. Information and Computer Science	1
b. Computer Science	5
c. Information Science	18
Chapter 2 Processes and Techniques in Information Systems	32
a. Data Warehouse	32
b. Enterprise Resource Planning	41
c. Expert System	51
d. Web Search Engine	58
e. Management Information System	67
f. Decision Support System	71
g. Executive Information System	77
h. Transaction Processing System	81
Chapter 3 Significant Aspects of Information and Computer Science	90
a. Computing	90
b. Algorithm	98
c. Data Processing	126
d. Information Processing	128
e. Information System	131
f. Information Management	141
g. Information Theory	148
h. Information Technology	160
Chapter 4 Informatics: An Overview	167
a. Informatics	167
b. Business Informatics	173
c. Urban Informatics	174
d. Astroinformatics	183
e. Bioinformatics	185
Chapter 5 Various Applications of Information and Computer Science	201
a. Artificial Intelligence	201
b. Robotics	226
c. Systems Development Life Cycle	253

Computer Configuration

Table of Contents

Chapter 1 - Autoconfig and Autoconf

Chapter 2 - Apple Sleep Proxy Service (Bonjour Sleep Proxy) and Control Panel (Windows)

Chapter 3 - Environment Variable

Chapter 4 - Link-Local Address and System Preferences

Chapter 5 - Udev and Zero Configuration Networking

Chapter 6 - Make Compatible

Chapter 7 - Configuration Management

Chapter 8 - Quattor

Chapter 9 - Engineering Support and Component Repository Management

Chapter 10 - Fstab

Chapter 11 - AUTOEXEC.BAT

Chapter 12 - Windows Registry

Computer Display Standards (Tools & Applications)

Table of Contents

Chapter 1 - Computer Display Standard

Chapter 2 - IBM Monochrome Display Adapter and Color Graphics Adapter

Chapter 3 - Hercules Graphics Card and Enhanced Graphics Adapter

Chapter 4 - Color Depth

Chapter 5 - Professional Graphics Controller and IBM Multicolor Graphics Adapter

Chapter 6 - IBM 8514 and Video Graphics Array

Chapter 7 - Super Video Graphics Array and Graphic display resolutions

Chapter 8 - Refresh Rate

Chapter 9 - Display Resolution

Chapter 10 - Digital Visual Interface

Table of Contents

Preface	VII
Chapter 1 Understanding Computer Graphics	1
a. Computer Graphics	1
b. Computer Graphics (Computer Science)	23
Chapter 2 Forms of Computer Graphics	29
a. 2D Computer Graphics	29
b. 3D Computer Graphics	40
Chapter 3 Components of Computer Graphics	44
a. Sprite (Computer Graphics)	44
b. Vector Graphics	49
c. 3D Modeling	55
d. Graphics Processing Unit	61
e. Computer Vision	72
f. User Interface Design	83
Chapter 4 Processes and Techniques of Computer Graphics	89
a. Volume Rendering	89
b. Motion Capture	95
c. Crowd Simulation	109
d. Shader	110
e. Rasterisation	115
f. Polygon Mesh	122
g. Feathering	132
h. Visual Effects	133
i. Global Illumination	134
Chapter 5 Animation: An Integrated Study	138
a. Animation	138
b. Computer Animation	152
c. Traditional Animation	161
d. Stop Motion	174
e. Skeletal Animation	182
f. Animation Database	184
Chapter 6 Various Computer Graphics Software	187
a. Amira (Software)	187
b. iClone	201

Computer Graphics Principles and Practice-2

c. Indigo Renderer	205
d. CityEngine	206
e. Graphic Art Software	209

Chapter 7 Applications of Computer Graphics	213
--	------------

a. Special Effect	213
b. Ambient Occlusion	221
c. Web Design	224
d. Computer-generated Imagery	230
e. Texture Mapping	236
f. Morphing	243
g. Molecular Graphics	246
h. Scientific Visualization	260
i. Drug Design	271
j. Pixel Art	279

Chapter 8 Evolution of Computer Graphics	285
---	------------

a. History of Computer Animation	285
----------------------------------	-----

Chapter 7 - Machine Code

Chapter 8 - Programming Language Theory & Language Primitive

Chapter 9 - VHDL

Chapter 10 - Verilog

Chapter 11 - Esterel and Handel-C

Chapter 12 - C to HDL and Flow to HDL

Chapter 13 - SystemC

Chapter 14 - SystemVerilog

Chapter 15 - Verilog-AMS and VHDL-AMS

Chapter 16 - Lola (Computing) and MyHDL

Chapter 17 - e (Verification Language)

Chapter 18 - Logic Simulation and Functional Verification

Table of Contents

Chapter 1 - Introduction to Programming Language

Chapter 2 - Type System

Chapter 3 - Ada (programming language) and ALGOL

Chapter 4 - Erlang (Programming Language) and Forth (Programming Language)

Chapter 5 - Haskell (Programming Language) and Java (Programming Language)

Chapter 6 - Lisp (Programming Language) and Objective-C

Chapter 7 - Scheme

Computer Programming Tools

Table of Contents

Introduction

Chapter 1 - Profiling (Computer Programming) and Integrated Development Environment

Chapter 2 - Code Coverage and Compiler

Chapter 3 - Programming Style and Text Editor

Chapter 4 - Data Modeling

Chapter 5 - ActiveReports

Chapter 6 - FarPoint Spread and Hildon

Chapter 7 - JBoss Tools and XLeratorDB

Chapter 8 - RotateRight Zoom and Valgrind

Chapter 9 - Lazarus (IDE) and BusyBox

Computer System Administration

Table of Contents

- Chapter 1 - Out-of-Band Management
- Chapter 2 - Intrusion Detection System
- Chapter 3 - Computer Performance and Network Management
- Chapter 4 - Automounter
- Chapter 5 - Application Performance Management and Business Transaction Management
- Chapter 6 - Deep Freeze (Software) and Multiseat Configuration
- Chapter 7 - Intelligent Platform Management Interface
- Chapter 8 - Magic SysRq Key
- Chapter 9 - Password Cracking and Remote Administration
- Chapter 10 - Software Deployment and System Console
- Chapter 11 - System Monitor and System Profiler
- Chapter 12 - Systems Management and Windows Management Instrumentation
- Chapter 13 - Unix Shell
- Chapter 14 - Unix Security
- Chapter 15 - Quattor
- Chapter 16 - Advanced Configuration and Power Interface
- Chapter 17 - Time-Sharing
- Chapter 18 - Simple Network Management Protocol

Concepts, Elements and Components of Network Analysis

Table of Contents

Chapter 1 - Introduction to Network Analysis

Chapter 2 - Equivalent Impedance Transforms

Chapter 3 - Voltage Divider

Chapter 4 - Current Divider

Chapter 5 - Nodal Analysis

Chapter 6 - Mesh Analysis

Chapter 7 - Superposition Theorem & Transfer Function

Chapter 8 - Electrical Resistance

Chapter 9 - Capacitance

Chapter 10 - Inductance

Chapter 11 - Electrical Impedance

Chapter 12 - Current Source

Configuration Management in Computer Science

Table of Contents

Chapter 1 - Configuration Management

Chapter 2 - Baseline (Configuration Management) and CA Software Change Manager

Chapter 3 - Component Repository Management and Cfengine

Chapter 4 - Merge (Revision Control) and MSConfig

Chapter 5 - Opsi

Chapter 6 - Quattor

Chapter 7 - Software Configuration Management and Telelogic Synergy

Chapter 8 - Configuration File and AUTOEXEC.BAT

Chapter 9 - Autorun.inf

Chapter 10 - CONFIG.SYS

Chapter 11 - Fstab

Chapter 12 -INI File

Chapter 13 - Hosts (File)

Chapter 14 - Windows Registry

Cyberspace Computing (Elements, Components & Applications)

Table of Contents

Chapter 1 - Introduction to Cyberspace

Chapter 2 - Cyberethics

Chapter 3 - Web Search Engine

Chapter 4 - Web Page

Chapter 5 - Domain Name

Chapter 6 - Cloud Computing

Chapter 7 - Website

Chapter 8 - Cyberculture

Table of Contents

Preface	VII
Chapter 1 Introduction to Data Mining	1
Chapter 2 Data: Quality, Set and Management	11
• Data	11
• Data Quality	13
• Data Set	18
• Data Management	28
• Data Mapping	32
• Data Wrangling	34
• Data Integration	34
• Association Rule Learning	41
Chapter 3 Data Mining: Concepts and Processes	50
• Data Analysis	50
• Data Visualization	83
• Data Science	94
• Data Reduction	97
• Automatic Summarization	97
• Data Pre-processing	108
• Data Editing	109
Chapter 4 Various Data Mining Techniques	112
• Sequential Pattern Mining	112
• Process Mining	114
• Text Mining	116
• Data Stream Mining	122
• Data Scraping	123
• Bibliomining	125
Chapter 5 Data Mining Algorithms	128
• Alpha Algorithm	128
• Apriori Algorithm	130
• GSP Algorithm	133
• Teiresias Algorithm	134
Chapter 6 Cluster Analysis and its Algorithms	136
• Cluster Analysis	136
• Fuzzy Clustering	150
• FLAME Clustering	153
• k -means Clustering	155
• k -medians Clustering	165
• Single-linkage Clustering	166
• Spectral Clustering	168
• Hierarchical Clustering	170

Data Mining

Chapter 7 Common Data Mining Software	177
• H2O (Software)	177
• SAS (Software)	180
• Orange (Software)	184
• Massive Online Analysis	187
• Natural Language Toolkit	189
• OpenNN	190
• General Architecture for Text Engineering	191
Chapter 8 Applications of Data Mining	194
• Predictive Analytics	194
• Decision Support System	208
• Web Mining	213
Chapter 9 Allied Fields of Data Mining	218
• Artificial Intelligence	218
• Machine Learning	241
• Statistics	252
• Database	268

Data Transmission, Error Detection and Correction

Table of Contents

Chapter 1 - Introduction to Data Transmission

Chapter 2 - Modulation

Chapter 3 - Line Code & Baseband

Chapter 4 - Flow Control

Chapter 5 - Error Detection and Correction

Chapter 6 - Computer Networking

Chapter 7 - Communications Protocol

Chapter 8 - Uploading and Downloading

Chapter 9 - Differential Coding & Analog Transmission

Chapter 10 - Coding Theory

Chapter 11 - Convolutional Code, Concatenated Error Correction Code and Hadamard Code

Chapter 12 - Check Digit and Coding Gain

Chapter 13 - Hamming Code

Chapter 14 - Forward Error Correction and EXIT Chart

Chapter 15 - Hash Function

Chapter 16 - Group Code Recording and Binary Golay Code

Chapter 17 - Casting out Nines and Echo (computing)

Chapter 18 - BCH Code

Database Objects, Statements, Languages & SQL

Table of Contents

Chapter 1 - Insert (SQL)

Chapter 2 - PL/SQL

Chapter 3 - Data Definition Language & Data Manipulation Language

Chapter 4 - SQL

Chapter 5 - Select (SQL) & Table (Database)

Chapter 6 - Unique Key

Chapter 7 - Database

Chapter 8 - Delete (SQL) & Update (SQL)

Chapter 9 - Oracle Database

Chapter 10 - Null (SQL)

Chapter 11 - Where (SQL) & Order By

Databases in Computer Science & their Applications

Table of Contents

Chapter 1 - Relational Database

Chapter 2 - Data Mining

Chapter 3 - Unique Key and Foreign Key

Chapter 4 - Stored Procedure and Index (Database)

Chapter 5 - Relational Algebra

Chapter 6 - Database Normalization

Chapter 7 - Cluster Analysis

Chapter 8 - Association Rule Learning

Chapter 9 - Data Dredging and Data Fusion

Chapter 10 - Bioclustering and Clustering High-Dimensional Data

Chapter 11 - Consensus Clustering and Decision Tree Learning

Desktop Linux

Table of Contents

Introduction

Chapter 1 - Ubuntu (Operating System)

Chapter 2 - Fedora (Operating System)

Chapter 3 - Mandriva Linux

Chapter 4 - Gentoo Linux

Chapter 5 - Arch Linux

Chapter 6 - SUSE Linux Distributions

Chapter 7 - Damn Small Linux

Chapter 8 - Linux

Chapter 9 - Linux Distribution

Distributed Computing & its Applications

Table of Contents

Chapter 1 - Distributed Computing

Chapter 2 - Computer Network

Chapter 3 - Peer-to-peer

Chapter 4 - Distributed Database and Serializability

Chapter 5 - Distributed Algorithms

Chapter 6 - Self-Stabilization and Grid Computing

Table of Contents

Chapter 1 - Computer Architecture

Chapter 2 - Software Framework and Network Architecture

Chapter 3 - Software Architecture

Chapter 4 - Distributed Lock Manager and Distributed Database

Chapter 5 - Distributed Data Flow and Client–server Model

Chapter 6 - Autonomic Computing and Message Passing

Chapter 7 - Live Distributed Object and High Level Architecture
(simulation)

Chapter 8 - Multitier Architecture, Utility Computing and Volunteer computing

Chapter 9 - RM-ODP

Chapter 10 - Supercomputer

Chapter 11 - Cloud Computing

Chapter 12 - Ambient Intelligence and Ubiquitous Computing

Chapter 13 - Web Service

Chapter 14 - Server (Computing)

Table of Contents

Chapter 1 - Distributed Computing

Chapter 2 - Computer Network

Chapter 3 - Peer-to-peer

Chapter 4 - Distributed Database and Serializability

Chapter 5 - Computer Architecture

Chapter 6 - Software Framework and Network Architecture

Chapter 7 - Software Architecture

Chapter 8 - Distributed Lock Manager

Chapter 9 - Distributed Data Flow and Client–server Model

Chapter 10 - Autonomic Computing and Message Passing

Chapter 11 - Live Distributed Object and High Level Architecture
(simulation)

Chapter 12 - Multitier Architecture, Utility Computing and Volunteer
computing

Chapter 13 - RM–ODP

Chapter 14 - Supercomputer

Chapter 15 - Cloud Computing

Table of Contents

Chapter 1 - Computer Network

Chapter 2 - Computer Networking

Chapter 3 - OSI Model

Chapter 4 - Physical Layer

Chapter 5 - Data Link Layer

Chapter 6 - Transport Layer

Chapter 7 - Session Layer, Application Layer & Presentation Layer

Chapter 8 - Spanning Tree Protocol

Chapter 9 - Ethernet

Chapter 10 - Link Aggregation

Chapter 11 - IP Address

Chapter 12 - Simple Network Management Protocol

Chapter 13 - Network Address Translation

Table of Contents

Chapter 1 - Computer Art

Chapter 2 - Computer Graphics

Chapter 3 - Computational Photography (Artistic) and Demoscene

Chapter 4 - Algorithmic Art and Fractal Art

Chapter 5 - Graphic Art Software

Chapter 6 - Spriting and Pixel Art

Chapter 7 - Introduction to ASCII Art

Chapter 8 - ANSI Art and Tiled Printing

Chapter 9 - ANSI Escape Code and TheDraw

Chapter 10 - ASCII Stereogram and BSAVE (Graphics Image Format)

Chapter 11 - Cowsay and FIGlet

Chapter 12 - .nfo

Table of Contents

- Chapter 1 - Btrfs
- Chapter 2 - Ext2
- Chapter 3 - Ext3
- Chapter 4 - Ext4
- Chapter 5 - FAT Filesystem & Linux
- Chapter 6 - Global File System
- Chapter 7 - JFFS and JFFS2
- Chapter 8 - LogFS and Lustre (File System)
- Chapter 9 - NILFS and ReiserFS
- Chapter 10 - XFS
- Chapter 11 - Parallel Virtual File System
- Chapter 12 - MagmaFS and Inotify
- Chapter 13 - Initrd and AXFS

Table of Contents

Chapter 1 - SQL

Chapter 2 - Null (SQL)

Chapter 3 - PL/SQL

Chapter 4 - Alternatives to SQL

Chapter 5 - PostgreSQL

Chapter 6 - HTML

Chapter 7 - XML

Chapter 8 - HTML5 and XHTML

Chapter 9 - HTML Element

Chapter 10 - Semantic HTML and HTML E-mail

Chapter 11 - Character Encodings in HTML, Font Family (HTML) and Canvas Element

Chapter 12 - Microformat

Chapter 13 - Valid Characters in XML and Document Type Definition

Table of Contents

- Chapter 1 - LePUS3
- Chapter 2 - Vienna Development Method
- Chapter 3 - Data Modeling
- Chapter 4 - Unified Modeling Language
- Chapter 5 - Hardware Description Language
- Chapter 6 - Algebraic Petri Nets & Fundamental Modeling Concepts
- Chapter 7 - Business Process Execution Language
- Chapter 8 - Goal–Oriented Requirements Language & Meta–Object Facility
- Chapter 9 - Modeling Language
- Chapter 10 - Promela
- Chapter 11 - Petriscript
- Chapter 12 - Tersus and Subtext (Programming Language)
- Chapter 13 - Stagecast Creator and Quartz Composer
- Chapter 14 - LabVIEW and Max (Software)
- Chapter 15 - Limnor and Illumination Software Creator
- Chapter 16 - HyperNext and Kyma (Sound Design Language)
- Chapter 17 - Object Process Graph and Prograph
- Chapter 18 - Pure Data and Scratch (Programming Language)
- Chapter 19 - VisSim and Visual Basic

Table of Contents

Introduction

Chapter 1 - Tersus and Subtext (Programming Language)

Chapter 2 - Stagecast Creator and Quartz Composer

Chapter 3 - LabVIEW and Max (Software)

Chapter 4 - Limnor and Illumination Software Creator

Chapter 5 - HyperNext and Kyma (Sound Design Language)

Chapter 6 - Object Process Graph and Prograph

Chapter 7 - Pure Data and Scratch (Programming Language)

Chapter 8 - VisSim and Visual Basic

Chapter 9 - IIf, Visual Basic .NET and Visual DialogScript

Table of Contents

Chapter 1 - Google Chrome

Chapter 2 - Firefox

Chapter 3 - Internet Explorer

Chapter 4 - Internet Explorer 9

Chapter 5 - Safari

Encyclopedia of Windows (Operating Systems)

Table of Contents

Chapter 1 - Microsoft Windows

Chapter 2 - Windows 1.0 and Windows 2.0

Chapter 3 - Windows 3.0

Chapter 4 - Windows 3.1x

Chapter 5 - Windows 95

Chapter 6 - Windows 98

Chapter 7 - Windows Me

Chapter 8 - Windows NT

Chapter 9 - Windows CE

Chapter 10 - Windows 9x

Chapter 11 - Windows XP

Chapter 12 - Windows 7

Error detection and Correction in Information and Coding Theory (Concepts and Applications)

Table of Contents

Chapter 1 - Error Detection and Correction

Chapter 2 - Coding Theory

Chapter 3 - Convolutional Code, Concatenated Error Correction Code and Hadamard Code

Chapter 4 - Check Digit and Coding Gain

Chapter 5 - Hamming Code

Chapter 6 - Forward Error Correction and EXIT Chart

Chapter 7 - Hash Function

Chapter 8 - Group Code Recording and Binary Golay Code

Chapter 9 - Casting out Nines and Echo (computing)

Chapter 10 - BCH Code

Chapter 11 - Viterbi Decoder

Chapter 12 - Viterbi Algorithm

Chapter 13 - Turbo Code

Features of Operating Systems and Software Applications

Table of Contents

Chapter 1 - Features of Mozilla Firefox

Chapter 2 - Features of the Opera Web Browser

Chapter 3 - Features of Skype

Chapter 4 - Features New to Windows 7

Chapter 5 - Features New to Windows Vista

Chapter 6 - Security and Safety Features New to Windows Vista

Chapter 7 - Technical Features New to Windows Vista

Chapter 8 - Features New to Windows XP

Table of Contents

Chapter 1 - Free Software

Chapter 2 - Open-Source Software

Chapter 3 - Free and Open Source Software

Chapter 4 - Source Code

Chapter 5 - Free Software Movement

Chapter 6 - Open Source Movement

Chapter 7 - Free Software License

Chapter 8 - History of Free Software

Chapter 9 - BSD Licenses

Chapter 10 - MIT License

Chapter 11 - GNU General Public License

Chapter 12 - Copyleft

Chapter 13 - List of Free and Open Source Software Packages

Handbook of Central Processing Unit and its Sockets

Table of Contents

Chapter 1 - Central Processing Unit

Chapter 2 - History of General Purpose CPUs

Chapter 3 - Microprocessor and CPU Design

Chapter 4 - Instruction Pipeline and Superscalar

Chapter 5 - Vector Processor and SIMD

Chapter 6 - CPU Socket

Chapter 7 - Dual in-line Package

Chapter 8 - Socket 370 and Socket 478

Chapter 9 - Socket 479 and Zero Insertion Force

Chapter 10 - Slot 1 and Slot 2

Chapter 11 - LGA 775, LGA 1156 and LGA 1366

Chapter 12 - Plastic Leaded Chip Carrier, LGA 771 and Socket M

Table of Contents

Chapter 1 - Computer Memory

Chapter 2 - Memory Protection

Chapter 3 - Dynamic Random-Access Memory

Chapter 4 - Static Random-Access Memory

Chapter 5 - T-RAM, Z-RAM and Twin Transistor RAM

Chapter 6 - Non-Volatile Memory

Chapter 7 - Read-Only Memory

Chapter 8 - Programmable Read-Only Memory and EPROM

Chapter 9 - EEPROM

Chapter 10 - Flash Memory

Chapter 11 - Ferroelectric RAM

Chapter 12 - Magnetoresistive Random Access Memory

Chapter 13 - Phase-Change Memory

Handbook of Computer Programming and Hardware Description Languages

Table of Contents

Chapter 1 - Introduction to Programming Language

Chapter 2 - Type System

Chapter 3 - Ada (programming language) and ALGOL

Chapter 4 - Erlang (Programming Language) and Forth (Programming Language)

Chapter 5 - Haskell (Programming Language) and Java (Programming Language)

Chapter 6 - Introduction to HDL

Chapter 7 - VHDL

Chapter 8 - Verilog

Table of Contents

Chapter 1 - Introduction to Computer Science

Chapter 2 - History of Computer Science

Chapter 3 - Theoretical Computer Science

Chapter 4 - Software Engineering

Chapter 5 - Computing

Chapter 6 - Quantum Computer

Chapter 7 - Computational Geometry

Chapter 8 - Computability and Computational Complexity Theory

Chapter 9 - Computer Vision

Handbook of CPU Sockets

Table of Contents

Chapter 1 - CPU Socket

Chapter 2 - Dual in-line Package

Chapter 3 - Socket 370 and Socket 478

Chapter 4 - Socket 479 and Zero Insertion Force

Chapter 5 - Slot 1 and Slot 2

Chapter 6 - LGA 775, LGA 1156 and LGA 1366

Chapter 7 - Plastic Leaded Chip Carrier, LGA 771 and Socket M

Chapter 8 - Standard CPU Socket

Chapter 9 - Advanced Micro Devices Sockets

Handbook of Design Professions

Table of Contents

Chapter 1 - Architect

Chapter 2 - Stonemasonry

Chapter 3 - Fashion Design

Chapter 4 - Industrial Design

Chapter 5 - Interior Design

Chapter 6 - Software Design

Chapter 7 - Engineer

Handbook of Software Engineering and Development

Table of Contents

Chapter 1 - Introduction to Software Engineering

Chapter 2 - History of Software Engineering

Chapter 3 - Software Engineer

Chapter 4 - Software Requirements and Software Design

Chapter 5 - Computer–Aided Software Engineering

Chapter 6 - Software Development and Software Testing

Chapter 7 - Software Maintenance and Software Configuration Management

Chapter 8 - Rapid Application Development

Chapter 9 - Internationalization and Localization

Chapter 10 - Programming Tool

Chapter 11 - Software Documentation

Chapter 12 - Requirements Analysis

Chapter 13 - Software Project Management

Chapter 14 - Software Development Process

Chapter 15 - Aspect–Oriented Software Development

Chapter 16 - Fork (Software Development)

Chapter 17 - Software Quality

History of Computing and Internet

Table of Contents

Chapter 1 - History of Computing

Chapter 2 - History of Computing Hardware

Chapter 3 - History of Computing Hardware (1960s–Present)

Chapter 4 - History of Artificial Intelligence and History of Computer Science

Chapter 5 - History of Operating Systems and History of Programming Languages

Chapter 6 - Introduction to History of the Internet

Chapter 7 - ARPANET

Chapter 8 - Packet Switching

Chapter 9 - X.25

Chapter 10 - FidoNet

Chapter 11 - Usenet

History of Computing

Table of Contents

Chapter 1 - History of Computing

Chapter 2 - History of Computing Hardware

Chapter 3 - History of Computing Hardware (1960s–Present)

Chapter 4 - History of Artificial Intelligence and History of Computer Science

Chapter 5 - History of Operating Systems and History of Programming Languages

Chapter 6 - History of Software Engineering and History of the Graphical User Interface

Chapter 7 - History of the Internet and History of Personal Computers

History of Home Computers & Retrocomputing

Table of Contents

Chapter 1 - Home Computers

Chapter 2 - Acorn Archimedes

Chapter 3 - Acorn Electron

Chapter 4 - Macintosh

Chapter 5 - Amstrad CPC

Chapter 6 - BBC Master

Chapter 7 - Retrocomputing

Chapter 8 - Apple II Series

Chapter 9 - IBM Personal Computer

Chapter 10 - ZX Spectrum

History of Home Computers

Table of Contents

Chapter 1 - Home Computers

Chapter 2 - Acorn Archimedes

Chapter 3 - Acorn Electron

Chapter 4 - Macintosh

Chapter 5 - Amstrad CPC

Chapter 6 - BBC Master

Chapter 7 - Commodore PET and Coleco Adam

Chapter 8 - Comx-35 and Didaktik

Chapter 9 - Elektronika BK and Dragon 32/64

Chapter 10 - Grundy NewBrain

History of the Internet

Table of Contents

Chapter 1 - Introduction to History of the Internet

Chapter 2 - ARPANET

Chapter 3 - Packet Switching

Chapter 4 - X.25

Chapter 5 - FidoNet

Chapter 6 - Usenet

Chapter 7 - Internet Protocol Suite

Chapter 8 - History of the World Wide Web

Important Concepts and subfields of Information Theory

Table of Contents

Chapter 1 - Introduction to Information Theory

Chapter 2 - Entropy

Chapter 3 - Noisy-Channel Coding Theorem and Mutual Information

Chapter 4 - Quantities of Information and Coding Theory

Chapter 5 - Channel Capacity and Binary Symmetric Channel

Chapter 6 - Kullback–Leibler Divergence

Chapter 7 - Rate–Distortion Theory

Chapter 8 - Introduction to Algorithmic Information Theory

Chapter 9 - Chaitin's Constant

Chapter 10 - Kolmogorov Complexity

Chapter 11 - Binary Lambda Calculus and Linear Partial Information

Chapter 12 - Minimum Description Length

Important Concepts and Tools in Computer Programming

Table of Contents

Chapter 1 - Introduction to Computer Programming

Chapter 2 - Programming Language

Chapter 3 - Programmer

Chapter 4 - Algorithmic Skeleton and Control Table

Chapter 5 - Nassi–Shneiderman Diagram

Chapter 6 - Profiling (Computer Programming) and Integrated Development Environment

Chapter 7 - Code Coverage and Compiler

Chapter 8 - Programming Style and Text Editor

Chapter 9 - Data Modeling

Chapter 10 - ActiveReports

Chapter 11 - FarPoint Spread and Hildon

Chapter 12 - JBoss Tools and XLayerDB

Table of Contents

Chapter 1 - Artificial Consciousness

Chapter 2 - Machine Learning

Chapter 3 - Types of Machine Learning

Chapter 4 - Supervised Learning

Chapter 5 - Association Rule Learning

Chapter 6 - Artificial Neural Network

Chapter 7 - Support Vector Machine

Chapter 8 - Cluster Analysis

Chapter 9 - Bayesian Network

Chapter 10 - Machine Olfaction & Machine Vision

Information and Internet Privacy Handbook

Table of Contents

Chapter 1 - Introduction to Information Privacy

Chapter 2 - Internet Privacy

Chapter 3 - Information Privacy Law and Personally Identifiable
Information

Chapter 4 - Data Protection Act 1998

Chapter 5 - Data Protection Directive and International Safe Harbor Privacy
Principles

Chapter 6 - Personal Information Protection and Electronic Documents Act

Chapter 7 - Declassification and Privacy law

Chapter 8 - HTTP Cookie

Chapter 9 - Intranet and Local Shared Object

Chapter 10 - Online Identity

Chapter 11 - Privacy Policy

Chapter 12 - Privacy in File Sharing Networks and Secure Messaging

Chapter 13 - SOCKS

Chapter 14 - Tor (Anonymity Network)

Table of Contents

Introduction

Chapter 1 - Netbook

Chapter 2 - Mobile Computing

Chapter 3 - Personal Digital Assistant

Chapter 4 - Smart TV

Chapter 5 - Smartphone

Chapter 6 - E-book

Chapter 7 - Digital Audio Player

Chapter 8 - Portable Media Player

Chapter 9 - Construction Field Computing

Chapter 10 - Mobile Web

Information Privacy (Concepts & Applications)

Table of Contents

Chapter 1 - Introduction to Information Privacy

Chapter 2 - Internet Privacy

Chapter 3 - Information Privacy Law and Personally Identifiable Information

Chapter 4 - Data Protection Act 1998

Chapter 5 - Data Protection Directive and International Safe Harbor Privacy Principles

Chapter 6 - Personal Information Protection and Electronic Documents Act

Chapter 7 - Declassification and Privacy law

Chapter 8 - Criticism of Facebook

Chapter 9 - Pretty Good Privacy(computer program)

Information Retrieval Handbook

Table of Contents

Chapter 1 - Information Retrieval

Chapter 2 - Discounted Cumulative Gain

Chapter 3 - Web Search Engine

Chapter 4 - Bioinformatic Harvester, Adversarial Information Retrieval and Anchor Text

Chapter 5 - ChemRefer, Compound Term Processing, Document Clustering and Document Retrieval

Chapter 6 - EXCLAIM, Enterprise Search and Expertise Finding

Chapter 7 - Exploratory Search, Faceted Search and Federated Search

Chapter 8 - Human–computer Information Retrieval and Full Text Search

Chapter 9 - Index (search engine)

Chapter 10 - Music Information Retrieval, IR Evaluation, Gain (information retrieval) and Harvester42

Chapter 11 - Nearest Neighbor Search and Multi-Document Summarization

Chapter 12 - Precision and Recall

Chapter 13 - Question Answering

Chapter 14 - Query Expansion, Relevance (information retrieval) and Relevance Feedback

Chapter 15 - Search Engine (computing) and Search Engine Technology

Table of Contents

Preface	VII
Chapter 1 Information Security: An Introduction	1
Chapter 2 Approaches Towards Information Security	24
• Data-centric Security	24
• Data Masking	25
• Cyber Security Standards	30
• Global Surveillance	36
Chapter 3 Protection Method of Information Systems	61
• Computer security	61
Chapter 4 Challenges and Threats to Information Technology	85
• IT risk	85
• Cybercrime	101
• ITIL Security Management	109
Chapter 5 Cryptography: A Comprehensive Study	123
• Cryptography	123
• Enterprise information Security Architecture	139
• Network Security	144
• Digital Rights Management	146
• Copyright Infringement	170
Chapter 6 Various Aspects and Forms of Cryptography	188
• Confidentiality	188
• Data integrity	191
• Authentication	195
• Non-repudiation	203
• Symmetric-key Algorithm	204
• Public-key Cryptography	206
• Cryptanalysis	220
• Strong Cryptography	229
• Data Security	232
• Network Security Services	234
Permissions	
Index	

Table of Contents

Chapter 1 - Information Systems & Information Engineering

Chapter 2 - Geographic Information System

Chapter 3 - Intelligent Transportation System

Chapter 4 - Digital Electronics

Chapter 5 - Expert System

Chapter 6 - Digital Library

Chapter 7 - Accounting Information System

Chapter 8 - Dashboards (Management Information Systems) & Risk Management Information Systems

Chapter 9 - Executive Information System

Chapter 10 - Student Information System

Chapter 11 - Laws of Information systems

Information Systems Engineering & Information Retrieval Handbook

Table of Contents

- Chapter 1 - Information Systems & Information Engineering
- Chapter 2 - Geographic Information System
- Chapter 3 - Intelligent Transportation System
- Chapter 4 - Digital Electronics
- Chapter 5 - Expert System
- Chapter 6 - Digital Library
- Chapter 7 - Information Retrieval
- Chapter 8 - Discounted Cumulative Gain
- Chapter 9 - Web Search Engine
- Chapter 10 - Bioinformatic Harvester, Adversarial Information Retrieval and Anchor Text
- Chapter 11 - ChemRefer, Compound Term Processing, Document Clustering and Document Retrieval
- Chapter 12 - EXCLAIM, Enterprise Search and Expertise Finding
- Chapter 13 - Exploratory Search, Faceted Search and Federated Search
- Chapter 14 - Human–computer Information Retrieval and Full Text Search
- Chapter 15 - Index (search engine)

Information Technology and Management

Table of Contents

Introduction

Chapter 1 - Software Engineering

Chapter 2 - Legal Aspects of Computing

Chapter 3 - Data Management

Chapter 4 - Network Security

Chapter 5 - Information Security

Table of Contents

Chapter 1 - Management Information System

Chapter 2 - Decision Support Systems and Executive Information Systems

Chapter 3 - Collaborative Software

Chapter 4 - Configuration Management

Chapter 5 - Enterprise Resource Planning

Chapter 6 - Electronic Business

Chapter 7 - E-Marketing

Chapter 8 - Electronic Commerce

Table of Contents

Preface	VII
Chapter 1 An Overview of Information Technology	1
i. Information Technology	1
ii. Computer Science	7
iii. Information and Communications Technology	19
Chapter 2 Tools and Techniques in Information Technology	27
i. Information Retrieval	27
ii. Information Retrieval Facility	39
iii. Data Mining	54
iv. Information Extraction	65
v. Data Storage Device	70
vi. Data Transmission	79
Chapter 3 Information Management and its Methods	86
i. Information Management	86
ii. IBM Information Management System	93
iii. Data Modeling	97
iv. Computer Data Storage	105
v. Ontology (Information Science)	116
vi. Knowledge Organization	129
vii. Strategic Management	133
viii. Content Management	162
ix. Information Society	165
x. Data Processing	176
Chapter 4 General Aspects of Information Technology	179
i. Information Access	179
ii. Information Architecture	180
iii. Philosophy of Information	202
iv. Cluster Analysis	205
v. Software	221
vi. Internet	229
Chapter 5 Information System: An Overview	255
i. Information System	255
ii. Management Information System	264
Permissions	
Index	

Table of Contents

Chapter 1 - Instruction Set

Chapter 2 - Instruction Pipeline

Chapter 3 - Hazard (Computer Architecture)

Chapter 4 - Machine Code and Instruction Cycle

Chapter 5 - Microcode

Chapter 6 - Branch Predictor

Chapter 7 - Branch Predication and Cycles Per Instruction

Chapter 8 - Burroughs Large Systems Instruction Sets

Chapter 9 - GPGPU

Chapter 10 - MikroSim and Memory Barrier

Chapter 11 - Very Long Instruction Word

Chapter 12 - Orthogonal Instruction Set and Out-of-Order Execution

Chapter 13 - Jazelle and Delay Slot

International Internet Censorship

Table of Contents

Chapter 1 - Introduction to Internet Censorship

Chapter 2 - Internet Censorship in Iran

Chapter 3 - Internet Censorship in the People's Republic of China

Chapter 4 - Internet Censorship in Vietnam

Chapter 5 - Censorship of YouTube

Chapter 6 - Internet Censorship in the United States and Internet Censorship in the United Kingdom

Chapter 7 - Internet Censorship in Thailand and Internet Censorship in Pakistan

Chapter 8 - Internet Censorship in India

Chapter 9 - Internet Censorship in Australia

Internet & Cyberspace Computing (Development, Elements, Uses & Applications)

Table of Contents

Chapter 1 - Introduction to Internet

Chapter 2 - History of the Internet

Chapter 3 - World Wide Web

Chapter 4 - Internet Protocol Suite

Chapter 5 - Introduction to Cyberspace

Chapter 6 - Cyberethics

Chapter 7 - Web Search Engine

Chapter 8 - Web Page

Chapter 9 - Domain Name

Chapter 10 - Cloud Computing

Internet (Development & Uses)

Table of Contents

Chapter 1 - Introduction to Internet

Chapter 2 - History of the Internet

Chapter 3 - World Wide Web

Chapter 4 - Internet Protocol Suite

Chapter 5 - UUCP and Usenet

Chapter 6 - Email

Table of Contents

- Chapter 1 - Border Gateway Protocol
- Chapter 2 - Classful Network
- Chapter 3 - Classless Inter-Domain Routing
- Chapter 4 - Differentiated Services
- Chapter 5 - End-to-end Principle and Forwarding Plane
- Chapter 6 - IPv4 Address Exhaustion and Locator/Identifier Separation Protocol
- Chapter 7 - Mbone and Multicast
- Chapter 8 - Peering
- Chapter 9 - Introduction to Internet Governance
- Chapter 10 - Alternative DNS Root and Domain Name Registry
- Chapter 11 - Internet Governance Forum
- Chapter 12 - InterNIC and Internet Watch Foundation
- Chapter 13 - Legal Status of Internet Pornography
- Chapter 14 - Internet Assigned Numbers Authority

Table of Contents

Chapter 1 - Introduction to Internet Governance

Chapter 2 - Alternative DNS Root and Domain Name Registry

Chapter 3 - Internet Governance Forum

Chapter 4 - InterNIC and Internet Watch Foundation

Chapter 5 - Legal Status of Internet Pornography

Chapter 6 - Internet Assigned Numbers Authority

Chapter 7 - Introduction to Internet Censorship

Chapter 8 - Internet Censorship in Iran

Chapter 9 - Internet Censorship in the People's Republic of China

Chapter 10 - Internet Censorship in Vietnam

Chapter 11 - Censorship of YouTube

Chapter 12 - Internet Censorship in the United States and Internet Censorship in the United Kingdom

Chapter 13 - Internet Censorship in Thailand and Internet Censorship in Pakistan

Internet Spamming

Table of Contents

Chapter 1 - Spam

Chapter 2 - Messaging Spam and Newsgroup Spam

Chapter 3 - Forum Spam and Mobile Phone Spam

Chapter 4 - Spamdexing

Chapter 5 - Spam in Blogs

Chapter 6 - Anti-Spam Techniques

Chapter 7 - E-mail Address Harvesting

Chapter 8 - Google Bomb

Chapter 9 - Web Bug

Chapter 10 - E-mail Spam

Introduction to C++ and C (Programming Languages)

Table of Contents

Chapter 1 - C++(Programming Language)

Chapter 2 - C (Programming Language)

Chapter 3 - Operators in C and C++

Chapter 4 - C++ Classes

Chapter 5 - C++0x

Chapter 6 - C99

Chapter 7 - C1X and C syntax

Chapter 8 - C Variable Types and Declarations & Header File

Introduction to Central Processing Unit

Table of Contents

Chapter 1 - Central Processing Unit

Chapter 2 - History of General Purpose CPUs

Chapter 3 - Microprocessor and CPU Design

Chapter 4 - Instruction Pipeline and Superscalar

Chapter 5 - Vector Processor and SIMD

Chapter 6 - Reduced Instruction Set Computing and Direct Memory Access

Chapter 7 - GPGPU and CPU Cache

Introduction to Compiler Theory

Table of Contents

Chapter 1 - Compiler

Chapter 2 - Compiler Optimization

Chapter 3 - Cross Compiler and Just-In-Time Compilation

Chapter 4 - Aspect Weaver and Compiler Description Language

Chapter 5 - Context-free Grammar

Chapter 6 - Extended Backus–Naur Form and Name Mangling

Chapter 7 - Parsing and Static Single Assignment Form

Chapter 8 - Symbol Table and Control Table

Introduction to HTML & XML (Markup Languages)

Table of Contents

Chapter 1 - HTML

Chapter 2 - XML

Chapter 3 - HTML5 and XHTML

Chapter 4 - HTML Element

Chapter 5 - Semantic HTML and HTML E-mail

Chapter 6 - Character Encodings in HTML, Font Family (HTML) and Canvas Element

Chapter 7 - Microformat

Chapter 8 - Valid Characters in XML and Document Type Definition

Chapter 9 - XML Schema (W3C) and RELAX NG

Chapter 10 - Schematron and XML Namespace

Chapter 11 - XPath and XSLT

Chapter 12 - XQuery and XML Signature

Introduction to Internet Relay Chat in Internet Culture

Table of Contents

Chapter 1 - Introduction to Internet Relay Chat

Chapter 2 - Internet Relay Chat Services

Chapter 3 - mIRC and Mibbit

Chapter 4 - IRCd

Chapter 5 - IRC Network

Chapter 6 - Direct Client-to-Client

Chapter 7 - Internet Relay Chat Script

Chapter 8 - Internet Relay Chat Flood and Netsplit

Chapter 9 - List of Internet Relay Chat Commands

Introduction to Structured Query Language

Table of Contents

Chapter 1 - SQL

Chapter 2 - Null (SQL)

Chapter 3 - PL/SQL

Chapter 4 - Alternatives to SQL

Chapter 5 - PostgreSQL

Chapter 6 - SQL Injection and Join (SQL)

Java Application Programming Interfaces

Table of Contents

Chapter 1 - Java Database Connectivity and Java 2D

Chapter 2 - Java 3D and Java Data Objects

Chapter 3 - Java Management Extensions & Java Naming and Directory Interface

Chapter 4 - Java Speech API and Java Transaction API

Chapter 5 - Java OpenGL and QuickTime for Java

Chapter 6 - Standard Widget Toolkit and Swing (Java)

Chapter 7 - Java API for XML Processing and Java Native Interface

Chapter 8 - Java Message Service and Connected Limited Device Configuration

Chapter 9 - Javamail and Java Persistence API

Chapter 10 - FSPPath

Chapter 11 - Apache Struts and J/XFS

Table of Contents

Chapter 1 - Java Software Platform

Chapter 2 - Java Virtual Machine and Java Class Library

Chapter 3 - JavaFX

Chapter 4 - Java Bytecode

Chapter 5 - Class (File Format) and Concutest

Chapter 6 - OSGi and GNU Compiler for Java

Chapter 7 - Grails and Griffon (Framework)

Chapter 8 - Hibernate (Java) and JDBC Driver

Chapter 9 - Java Bindings for OpenGL and Java Logging Framework

Chapter 10 - Java Servlet and Java Bytecode Instruction Listings

Table of Contents

Chapter 1 - Java Software Platform

Chapter 2 - Java Virtual Machine and Java Class Library

Chapter 3 - JavaFX

Chapter 4 - Java Bytecode

Chapter 5 - Class (File Format) and Concutest

Chapter 6 - OSGi and GNU Compiler for Java

Chapter 7 - Grails and Griffon (Framework)

Chapter 8 - Hibernate (Java) and JDBC Driver

Chapter 9 - Apache Harmony and Dalvik (Software)

Chapter 10 - HotSpot

Chapter 11 - Microsoft Java Virtual Machine and IcedTea

Chapter 12 - Jikes RVM and Jazelle

Chapter 13 - OpenJDK and Clojure

Chapter 14 - Java Pathfinder

Chapter 15 - Strictfp, Groovy (Programming Language) and Java Native Interface

Java Programming and Python Programming Languages (Basics & Applications)

Table of Contents

Chapter 1 - Java (Programming Language)

Chapter 2 - Java Version History

Chapter 3 - Java (Software Platform) and Java Performance

Chapter 4 - Java Applet and Java Syntax

Chapter 5 - Clone (Java Method) and Criticism of Java

Chapter 6 - Generics in Java and Interface (Java)

Chapter 7 - Introduction to Python Programming Language

Chapter 8 - History of Python

Chapter 9 - IronPython and PyPy

Chapter 10 - Python Syntax and Semantics

Chapter 11 - CPython and Jython

Chapter 12 - CLyther, NumPy and Web Server Gateway Interface

Chapter 13 - CherryPy and Django (Web Framework)

Chapter 14 - web2py and TurboGears

Chapter 15 - Pylons (Web Framework) and Trac

Java Programming Language & Applications

Table of Contents

Chapter 1 - Java (Programming Language)

Chapter 2 - Java Version History

Chapter 3 - Java (Software Platform) and Java Performance

Chapter 4 - Java Applet and Java Syntax

Chapter 5 - Clone (Java Method) and Criticism of Java

Chapter 6 - Generics in Java and Interface (Java)

Chapter 7 - Java Annotation and Swing (Java)

Chapter 8 - New I/O and OpenJDK

Table of Contents

Chapter 1 - Introduction to Java Virtual Machine

Chapter 2 - Java Bytecode

Chapter 3 - Apache Harmony and Dalvik (Software)

Chapter 4 - HotSpot

Chapter 5 - Microsoft Java Virtual Machine and IcedTea

Chapter 6 - Jikes RVM and Jazelle

Chapter 7 - OpenJDK and Clojure

Chapter 8 - Java Pathfinder

Chapter 9 - Strictfp, Groovy (Programming Language) and Java Native Interface

Know All About Google The Internet Industry Leader

Table of Contents

Chapter 1 - Introduction to Google

Chapter 2 - History of Google

Chapter 3 - Google Search

Chapter 4 - Gmail

Chapter 5 - Google Buzz

Chapter 6 - Google Chrome

Chapter 7 - Google Talk

Chapter 8 - Orkut

Chapter 9 - Google Voice

Chapter 10 - Google Wave

Chapter 11 - YouTube

Chapter 12 - Google Chrome OS

Know All About Internet Privacy

Table of Contents

Chapter 1 - Introduction to Internet Privacy

Chapter 2 - HTTP Cookie

Chapter 3 - Intranet and Local Shared Object

Chapter 4 - Online Identity

Chapter 5 - Privacy Policy

Chapter 6 - Privacy in File Sharing Networks and Secure Messaging

Chapter 7 - SOCKS

Chapter 8 - Tor (Anonymity Network)

Chapter 9 - Virtual Private Network

Chapter 10 - Criticism of Facebook

Know All About Software (Types, Architecture, Quality, Development & Engineering)

Table of Contents

Chapter 1 - Software

Chapter 2 - Types of Software

Chapter 3 - Software Architecture

Chapter 4 - Software Quality

Chapter 5 - Software Testing

Chapter 6 - Software Engineering

Chapter 7 - Software Development

Know All About Web Browsers

Table of Contents

Chapter 1 - Web Browser

Chapter 2 - History of the Web Browser

Chapter 3 - Usage Share of Web Browsers

Chapter 4 - Browser Wars

Chapter 5 - Opera

Chapter 6 - Google Chrome

Chapter 7 - K-Meleon

Chapter 8 - Internet Explorer 9

Legal Aspects of Computing & Computer-Related Patent Laws

Table of Contents

Chapter 1 - Legal Aspects of Computing

Chapter 2 - Communications Decency Act and Child Online Protection Act

Chapter 3 - Computer Fraud and Abuse Act and Computer Misuse Act 1990

Chapter 4 - Convention on Cybercrime and Copyright Aspects of
Hyperlinking and Framing

Chapter 5 - Copyrighted Content on File Sharing Networks and Cyber
defamation law

Chapter 6 - Deleting Online Predators Act of 2006

Chapter 7 - Software Patent

Chapter 8 - Software Patents under United States Patent Law

Chapter 9 - Software Patents under the European Patent Convention

Chapter 10 - Software Patents under United Kingdom Patent Law

Chapter 11 - Patentable Subject Matter

Chapter 12 - Software Patents and Free Software

Chapter 13 - Software Patents under TRIPs Agreement and Computer
Programs and the Patent Cooperation Treaty

Legal Aspects of Computing

Table of Contents

Chapter 1 - Legal Aspects of Computing

Chapter 2 - Communications Decency Act and Child Online Protection Act

Chapter 3 - Computer Fraud and Abuse Act and Computer Misuse Act 1990

Chapter 4 - Convention on Cybercrime and Copyright Aspects of
Hyperlinking and Framing

Chapter 5 - Copyrighted Content on File Sharing Networks and Cyber
defamation law

Chapter 6 - Deleting Online Predators Act of 2006

Chapter 7 - Information Privacy Law and Internet as a Source of Prior Art

Chapter 8 - Microsoft litigation and Online Copyright Infringement Liability
Limitation Act

Table of Contents

Chapter 1 - Introduction to Linux

Chapter 2 - Linux Kernel

Chapter 3 - History of Linux

Chapter 4 - Linux Adoption

Chapter 5 - Linux Distribution

Chapter 6 - Btrfs

Chapter 7 - Ext2

Chapter 8 - Ext3

Chapter 9 - Ext4

Chapter 10 - FAT Filesystem & Linux

Chapter 11 - Global File System

Chapter 12 - JFFS and JFFS2

Chapter 13 - LogFS and Lustre (File System)

Chapter 14 - NILFS and ReiserFS

Chapter 15 - XFS

Table of Contents

Chapter 1 - Introduction to Logic Programming

Chapter 2 - Prolog

Chapter 3 - Negation as Failure and Stable Model Semantics

Chapter 4 - Answer Set Programming and Abductive Logic Programming

Chapter 5 - Constraint Logic Programming

Chapter 6 - Linear Logic

Chapter 7 - Introduction to Type Theory

Chapter 8 - Simply Typed Lambda Calculus

Chapter 9 - Type Polymorphism and Type System

Chapter 10 - Algebraic Data Type and Calculus of Constructions

Chapter 11 - Composite Data Type and Covariance and Contravariance
(Computer Science)

Chapter 12 - Liskov Substitution Principle and Effect System

Chapter 13 - Nominative Type System and Structural Type System

Chapter 14 - Option Type and POPLmark Challenge

Chapter 15 - Recursive Data Type and Strong Typing

Logic Programming

Table of Contents

Chapter 1 - Introduction to Logic Programming

Chapter 2 - Prolog

Chapter 3 - Negation as Failure and Stable Model Semantics

Chapter 4 - Answer Set Programming and Abductive Logic Programming

Chapter 5 - Constraint Logic Programming

Chapter 6 - Linear Logic

Chapter 7 - Datalog

Chapter 8 - SLD Resolution and Cut (Logic Programming)

Table of Contents

Chapter 1 - Software Maintenance

Chapter 2 - Software Evolution

Chapter 3 - Software Brittleness & Software Archaeology

Chapter 4 - Program Slicing & Patch (Computing)

Chapter 5 - Software Rot & Backporting

Chapter 6 - Software Modernization

Chapter 7 - Legacy System

Chapter 8 - Extreme Programming

Chapter 9 - Agile Software Development

Chapter 10 - Software Bug

Chapter 11 - COCOMO

Chapter 12 - Code Coverage

Chapter 13 - Cohesion (Computer Science) and Connascent Software Components

Chapter 14 - Coupling (Computer Programming)

Chapter 15 - Cyclomatic Complexity

Chapter 16 - Function Point and Instruction Path Length

Chapter 17 - Source Lines of Code

Chapter 18 - Run Time and Loader (Computing)

Chapter 19 - Binary File and Software Package Metrics

Maintenance, Development and Metric of Softwares

Chapter 20 - Duplicate Code

Chapter 21 - Linear Code Sequence and Jump

Table of Contents

Chapter 1 - Microcontroller

Chapter 2 - Single-board Microcontroller

Chapter 3 - Arduino

Chapter 4 - BASIC Stamp and Freescale 68HC11

Chapter 5 - PIC Microcontroller

Chapter 6 - Parallax Propeller

Chapter 7 - Intel MCS-51 and Intel MCS-48

Chapter 8 - PICAXE

Chapter 9 - Microprocessor

Chapter 10 - Multi-core Processor

Chapter 11 - Microprocessor Development Board and Memory Dependence Prediction

Chapter 12 - Reduced Instruction Set Computing

Chapter 13 - Microarchitecture

Chapter 14 - Hitachi 6309 and RCA 1802

Chapter 15 - Memory Disambiguation

Chapter 16 - LEON and EnCore Processor

Chapter 17 - Geode (Processor)

Microprocessors

Table of Contents

- Chapter 1 - Microprocessor
- Chapter 2 - Multi-core Processor
- Chapter 3 - Microprocessor Development Board and Memory Dependence Prediction
- Chapter 4 - Reduced Instruction Set Computing
- Chapter 5 - Microarchitecture
- Chapter 6 - Hitachi 6309 and RCA 1802
- Chapter 7 - Memory Disambiguation
- Chapter 8 - LEON and EnCore Processor
- Chapter 9 - Geode (Processor)
- Chapter 10 - Nios II and 1801 Series CPU
- Chapter 11 - Transputer
- Chapter 12 - TRIPS Architecture and SuperH

Table of Contents

Chapter 1 - Introduction to Microsoft Office

Chapter 2 - Microsoft Word

Chapter 3 - Microsoft Excel

Chapter 4 - Microsoft Outlook and Microsoft FrontPage

Chapter 5 - Microsoft PowerPoint

Chapter 6 - Microsoft Access

Table of Contents

Preface	VII
Chapter 1 Introduction to Database	1
Chapter 2 Various Types of Database	21
a. Cloud Database	21
b. Data Warehouse	24
c. Distributed Database	32
d. Mobile Database	37
e. Parallel Database	39
f. Graph Database	40
Chapter 3 Database Systems and Models	48
a. Relational Database Management System	48
b. Object-relational Database	79
c. Document-oriented Database	119
d. Object Database	129
e. In-memory Database	134
f. Embedded Database	136
g. Network Model	142
h. Hierarchical Database Model	143
i. Relational Model	145
j. Entity–relationship Origins	164
k. Entity–attribute–value Model	166
Chapter 4 Database Design: An Integrated Study	184
a. Database Design	184
b. Database Refactoring	187
c. Database Normalization	188
d. Data Structure	192
e. Database Engine	194
f. Database Server	197
g. Database Schema	198
Chapter 5 Tools and Techniques of Database Management	208
a. ACID	208
b. Create, Read, Update and Delete	211
c. Null (SQL)	213
d. Candidate Key	230
e. Foreign Key	233
f. Unique Key	238
g. Surrogate Key	243
h. NoSQL	248

Modern Database Management-2

Chapter 6	Computer Languages used in Database Management	257
a.	Data Definition Language	257
b.	Data Manipulation Language	260
c.	Query Language	261
Chapter 7	Database Security: A Comprehensive Study	264
a.	Database Security	264
b.	Database Activity Monitoring	268
c.	HP Atalla	272
d.	Data Breach	272
Chapter 8	Database Application: An Overview	281
a.	Database Application	281
b.	Inventory Management Software	282
c.	Content Management System	288
d.	Airline Reservations System	289
e.	Enterprise Software	293

Index		

Table of Contents

- Chapter 1 - Out-of-Band Management
- Chapter 2 - Intrusion Detection System
- Chapter 3 - Computer Performance and Network Management
- Chapter 4 - Automounter
- Chapter 5 - Application Performance Management and Business Transaction Management
- Chapter 6 - Deep Freeze (Software) and Multiseat Configuration
- Chapter 7 - Intelligent Platform Management Interface
- Chapter 8 - Magic SysRq Key
- Chapter 9 - Password Cracking and Remote Administration
- Chapter 10 - Software Deployment and System Console
- Chapter 11 - System Monitor and System Profiler
- Chapter 12 - Systems Management and Windows Management Instrumentation
- Chapter 13 - Autonomic Networking
- Chapter 14 - FCAPS
- Chapter 15 - Simple Network Management Protocol and Java Management Extensions
- Chapter 16 - Load Balancing (Computing) and Network Administrator
- Chapter 17 - Management Information Base and NETCONF
- Chapter 18 - NetCrunch and Netcat

Network Management & Computer System Administration

Chapter 19 - Network Operations Center and OpenNMS

Chapter 20 - Opsi

Chapter 21 - RRDtool, Rsyslog and Syslog-ng

Table of Contents

- Chapter 1 - Introduction to Object-Oriented Programming
- Chapter 2 - Subtype Polymorphism and This (Computer Science)
- Chapter 3 - Class and Instance (Computer Science)
- Chapter 4 - Method (Computer Science) and Message Passing
- Chapter 5 - Abstraction and Encapsulation (Object-Oriented Programming)
- Chapter 6 - Inheritance (Object-Oriented Programming) and Mutator Method
- Chapter 7 - Constructor (Object-Oriented Programming) and Dependency Injection
- Chapter 8 - Canonical Protocol Pattern & Domain Inventory Pattern
- Chapter 9 - Event-Driven SOA
- Chapter 10 - Entity Abstraction Pattern & Event-Driven Messaging
- Chapter 11 - Canonical Schema Pattern & Enterprise Inventory
- Chapter 12 - Service Abstraction & Service (Systems Architecture)
- Chapter 13 - Service Autonomy Principle & Service Layers Pattern
- Chapter 14 - Service Loose Coupling & Service Discoverability Principle
- Chapter 15 - Logic Centralization Pattern & Service Composability Principle
- Chapter 16 - Utility Abstraction Pattern & Standardized Service Contract
- Chapter 17 - Service-Oriented Programming

Object-Oriented Programming

Table of Contents

Chapter 1 - Introduction to Object-Oriented Programming

Chapter 2 - Subtype Polymorphism and This (Computer Science)

Chapter 3 - Class and Instance (Computer Science)

Chapter 4 - Method (Computer Science) and Message Passing

Chapter 5 - Abstraction and Encapsulation (Object-Oriented Programming)

Chapter 6 - Inheritance (Object-Oriented Programming) and Mutator Method

Chapter 7 - Constructor (Object-Oriented Programming) and Dependency Injection

Chapter 8 - Object-Relational Mapping and Object Database

Chapter 9 - Prototype-Based Programming and Iterator Pattern

Table of Contents

Preface	VII
Chapter 1 Introduction to Operating Systems	1
Chapter 2 Types of Operating Systems	24
• Mobile Operating System	24
• Network Operating System	95
• Embedded Operating System	114
• Real-time Operating System	114
• Just Enough Operating System	183
• Distributed Operating System	193
• Microsoft Windows	203
Chapter 3 Components of Operating Systems	218
• Kernel (Operating System)	218
• Process (Computing)	235
• Interrupt	238
• Protected Mode	244
• Memory Management	252
• Virtual Memory	254
• Preemption (Computing)	260
• Device Driver	262
• Computer Security	266
• Shell (Computing)	288
Chapter 4 Game Console Operating Systems	294
• Linux for PlayStation 2	294
• Wii U System Software	297
• Wii System Software	302
• Xbox One System Software	307
• OtherOS	312
Chapter 5 Evolution of Operating Systems	317
• History of Operating Systems	317
• History of IBM Mainframe Operating Systems	325

Index	

Operating Systems

Table of Contents

Chapter 1 - Operating System

Chapter 2 - History of Operating Systems

Chapter 3 - Features and Components of Operating Systems

Chapter 4 - Unix Operating System

Chapter 5 - Mac OS X

Chapter 6 - GNU and Linux Operating System

Chapter 7 - Google Chrome OS

Chapter 8 - Kernel

Chapter 9 - Computer Multitasking

Outline of Computer Hardware

Table of Contents

Chapter 1 - Personal Computer Hardware

Chapter 2 - Computer Data Storage

Chapter 3 - History of Computing Hardware

Chapter 4 - Motherboard and Power Supply Unit (Computer)

Chapter 5 - Secondary Storage

Table of Contents

Introduction

Chapter 1 - System Image and System Prevalence

Chapter 2 - Database Management System

Chapter 3 - Serialization

Chapter 4 - Carbonado (Java) and Persistent Data Structure

Chapter 5 - Java Persistence API and Snapshot (Computer Storage)

Chapter 6 - QuickDB ORM

Chapter 7 - XML

Chapter 8 - Base64

Chapter 9 - Comma-Separated Values

Chapter 10 - JSON

Chapter 11 - JsonML

Chapter 12 - S-Expression

Chapter 13 - SDXF

Chapter 14 - YAML

Plug-in Computing (Software Components & Applications that use Plug-ins)

Table of Contents

Chapter 1 - Plug-in (Computing)

Chapter 2 - Adobe Flash Player

Chapter 3 - QuickTime

Chapter 4 - Photoshop Plugin

Chapter 5 - foobar2000 and GStreamer

Chapter 6 - Winamp

Chapter 7 - OmniPeek and Eclipse (Software)

Chapter 8 - Adobe Flash

Chapter 9 - Microsoft Silverlight

Chapter 10 - jEdit, MonoDevelop and 3DMLW

Principles, Concepts and Elements of Computer Configuration

Table of Contents

Chapter 1 - Autoconfig and Autoconf

Chapter 2 - Apple Sleep Proxy Service (Bonjour Sleep Proxy) and Control Panel (Windows)

Chapter 3 - Environment Variable

Chapter 4 - Link–Local Address and System Preferences

Chapter 5 - Udev and Zero Configuration Networking

Chapter 6 - Make Compatible

Chapter 7 - Engineering Support and Component Repository Management

Chapter 8 - Configuration Management

Chapter 9 - Baseline (Configuration Management) and CA Software Change Manager

Chapter 10 - Merge (Revision Control) and MSConfig

Chapter 11 - Opsi

Chapter 12 - Quattor

Chapter 13 - Software Configuration Management and Telelogic Synergy

Chapter 14 - Configuration File and AUTOEXEC.BAT

Chapter 15 - Autorun.Inf

Chapter 16 - CONFIG.SYS

Chapter 17 - Fstab

Chapter 18 - INI File

Table of Contents

Chapter 1- Programming Language

Chapter 2 - Computer Programming

Chapter 3 - Computer Program

Chapter 4 - History of Programming Languages

Chapter 5 - Abstraction (Computer Science)

Chapter 6 - Assembly Language

Chapter 7 - Machine Code

Chapter 8 - Programming Language Theory & Language Primitive

Chapter 9 - Syntax (programming languages)

Chapter 10 - Type System

Python Programming Language & Applications

Table of Contents

Chapter 1 - Introduction to Python Programming Language

Chapter 2 - History of Python

Chapter 3 - IronPython and PyPy

Chapter 4 - Python Syntax and Semantics

Chapter 5 - CPython and Jython

Chapter 6 - CLyther, NumPy and Web Server Gateway Interface

Chapter 7 - CherryPy and Django (Web Framework)

Chapter 8 - web2py and TurboGears

Chapter 9 - Pylons (Web Framework) and Trac

Chapter 10 - PyQt and Mercurial

Chapter 11 - Zope, Mod_python and VPython

Remarkable Concepts & Fields of Computer Science

Table of Contents

Chapter 1 - Distributed Computing

Chapter 2 - Parallel Computing

Chapter 3 - Real-Time Computing and DNA Computing

Chapter 4 - Quantum Computer

Secure Communications

Table of Contents

Chapter 1 - Secure Communication

Chapter 2 - HTTP Secure

Chapter 3 - Computer Security

Chapter 4 - Secure Communications Interoperability Protocol and Secure Electronic Transaction

Chapter 5 - Data Breach, Secure Telephone and Secure Voice

Chapter 6 - Transport Layer Security

Chapter 7 - Information Security

Chapter 8 - STU-I, STU-II and STU-III

Chapter 9 - Cryptography

Table of Contents

Chapter 1 - Server

Chapter 2 - Web Server

Chapter 3 - Proxy Server

Chapter 4 - MUD

Chapter 5 - Message Transfer Agent

Chapter 6 - IRCd

Chapter 7 - Data Center

Chapter 8 - File Server

Chapter 9 - Home Server

Chapter 10 - Server Farm and Sound Server

Chapter 11 - Squeezebox Server and yDecode

Chapter 12 - Windows Home Server

Chapter 13 - yProxy and Communications Server

Chapter 14 - Load Balancing (Computing)

Chapter 15 - Common Gateway Interface

Table of Contents

Introduction

Chapter 1 - Canonical Protocol Pattern & Domain Inventory Pattern

Chapter 2 - Event-Driven SOA

Chapter 3 - Entity Abstraction Pattern & Event-Driven Messaging

Chapter 4 - Canonical Schema Pattern & Enterprise Inventory

Chapter 5 - Service Abstraction & Service (Systems Architecture)

Chapter 6 - Service Autonomy Principle & Service Layers Pattern

Chapter 7 - Service Loose Coupling & Service Discoverability Principle

Chapter 8 - Logic Centralization Pattern & Service Composability Principle

Chapter 9 - Utility Abstraction Pattern & Standardized Service Contract

Chapter 10 - Service-Oriented Programming

Chapter 11 - Service-Oriented Modeling

Chapter 12 - Service-Orientation Design Principles & Service-Oriented Architecture Types

Chapter 13 - Service-Oriented Architecture Implementation Framework

Software Architecture & Design Patterns in Software Engineering (Concepts and Applications)

Table of Contents

Chapter 1 - Architecture Description Language

Chapter 2 - Enterprise Architecture Frameworks

Chapter 3 - Event-Driven Architecture and Space-Based Architecture

Chapter 4 - Software Architect and Software Architectural Model

Chapter 5 - Functional Software Architecture and COLA (Software Architecture)

Chapter 6 - IEEE 1471 and Representational State Transfer

Chapter 7 - Design Pattern

Chapter 8 - Abstract Factory Pattern

Chapter 9 - Adapter Pattern

Chapter 10 - Balking Pattern & Builder Pattern

Chapter 11 - Bridge Pattern

Chapter 12 - Chain-of-Responsibility Pattern

Chapter 13 - Command Pattern

Chapter 14 - Composite Pattern

Chapter 15 - Decorator Pattern

Chapter 16 - Double-Checked Locking

Chapter 17 - Factory Method Pattern

Chapter 18 - Flyweight Pattern & Facade Pattern

Software Architecture & Design Patterns in Software Engineering (Concepts and Applications)

Chapter 19 - Interpreter Pattern

Chapter 20 - Mediator Pattern & Memento Pattern

Chapter 21 - Multiton Pattern

Chapter 22 - Null Object Pattern

Chapter 23 - Observer Pattern

Table of Contents

Introduction

Chapter 1 - Architecture Description Language

Chapter 2 - Enterprise Architecture Frameworks

Chapter 3 - Event-Driven Architecture and Space-Based Architecture

Chapter 4 - Software Architect and Software Architectural Model

Chapter 5 - Functional Software Architecture and COLA (Software Architecture)

Chapter 6 - IEEE 1471 and Representational State Transfer

Chapter 7 - Enterprise Service Bus

Chapter 8 - Design Pattern (Computer Science)

Software Design Engineering and Architecture (Concepts & Applications)

Table of Contents

Chapter 1 - Design Pattern (Computer Science)

Chapter 2 - Software Architecture

Chapter 3 - Data Modeling

Chapter 4 - Unified Modeling Language

Chapter 5 - Design Rationale

Chapter 6 - Domain–Driven Design

Chapter 7 - Object–Oriented Design

Chapter 8 - Structured Analysis

Chapter 9 - Shlaer–Mellor Method

Chapter 10 - Object–Oriented Analysis and Design

Chapter 11 - Architecture Description Language

Chapter 12 - Enterprise Architecture Frameworks

Chapter 13 - Event–Driven Architecture and Space–Based Architecture

Chapter 14 - Software Architect and Software Architectural Model

Chapter 15 - Functional Software Architecture and COLA (Software Architecture)

Chapter 16 - IEEE 1471 and Representational State Transfer

Table of Contents

Introduction

Chapter 1 - Design Pattern (Computer Science)

Chapter 2 - Software Architecture

Chapter 3 - Data Modeling

Chapter 4 - Unified Modeling Language

Chapter 5 - Design Rationale

Chapter 6 - Domain-Driven Design

Chapter 7 - Object-Oriented Design

Chapter 8 - Structured Analysis

Chapter 9 - Shlaer–Mellor Method

Chapter 10 - Object-Oriented Analysis and Design

Chapter 11 - Top-Down and Bottom-Up Design

Chapter 12 - COLA (Software Architecture)

Chapter 13 - Extended Enterprise Modeling Language

Software Development & Quality Handbook

Table of Contents

- Chapter 1 - Software Development Process
- Chapter 2 - Agile Software Development
- Chapter 3 - Formal Methods
- Chapter 4 - Best Coding Practices and Big Design Up Front
- Chapter 5 - CCU Delivery
- Chapter 6 - Scrum (Development)
- Chapter 7 - Software Architecture
- Chapter 8 - Software Design
- Chapter 9 - Software Development Methodology
- Chapter 10 - Software Maintenance
- Chapter 11 - Software Testing
- Chapter 12 - Software Quality
- Chapter 13 - Anti-Pattern
- Chapter 14 - Software Bug
- Chapter 15 - Fault-Tolerant System and Feature Interaction Problem
- Chapter 16 - Independent Software Verification and Validation & Software Assurance
- Chapter 17 - Software Rot
- Chapter 18 - Reverse Semantic Traceability

Table of Contents

- Chapter 1 - Software Development Process
- Chapter 2 - Agile Software Development
- Chapter 3 - Formal Methods
- Chapter 4 - Best Coding Practices and Big Design Up Front
- Chapter 5 - CCU Delivery
- Chapter 6 - Scrum (Development)
- Chapter 7 - Software Architecture
- Chapter 8 - Software Design
- Chapter 9 - Software Development Methodology
- Chapter 10 - Software Maintenance
- Chapter 11 - Software Testing
- Chapter 12 - Systems Development Life Cycle
- Chapter 13 - Goal-Driven Software Development Process
- Chapter 14 - Lean Software Development
- Chapter 15 - V-Model (Software Development)
- Chapter 16 - Test-Driven Development
- Chapter 17 - Revision Control
- Chapter 18 - Software Release Life Cycle

Table of Contents

Introduction

Chapter 1 - Rapid Application Development

Chapter 2 - Computer-Aided Software Engineering

Chapter 3 - Internationalization and Localization

Chapter 4 - Software Maintenance

Chapter 5 - Programming Tool

Chapter 6 - Software Documentation

Chapter 7 - Requirements Analysis

Chapter 8 - Software Project Management

Chapter 9 - Software Development Process

Chapter 10 - Aspect-Oriented Software Development

Chapter 11 - Fork (Software Development)

Chapter 12 - Software Quality

Chapter 13 - Software Design

Software Maintenance & Software Development

Table of Contents

Chapter 1 - Software Maintenance

Chapter 2 - Software Evolution

Chapter 3 - Software Brittleness & Software Archaeology

Chapter 4 - Program Slicing & Patch (Computing)

Chapter 5 - Software Rot & Backporting

Chapter 6 - Software Modernization

Chapter 7 - Legacy System

Chapter 8 - Extreme Programming

Chapter 9 - Agile Software Development

Chapter 10 - Dynamic Systems Development Method

Table of Contents

- Chapter 1 - Software Project Management
- Chapter 2 - Application Lifecycle Management and Baseline (Configuration Management)
- Chapter 3 - Software Development and Brownfield (Software Development)
- Chapter 4 - Dual Vee Model
- Chapter 5 - IBM Rational Unified Process
- Chapter 6 - Endeavour Software Project Management, Feature Creep and issue log
- Chapter 7 - Misuse Case
- Chapter 8 - Software Development Effort Estimation and MoSCoW Method
- Chapter 9 - Project Triangle and Planning Poker
- Chapter 10 - Rapid Application Development and Release Management
- Chapter 11 - Agile Software Development
- Chapter 12 - Extreme Programming
- Chapter 13 - Applied Agile Software Development
- Chapter 14 - Agilo for Scrum
- Chapter 15 - Feature Driven Development
- Chapter 16 - DevOps
- Chapter 17 - Lean Software Development
- Chapter 18 - Scrum (Development)

Software Project Management & Agile Software Development

Chapter 19 - Presenter First & Planning Poker

Chapter 20 - P–Modeling Framework

Chapter 21 - Test–Driven Development

Chapter 22 - Extreme Programming Practices

Table of Contents

Chapter 1 - Software Project Management

Chapter 2 - Application Lifecycle Management and Baseline (Configuration Management)

Chapter 3 - Agile Software Development

Chapter 4 - Software Development and Brownfield (Software Development)

Chapter 5 - Dual Vee Model

Chapter 6 - IBM Rational Unified Process

Chapter 7 - Endeavour Software Project Management, Feature Creep and issue log

Chapter 8 - Misuse Case

Chapter 9 - Software Development Effort Estimation and MoSCoW Method

Chapter 10 - Scrum (development)

Chapter 11 - Project Triangle and Planning Poker

Chapter 12 - Rapid Application Development and Release Management

Chapter 13 - Use Case

Chapter 14 - V-Model

Table of Contents

Chapter 1 - Software Quality

Chapter 2 - Anti-Pattern

Chapter 3 - Software Bug

Chapter 4 - Fault-Tolerant System and Feature Interaction Problem

Chapter 5 - Independent Software Verification and Validation and Software Assurance

Chapter 6 - Software Rot

Chapter 7 - Reverse Semantic Traceability

Chapter 8 - Sneak Circuit Analysis and Verification and Validation (Software)

Chapter 9 - Software Security Assurance

Chapter 10 - Algorithmic Efficiency

Chapter 11 - Quality Assurance

Chapter 12 - Load Testing

Chapter 13 - Trent Accreditation Scheme

Chapter 14 - QCReporting and Software Assurance

Chapter 15 - Software Testing

Chapter 16 - Software Performance Testing

Chapter 17 - Graphical user Interface Testing

Chapter 18 - Evidence-based Medicine

Table of Contents

Chapter 1 - Software Quality

Chapter 2 - Anti-Pattern

Chapter 3 - Software Bug

Chapter 4 - Fault-Tolerant System and Feature Interaction Problem

Chapter 5 - Independent Software Verification and Validation and Software Assurance

Chapter 6 - Software Rot

Chapter 7 - Reverse Semantic Traceability

Chapter 8 - Sneak Circuit Analysis and Verification and Validation (Software)

Chapter 9 - Software Security Assurance

Chapter 10 - Algorithmic Efficiency

Chapter 11 - Application Security and Software Portability

Chapter 12 - Software Testing

Table of Contents

Chapter 1 - Dynamic Systems Development Method

Chapter 2 - Application Software

Chapter 3 - Component-based Software Engineering

Chapter 4 - Event Partitioning and Fault-Tolerant System

Chapter 5 - Secure Error Messages in Software Systems and Systems Development Life Cycle

Chapter 6 - Word Processor

Chapter 7 - Web Search Engine

Table of Contents

Chapter 1 - Software Testing

Chapter 2 - Application Programming Interface and Code Coverage

Chapter 3 - Fault Injection and Mutation Testing

Chapter 4 - Exploratory Testing, Fuzz Testing and Equivalence Partitioning

Chapter 5 - Unit Testing and Integration Testing

Chapter 6 - GUI Software Testing and Software Performance Testing

Chapter 7 - Regression Testing and Acceptance Testing

Chapter 8 - Component-Based Software Engineering

Chapter 9 - Flow-based Programming

Chapter 10 - Pipeline (Software)

Chapter 11 - DirectSound

Chapter 12 - Common Object Request Broker Architecture

Chapter 13 - Component Object Model

Chapter 14 - Dependency Injection

Table of Contents

Introduction to SQL

Chapter 1 - Metadata

Chapter 2 - Relational Database

Chapter 3 - MySQL

Chapter 4 - Flat File Database & LAMP (Software Bundle)

Chapter 5 - Application Programming Interface

Chapter 6 - Java Database Connectivity

Chapter 7 - Open Database Connectivity

Chapter 8 - Database Transaction

Chapter 9 - Insert & Select (SQL)

Chapter 10 - Join (SQL)

Chapter 11 - Set Operations (SQL)

Table of Contents

Introduction

Chapter 1 - Event Partitioning & Data Flow Diagram

Chapter 2 - Control-Feedback-Abort Loop

Chapter 3 - Functional Flow Block Diagram

Chapter 4 - IDEF0 & IDEF1X

Chapter 5 - IDEF3 & IDEF5

Chapter 6 - Control Flow Diagram

Chapter 7 - Policy Analysis

Chapter 8 - Problem Frames Approach

Chapter 9 - Semantic Data Model

Types and Applications of Internet Hosting Service

Table of Contents

Chapter 1 - Dedicated Hosting Service

Chapter 2 - Virtual Private Server

Chapter 3 - Web Hosting Service

Chapter 4 - File Hosting Service

Chapter 5 - Free Web Hosting Service and Reseller Web Hosting

Chapter 6 - Domain Name System

Chapter 7 - Domain Name and Domain Name Registry

Chapter 8 - IP Address

Unsolved Problems in Computer Science

Table of Contents

Chapter 1 - P Versus NP Problem

Chapter 2 - One-Way Function

Chapter 3 - Aanderaa–Karp–Rosenberg Conjecture

Chapter 4 - Computational Complexity of Mathematical Operations

Chapter 5 - NC (Complexity), POPLmark Challenge and Unique Games Conjecture

Chapter 6 - NP-Complete

Chapter 7 - Complexity Class

Chapter 8 - Subset Sum Problem

Chapter 9 - Travelling Salesman Problem

Chapter 10 - Graph Isomorphism Problem

Chapter 11 - Boolean Satisfiability Problem

Chapter 12 - Reduction (Complexity)

User Interaction Techniques in Computing

Table of Contents

Chapter 1 - Interaction Technique

Chapter 2 - Alt-Tab

Chapter 3 - Balloon Help & Clipboard (Software)

Chapter 4 - Command-Line Completion

Chapter 5 - Command-Line Interface

Chapter 6 - Cursor (Computers)

Chapter 7 - Cut, Copy, and Paste

Chapter 8 - Desktop Metaphor

Chapter 9 - Double-Click & Drag-and-Drop

Chapter 10 - Keyboard Shortcut

Chapter 11 - Multiple Document Interface

Chapter 12 - Point-and-Click & Scroll wheel

Chapter 13 - Virtual Desktop & Virtual Keyboard

Chapter 14 - Zooming User Interface & Voice User Interface

Chapter 15 - WIMP (Computing) & Virtual Reality

Version History of Important Softwares

Table of Contents

Chapter 1 - Adobe Photoshop Release History

Chapter 2 - GIMP Release History and History of Inform Releases

Chapter 3 - iOS Version History

Chapter 4 - Java EE Version History and Java Version History

Chapter 5 - Safari Version History

Chapter 6 - Yahoo! Messenger Release History

Vocations in Computer Science

Table of Contents

Chapter 1 - Programmer

Chapter 2 - Software Architect

Chapter 3 - Software Developer

Chapter 4 - Software Testing

Chapter 5 - Software Engineer

Table of Contents

Chapter 1 - Web Browser

Chapter 2 - Blog Software

Chapter 3 - Web Application

Chapter 4 - Template Engine (Web)

Chapter 5 - Web Crawler

Chapter 6 - Web Search Engine

Chapter 7 - Web Server

Chapter 8 - Content-Control Software

Chapter 9 - Internet Information Services

Chapter 10 - Search Engine Optimization

Windows Security Technology

(Technology for Operating Systems)

Table of Contents

Chapter 1 - Access Token and BitLocker Drive Encryption

Chapter 2 - Code Access Security and CryptGenRandom

Chapter 3 - Microsoft CryptoAPI and Data Protection API

Chapter 4 - Data Execution Prevention and Encrypting File System

Chapter 5 - Windows Firewall

Chapter 6 - Kernel Patch Protection and LM hash

Chapter 7 - Mandatory Integrity Control and Windows Action Center

Chapter 8 - NTLM and Rights Management Services

Chapter 9 - Security Identifier and Security Support Provider Interface

Chapter 10 - Security and Safety Features New to Windows Vista

Chapter 11 - User Account Control and Windows Defender

World Wide Web, Web Accessibility and Services

Table of Contents

Chapter 1 - World Wide Web

Chapter 2 - History of the World Wide Web

Chapter 3 - Web Accessibility

Chapter 4 - Internationalization and Localization

Chapter 5 - Web Search Engine

Chapter 6 - Web Services
