

# A Comprehensive Introduction to Pressure (Fundamental Physics Concept)

## Table of Contents

Chapter 1 - Introduction to Pressure

Chapter 2 - Pressure Measurement

Chapter 3 - Vapor Pressure

Chapter 4 - Partial Pressure

Chapter 5 - Pressure Sensor and Atmospheric Pressure

Chapter 6 - Sound Pressure and Vacuum

Chapter 7 - Pressure Vessel

Chapter 8 - Center of Pressure

## A Comprehensive Introduction to Special Relativity

# Table of Contents

Chapter 1 - Introduction to Special Relativity

Chapter 2 - Mass-Energy Equivalence

Chapter 3 - Mass in Special Relativity

Chapter 4 - Consequences of Special Relativity & Important Concepts of  
Special Relativity

Chapter 5 - Lorentz Transformation

Chapter 6 - Velocity-Addition Formula

# A Comprehensive Introduction to Ultraviolet Radiation

## Table of Contents

Chapter 1 - Introduction to Ultraviolet Radiation

Chapter 2 - Health-related Effects of UV Radiation

Chapter 3 - Astronomical Ultraviolet Source

Chapter 4 - Dye-sensitized Solar Cell and Extreme Ultraviolet

Chapter 5 - Sunburn

Chapter 6 - Ultraviolet Index

## Acoustics & its Applications

# Table of Contents

Chapter 1 - Introduction to Acoustics

Chapter 2 - Ocean Acoustic Tomography and Wave Equation

Chapter 3 - Underwater Acoustics

Chapter 4 - Acoustic Metamaterials

Chapter 5 - Musical Acoustic

## Acoustics Engineering & Oceanography

# Table of Contents

Chapter 1 - Acoustics

Chapter 2 - Underwater Acoustics

Chapter 3 - Ocean Acoustic Tomography

Chapter 4 - Acoustic Wave Equation

Chapter 5 - Acoustic Impedance & Acoustic Emission

Chapter 6 - Acoustic Tag & Acoustic Streaming

Chapter 7 - Structural Acoustics

Chapter 8 - Acoustic Location

Chapter 9 - Reflection Seismology

Chapter 10 - Acoustic Resonance

Chapter 11 - Acoustic Theory

## Table of Contents

Chapter 1 - Acoustics

Chapter 2 - Acoustic Wave Equation

Chapter 3 - Acoustic Impedance & Acoustic Emission

Chapter 4 - Acoustic Tag & Acoustic Streaming

Chapter 5 - Structural Acoustics

Chapter 6 - Acoustic Location

Chapter 7 - Reflection Seismology

Chapter 8 - Acoustic Resonance

Chapter 9 - Acoustic Theory

Chapter 10 - Introduction to Underwater Acoustics

Chapter 11 - Applications of Underwater Acoustics

Chapter 12 - Ocean Acoustic Tomography

Chapter 13 - SOFAR Channel and Echo Sounding

## Advanced Experimental Physics

# Table of Contents

Chapter 1 - Experimental Physics

Chapter 2 - Experimental Techniques

Chapter 3 - Bell Test Experiments

Chapter 4 - Double-slit Experiment

Chapter 5 - Gravity Probe A and B

Chapter 6 - Wilkinson Microwave Anisotropy Probe

Chapter 7 - Prominent Experimental Physics Projects

# Advanced Fundamental Interactions in Physics

## Table of Contents

Chapter 1 - Introduction to Fundamental Interaction

Chapter 2 - Electromagnetism

Chapter 3 - Weak and Strong Interactions

Chapter 4 - Electroweak Interaction

Chapter 5 - Gravitation

## Advanced Gravitational Physics

# Table of Contents

Chapter 1 - History of Gravitational Theory

Chapter 2 - Newton's Law of Universal Gravitation

Chapter 3 - General Relativity

Chapter 4 - Alternatives to General Relativity

Chapter 5 - Graviton and Quantum Gravity

Chapter 6 - Gravity of Earth

Chapter 7 - Gravitation Wave

## Advanced Mechanics (Important Branch of Physics)

# Table of Contents

Chapter 1 - Introduction to Mechanics

Chapter 2 - History of Classical and Quantum Mechanics

Chapter 3 - Classical Mechanics

Chapter 4 - Hamiltonian Mechanics

Chapter 5 - Lagrangian Mechanics

Chapter 6 - Orbital Mechanics

Chapter 7 - Quantum Mechanics

Chapter 8 - Rigid Body and Moment of Inertia

Chapter 9 - Kinematics

## Advanced Nuclear Physics

# Table of Contents

Introduction

Chapter 1 - Semi-empirical Mass Formula and Nuclear Shell Model

Chapter 2 - Radioactive Decay

Chapter 3 - Nuclear Fusion

Chapter 4 - Nuclear Fission

Chapter 5 - Nucleon

Chapter 6 - Isotope

Chapter 7 - Nuclear Power

## Advanced Thermodynamics

# Table of Contents

Chapter 1 - Thermodynamics

Chapter 2 - Chemical Thermodynamics

Chapter 3 - Statistical Thermodynamics

Chapter 4 - Thermodynamic System and Equilibrium

Chapter 5 - Thermodynamic Process

Chapter 6 - Thermal Conductivity

Chapter 7 - Thermoelectric Effect

## Advances in Nuclear Power

# Table of Contents

Chapter 1 - Introduction to Nuclear Power

Chapter 2 - Nuclear Reactor Technology

Chapter 3 - Nuclear Fuel

Chapter 4 - Nuclear Chain Reaction

Chapter 5 - Nuclear Reprocessing

Chapter 6 - Radioactive Waste

Chapter 7 - Nuclear Proliferation

Chapter 8 - Nuclear Energy Policy

Chapter 9 - Nuclear Power Debate

# An Introduction to Acoustics

## Table of Contents

<b>Preface</b>	<b>VII</b>
<b>Chapter 1</b> <b>Introduction to Acoustics</b>	<b>1</b>
• Acoustics	1
• Mechanical Wave	9
<b>Chapter 2</b> <b>Branches of Acoustics</b>	<b>19</b>
• Aeroacoustics	19
• Architectural Acoustics	22
• Musical Acoustics	24
• Nonlinear Acoustics	28
• Bioacoustics	32
• Underwater Acoustics	35
• Fisheries Acoustics	44
• Archaeoacoustics	47
• Physical Acoustics	50
<b>Chapter 3</b> <b>Fundamental Concepts of Acoustics</b>	<b>52</b>
• Acoustic Wave Equation	52
• Fluid	56
• P-Wave	57
• Acoustic Holography	60
• Diffraction	60
• Reflection (Physics)	73
<b>Chapter 4</b> <b>Essential Aspects of Acoustics</b>	<b>80</b>
• Vibration	80
• Sound	94
• Ultrasound	102
• Infrasound	113
<b>Chapter 5</b> <b>Transduction in Acoustics</b>	<b>119</b>
• Transducer	119
• Loudspeaker	120
• Microphone	145
• Hydrophone	167
<b>Chapter 6</b> <b>Principles and Applications of Transduction</b>	<b>170</b>
• Electromagnetism	170
• Electrostatics	177
• Piezoelectricity	185
• Sound Reinforcement System	200

# An Introduction to Acoustics

## Chapter 7 Wave Propagation: Pressure Levels

- |                                   |     |
|-----------------------------------|-----|
| • Sound Pressure                  | 219 |
| • Absolute Threshold of Hearing   | 224 |
| • Interference (Wave Propagation) | 231 |

**Index**

## An Introduction to Fluid Mechanics

# Table of Contents

Chapter 1 - Fluid Mechanics

Chapter 2 - Navier–Stokes Equations

Chapter 3 - Fluid Dynamics

Chapter 4 - Fluid Power and Capillary Surface

Chapter 5 - Viscosity

Chapter 6 - Compressible Flow

Chapter 7 - Incompressible Flow

Chapter 8 - Rayleigh Number

Chapter 9 - Shell Balance and Simple Shear

# Table of Contents

Chapter 1 - Accelerator Physics & Agrophysics

Chapter 2 - Biophysics & Medical Physics

Chapter 3 - Geophysics

Chapter 4 - Optical Fiber

Chapter 5 - Metrology

Chapter 6 - Plasma (Physics)

Chapter 7 - Microfluidics

Chapter 8 - Petrophysics

Chapter 9 - Astrophysics

## Atmospheric Dynamics and Thermodynamics

# Table of Contents

- Chapter 1 - Atmospheric Tide
- Chapter 2 - Brunt–Väisälä Frequency, Baroclinity and Buys Ballot's Law
- Chapter 3 - Clear-air Turbulence
- Chapter 4 - Coriolis Effect
- Chapter 5 - Cyclogenesis
- Chapter 6 - Jet Stream
- Chapter 7 - Kelvin Wave and Gravity Wave
- Chapter 8 - Low-pressure Area
- Chapter 9 - Atmospheric Thermodynamics
- Chapter 10 - Adiabatic Process
- Chapter 11 - Atmospheric Pressure
- Chapter 12 - Convective Available Potential Energy
- Chapter 13 - Lapse Rate and Heat Index
- Chapter 14 - Relative Humidity
- Chapter 15 - Standard Conditions for Temperature and Pressure
- Chapter 16 - Psychrometrics
- Chapter 17 - Carnot Cycle
- Chapter 18 - Pressure
- Chapter 19 - Density of Air and Atmospheric Convection

## Atmospheric Dynamics

# Table of Contents

Chapter 1 - Atmospheric Tide

Chapter 2 - Brunt–Väisälä Frequency, Baroclinity and Buys Ballot's Law

Chapter 3 - Clear-air Turbulence

Chapter 4 - Coriolis Effect

Chapter 5 - Cyclogenesis

Chapter 6 - Jet Stream

Chapter 7 - Kelvin Wave and Gravity Wave

Chapter 8 - Low-pressure Area

Chapter 9 - Madden–Julian Oscillation

Chapter 10 - Outflow Boundary

Chapter 11 - Vorticity

# **Atmospheric Physics & Thermodynamics (Concepts and Applications)**

## **Table of Contents**

Chapter 1 - Atmospheric Physics & Remote Sensing

Chapter 2 - Cloud Physics

Chapter 3 - Atmospheric Electricity

Chapter 4 - Atmospheric Thermodynamics

Chapter 5 - Adiabatic Process

Chapter 6 - Atmospheric Pressure

Chapter 7 - Convective Available Potential Energy

Chapter 8 - Lapse Rate and Heat Index

Chapter 9 - Relative Humidity

Chapter 10 - Standard Conditions for Temperature and Pressure

Chapter 11 - Psychrometrics

Chapter 12 - Carnot Cycle

Chapter 13 - Pressure

# Table of Contents

Chapter 1 - Atmospheric Thermodynamics

Chapter 2 - Adiabatic Process

Chapter 3 - Atmospheric Pressure

Chapter 4 - Convective Available Potential Energy

Chapter 5 - Lapse Rate and Heat Index

Chapter 6 - Relative Humidity

Chapter 7 - Standard Conditions for Temperature and Pressure

Chapter 8 - Psychrometrics

Chapter 9 - Carnot Cycle

Chapter 10 - Pressure

Chapter 11 - Density of Air and Atmospheric Convection

Chapter 12 - Dew Point

Chapter 13 - Clausius–Clapeyron Relation and Lifted Condensation Level

Chapter 14 - Wind Chill and Radiosonde

# Table of Contents

Chapter 1 - Atom

Chapter 2 - Atomic Theory

Chapter 3 - Single Atoms

Chapter 4 - Bohr Model

Chapter 5 - Atomic Orbital

Chapter 6 - Free Electron Model

Chapter 7 - Electronic Band Structure

Chapter 8 - Density Functional Theory

Chapter 9 - Nearly-free Electron Model and Drude Model

Chapter 10 - Noble Gas

## Table of Contents

<b>Preface</b>	<b>VII</b>
<b>Chapter 1 Introduction to Atomic Physics</b>	<b>1</b>
<b>Chapter 2 Atom: An Integrated Study</b>	<b>4</b>
i. Atom	4
ii. Atomic Number	25
iii. Subatomic Particle	29
iv. Atomic Orbital	32
v. Atomic Mass	52
vi. Atomic Radius	59
<b>Chapter 3 Atomic Theory and Models</b>	<b>65</b>
i. Atomic Theory	65
ii. Atomism	72
iii. Plum Pudding Model	84
iv. Geiger–Marsden Experiment	87
v. Rutherford Model	99
vi. Bohr Model	103
<b>Chapter 4 Atomic Nucleus and its Structure</b>	<b>118</b>
i. Atomic Nucleus	118
ii. Nuclear Structure	125
iii. Semi-empirical Mass Formula	134
iv. Nuclear Shell Model	142
v. Nuclear Force	149
vi. Nuclear Magnetic Moment	157
<b>Chapter 5 Spectral Line: A Comprehensive Study</b>	<b>159</b>
i. Spectral Line	159
ii. Emission Spectrum	164
iii. Selection Rule	169
iv. Forbidden Mechanism	173
v. Doppler Broadening	177
vi. Zeeman Effect	179
vii. Stark Effect	187
viii. Hydrogen Spectral Series	192
<b>Chapter 6 Understanding Angular Momentum Coupling</b>	<b>198</b>
i. Angular momentum coupling	198
ii. Spin (Physics)	203
iii. Spin Quantum Number	218
iv. Electron Magnetic Moment	223

# Atomic physics

v. Spin-orbit Interaction	229
vi. J-coupling	236
vii. Fine Structure	238
viii. Hyperfine Structure	244

<b>Chapter 7 Scattering: An Overview</b>	<b>252</b>
i. Scattering	252
ii. Raman Scattering	256
iii. Rayleigh Scattering	262
iv. Rutherford Scattering	267
v. Compton Scattering	270
vi. Small-angle Scattering	277
vii. Scattering Theory	280

## Permissions

## Index

# Table of Contents

Chapter 1 - Atom

Chapter 2 - Ion

Chapter 3 - Electron

Chapter 4 - Proton

Chapter 5 - Neutron

Chapter 6 - Atomic Orbital

Chapter 7 - Molecular Orbital

Chapter 8 - Chemical Element

Chapter 9 - Atomic Theory

Chapter 10 - Single Atoms

Chapter 11 - Bohr Model

Chapter 12 - Free Electron Model

Chapter 13 - Electronic Band Structure

Chapter 14 - Density Functional Theory

Chapter 15 - Nearly-free Electron Model and Drude Model

## **Basic and Condensed Matter Physics (Concepts and Applications)**

### **Table of Contents**

Chapter 1 - Structure of Matter

Chapter 2 - Phase (matter) and Antimatter

Chapter 3 - Other Important Types of Matter

Chapter 4 - Matter Wave and Hadron

Chapter 5 - Condensed Matter Physics

Chapter 6 - Crystal Structure

Chapter 7 - Non-Crystalline Solids

Chapter 8 - Soft Matter

# **Basic Concepts, Elements and Applications of General Relativity**

## **Table of Contents**

Chapter 1 - Introduction to General Relativity

Chapter 2 - History of General Relativity

Chapter 3 - Einstein's Field Equations and Mathematics of General Relativity

Chapter 4 - Two-Body Problem in General Relativity

Chapter 5 - Geodetic Precession and Frame-Dragging

Chapter 6 - Special Relativity

Chapter 7 - Consequences of Special Relativity

Chapter 8 - Equivalence Principle

Chapter 9 - World Line

Chapter 10 - Gravitational Wave

Chapter 11 - Geodetic Effect

## Basic Physics

# Table of Contents

Chapter 1 - Mechanics and Electromagnetism

Chapter 2 - Statistical Mechanics and Thermodynamics

Chapter 3 - Quantum Mechanics and Theory of Relativity

Chapter 4 - Optics

## Basic Properties and Concepts of Particle Physics

# Table of Contents

Chapter 1 - Maxwell–Boltzmann Statistics

Chapter 2 - Fermi–Dirac Statistics

Chapter 3 - Pauli Exclusion Principle

Chapter 4 - Uncertainty Principle

Chapter 5 - Spin (Physics)

Chapter 6 - Bose–Einstein statistics

Chapter 7 - Spin Network

Chapter 8 - Spin–Statistics Theorem

Chapter 9 - Introduction to Particle Physics

Chapter 10 - Subatomic Particle and Standard Model

Chapter 11 - Elementary Particle and Strong Interaction

Chapter 12 - Magnetic Monopole

Chapter 13 - Meson and Boson

## Basic Quantities and Constants in Physics

# Table of Contents

Chapter 1 - Electric Displacement Field

Chapter 2 - Magnetic Field

Chapter 3 - Magnetic Monopole

Chapter 4 - Vacuum Permittivity

Chapter 5 - Electric Field

Chapter 6 - Displacement Current

Chapter 7 - Electric Potential

Chapter 8 - Magnetic Potential

Chapter 9 - Permittivity

Chapter 10 - Permeability (Electromagnetism)

Chapter 11 - Scalar Potential

Chapter 12 - Speed of Light

## **Basic Quantities, Constants and Fundamental Interactions in Physics**

# **Table of Contents**

Chapter 1 - Electric Displacement Field

Chapter 2 - Magnetic Field

Chapter 3 - Magnetic Monopole

Chapter 4 - Vacuum Permittivity

Chapter 5 - Electric Field

Chapter 6 - Displacement Current

Chapter 7 - Electric Potential

Chapter 8 - Magnetic Potential

Chapter 9 - Permittivity

Chapter 10 - Introduction to Fundamental Interaction

Chapter 11 - Electromagnetism

Chapter 12 - Weak and Strong Interactions

Chapter 13 - Electroweak Interaction

# Table of Contents

- Chapter 1 - Bending
- Chapter 2 - Euler–Bernoulli Beam Equation
- Chapter 3 - Stress (Mechanics)
- Chapter 4 - Shear Stress
- Chapter 5 - Timoshenko Beam Theory
- Chapter 6 - Plasticity (Physics)
- Chapter 7 - Plastic Deformation in Solids
- Chapter 8 - Tsai–Wu Failure Criterion
- Chapter 9 - Fracture
- Chapter 10 - Viscoplasticity
- Chapter 11 - Mohr–Coulomb Theory
- Chapter 12 - Drucker Prager Yield Criterion

## Branches of Thermodynamics

# Table of Contents

Chapter 1 - Chemical Thermodynamics

Chapter 2 - Atmospheric Thermodynamics

Chapter 3 - Equilibrium Thermodynamics & Non-Equilibrium Thermodynamics

Chapter 4 - Thermochemistry

Chapter 5 - Thermal fluids

Chapter 6 - Second Law of Thermodynamics

## **Centrifugal Force and Important Concepts of Fictitious Forces (Introductory Physics Concepts)**

# **Table of Contents**

Chapter 1 - Reactive Centrifugal Force

Chapter 2 - Centrifugal Force (Rotating reference frame)

Chapter 3 - Absolute Rotation

Chapter 4 - History of Centrifugal and Centripetal Forces

Chapter 5 - Frame of Reference

# Table of Contents

Chapter 1 - Chemical Physics and Physical Chemistry

Chapter 2 - Molecular Dynamics

Chapter 3 - Quantum Chemistry

Chapter 4 - Solid-state Physics

Chapter 5 - Intermolecular Force

# Table of Contents

Chapter 1 - Classical Mechanics

Chapter 2 - Kinematics

Chapter 3 - Velocity and Speed

Chapter 4 - Acceleration

Chapter 5 - Newton's Laws of Motion

Chapter 6 - Potential Energy

Chapter 7 - Hamiltonian Mechanics

Chapter 8 - Lagrangian Mechanics

Chapter 9 - Continuum Mechanics

Chapter 10 - Fluid Mechanics

Chapter 11 - Stress (Mechanics)

Chapter 12 - Deformation (Mechanics)

Chapter 13 - Finite Strain Theory

Chapter 14 - Peridynamics

## Classical Mechanics

# Table of Contents

Chapter 1 - Classical Mechanics

Chapter 2 - Kinematics

Chapter 3 - Velocity and Speed

Chapter 4 - Acceleration

Chapter 5 - Newton's Laws of Motion

Chapter 6 - Potential Energy

Chapter 7 - Hamiltonian Mechanics

Chapter 8 - Lagrangian Mechanics

Chapter 9 - Continuum Mechanics

Chapter 10 - Kinetic Energy

## Classical Physics

# Table of Contents

Chapter 1 - Thermodynamics

Chapter 2 - Electromagnetism

Chapter 3 - Classical Mechanics

Chapter 4 - Solid Mechanics

Chapter 5 - Fluid Mechanics

Chapter 6 - Acoustics

Chapter 7 - Optics

## Table of Contents

- Chapter 1 - Cow Magnet, Dipole Magnet and Molecule-Based Magnets
- Chapter 2 - Magnet
- Chapter 3 - Neodymium Magnet
- Chapter 4 - Plastic Magnet, Programmable Magnet and Quadrupole Magnet
- Chapter 5 - Rare-Earth Magnet
- Chapter 6 - Refrigerator Magnet
- Chapter 7 - Samarium-Cobalt Magnet
- Chapter 8 - Single-Molecule Magnet
- Chapter 9 - Superconducting Magnet
- Chapter 10 - Magnetic Circuit
- Chapter 11 - Electromagnet
- Chapter 12 - Magnetic Core
- Chapter 13 - Electric Motor
- Chapter 14 - Magnetic Refrigeration

# Collision and Introductory Physics Concepts

## Table of Contents

Chapter 1 - Elastic and Inelastic Collision

Chapter 2 - Kinetic and Internal Energy

Chapter 3 - Collision Detection

Chapter 4 - Diffraction

## Combustion Process and its Applications

# Table of Contents

Chapter 1 - Introduction to Combustion

Chapter 2 - Heat of Combustion

Chapter 3 - Flue Gas Stack

Chapter 4 - Flashover and Flash Point

Chapter 5 - Flammability Limit

Chapter 6 - Dynamic Combustion Chamber, Flammability Diagram,  
Limiting Oxygen Concentration

Chapter 7 - Flame and Smoulder

## Components, Laws and Concepts of Electromagnetism

# Table of Contents

Chapter 1 - Magnetic Flux

Chapter 2 - Faraday's Law of Induction

Chapter 3 - Gauss's Law for Magnetism

Chapter 4 - Magnetic Field

Chapter 5 - Magnetic Moment

Chapter 6 - Force Between Magnetic

Chapter 7 - Electromagnet

## Table of Contents

Chapter 1 - Photon

Chapter 2 - Bose Gas and Bose–Einstein Statistics

Chapter 3 - Stimulated Emission

Chapter 4 - Quantum Field Theory

Chapter 5 - Gauge Theory

Chapter 6 - Photon Polarization

## Concepts of Mechanical Vibrations and Pendulum in Physics

# Table of Contents

Chapter 1 - Vibration

Chapter 2 - Molecular Vibration

Chapter 3 - Damping

Chapter 4 - Bushing (Isolator) and Balancing of Rotating Masses

Chapter 5 - Effective Mass (Spring-Mass System) and Statistical Energy Analysis

Chapter 6 - Mechanical Resonance

Chapter 7 - Noise, Vibration, and Harshness

Chapter 8 - Torsional Vibration and Vibrating String

Chapter 9 - Vibration Isolation

Chapter 10 - Pendulum

Chapter 11 - Gridiron Pendulum and Kater's Pendulum

Chapter 12 - Ballistic Pendulum

Chapter 13 - Conical Pendulum and Doubochinski's Pendulum

Chapter 14 - Foucault Pendulum

Chapter 15 - Foucault Pendulum Vector Diagrams

## Concepts, Elements and Devices in Optics

# Table of Contents

Chapter 1 - Optical Aberration

Chapter 2 - Dispersion

Chapter 3 - Important Concepts in Optics

Chapter 4 - Focal Length and Cardinal Point

Chapter 5 - Hyperfocal Distance

Chapter 6 - Refractive Index

Chapter 7 - Reflecting Telescope and Refracting Telescope

## Condensed Matter Physics & its Applications

# Table of Contents

Chapter 1 - Condensed Matter Physics

Chapter 2 - Crystal Structure

Chapter 3 - Non-Crystalline Solids

Chapter 4 - Soft Matter

Chapter 5 - Nanotechnology

## Conservation Laws in Physics

# Table of Contents

Chapter 1 - Conservation of Energy

Chapter 2 - Conservation of Mass

Chapter 3 - Charge Conservation

Chapter 4 - Mass–Energy Equivalence

Chapter 5 - Momentum

Chapter 6 - Parity (Physics)

Chapter 7 - Angular Momentum

Chapter 8 - Probability Current

Chapter 9 - Noether's Theorem

# **Continuum and Solid Mechanics (Concepts and Applications)**

## **Table of Contents**

Chapter 1 - Continuum Mechanics

Chapter 2 - Fluid Mechanics

Chapter 3 - Stress (Mechanics)

Chapter 4 - Deformation (Mechanics)

Chapter 5 - Finite Strain Theory

Chapter 6 - Peridynamics

Chapter 7 - Viscoelasticity

Chapter 8 - Plasticity

Chapter 9 - Fracture Mechanics

Chapter 10 - Bending

Chapter 11 - Failure Theory (Material)

Chapter 12 - Hooke's Law

# Convection Movement in Fluid Dynamics (Concepts and Applications)

## Table of Contents

Chapter 1 - Convection

Chapter 2 - Natural Convection

Chapter 3 - Fin (extended surface)

Chapter 4 - Grashof Number

Chapter 5 - Heat Transfer Coefficient

Chapter 6 - Nusselt Number

Chapter 7 - Solar Chimney

Chapter 8 - Rayleigh-Bénard Convection and Marangoni Effect

Chapter 9 - Mantle Convection and Rayleigh Number

Chapter 10 - Atmospheric Circulation

Chapter 11 - Thermosiphon and Advection

Chapter 12 - Stack Effect and Convection Cell

Chapter 13 - Thermohaline Circulation and Churchill–Bernstein Equation

## Convection Movement, Equations and Applications of Fluid Dynamics

# Table of Contents

Chapter 1 - Convection

Chapter 2 - Natural Convection

Chapter 3 - Fin (extended surface)

Chapter 4 - Grashof Number

Chapter 5 - Heat Transfer Coefficient

Chapter 6 - Nusselt Number

Chapter 7 - Solar Chimney

Chapter 8 - Rayleigh-Bénard Convection and Marangoni Effect

Chapter 9 - Mantle Convection and Rayleigh Number

Chapter 10 - Atmospheric Circulation

Chapter 11 - Bernoulli's Principle

Chapter 12 - Benedict–Webb–Rubin Equation

Chapter 13 - Continuity Equation

Chapter 14 - Camassa–Holm Equation

Chapter 15 - Darcy Friction Factor Formulae

Chapter 16 - Euler Equations (Fluid Dynamics)

Chapter 17 - Derivation of the Navier–Stokes Equations

Chapter 18 - Navier–Stokes Equations

Chapter 19 - Orr–Sommerfeld Equation

## Convection Movement, Equations and Applications of Fluid Dynamics

Chapter 20 - Mild-Slope Equation

Chapter 21 - Morison Equation

## Density Physics

# Table of Contents

Chapter 1 - Introduction to Density

Chapter 2 - Density Functional Theory

Chapter 3 - Density Matrix

Chapter 4 - Density of States

Chapter 5 - Energy Density

Chapter 6 - Spectral Density

Chapter 7 - Relative Density

## Dielectrics and Basic Concepts in Optics

# Table of Contents

Chapter 1 - Dielectric

Chapter 2 - Permittivity

Chapter 3 - Basic Concepts in Optics

Chapter 4 - Applications of Dielectrics

Chapter 5 - High-k Dielectric and Low-k Dielectric

Chapter 6 - Ellipsometry and Dielectric Gas

## **Diffraction (Fundamental Physics Concept)**

# **Table of Contents**

Chapter 1 - Diffraction

Chapter 2 - Diffraction Formalism

Chapter 3 - Airy Disk

Chapter 4 - Neutron Diffraction and Electron Diffraction

Chapter 5 - Coherence

Chapter 6 - Fraunhofer and Fresnel Diffraction

Chapter 7 - Powder Diffraction

## **Diffraction and Polarization Physics**

# **Table of Contents**

Chapter 1 - Diffraction

Chapter 2 - Diffraction Formalism

Chapter 3 - Airy Disk

Chapter 4 - Neutron Diffraction and Electron Diffraction

Chapter 5 - Coherence

Chapter 6 - Polarization (Waves)

Chapter 7 - Photon Polarization

Chapter 8 - Circular Polarization

## Table of Contents

Chapter 1 - Diffraction

Chapter 2 - Diffraction Formalism

Chapter 3 - Airy Disk

Chapter 4 - Neutron Diffraction and Electron Diffraction

Chapter 5 - Coherence

Chapter 6 - Fraunhofer and Fresnel Diffraction

Chapter 7 - Doppler Effect

Chapter 8 - Wave Power

Chapter 9 - Double-Slit Experiment

Chapter 10 - Group Velocity

Chapter 11 - Lamb Waves

Chapter 12 - Longitudinal Wave

Chapter 13 - Phase (Waves)

Chapter 14 - Wave Packet

Chapter 15 - Wave Vector

Chapter 16 - Wave Propagation & Wave Impedance

## Diverse Forms of Energy

# Table of Contents

Chapter 1- Potential Energy

Chapter 2 - Elastic Energy

Chapter 3 - Kinetic Energy

Chapter 4 - Thermal Energy

Chapter 5 - Geothermal Energy

Chapter 6 - Electric Potential Energy

Chapter 7 - Nuclear Power

Chapter 8 - Surface Energy

Chapter 9 - Dark Energy

Chapter 10 - Solar Energy

## Table of Contents

- Chapter 1 - Gravitational Lens
- Chapter 2 - Dynamical Friction and Einstein Ring
- Chapter 3 - Frame-Dragging
- Chapter 4 - Gravitational Induction and Gravitational Lensing Formalism
- Chapter 5 - Gravitational Microlensing
- Chapter 6 - Gravitational Time Dilation
- Chapter 7 - Gravitational Wave
- Chapter 8 - Gravity Assist
- Chapter 9 - Lunar Theory
- Chapter 10 - Shapiro Delay and Tidal Force
- Chapter 11 - Introduction to Quantum Gravity
- Chapter 12 - Applied Quantum Gravity in Quantum Mechanics and General Relativity
- Chapter 13 - String Theory
- Chapter 14 - Loop Quantum Gravity

## Effects of Gravitation

# Table of Contents

Chapter 1 - Gravitational Lens

Chapter 2 - Dynamical Friction and Einstein Ring

Chapter 3 - Frame-Dragging

Chapter 4 - Gravitational Induction and Gravitational Lensing Formalism

Chapter 5 - Gravitational Microlensing

Chapter 6 - Gravitational Time Dilation

Chapter 7 - Gravitational Wave

Chapter 8 - Gravity Assist

Chapter 9 - Lunar Theory

Chapter 10 - Shapiro Delay and Tidal Force

Chapter 11 - Speed of Gravity

Chapter 12 - Gravitational Redshift

Chapter 13 - Gravitomagnetism

## Electric and Magnetic Fields in Matter Physics

# Table of Contents

Chapter 1 - Electromigration

Chapter 2 - Electron Cyclotron Resonance and Electrospray

Chapter 3 - Electron Mobility

Chapter 4 - Fermi Surface and Ferrimagnetism

Chapter 5 - Ferromagnetism

Chapter 6 - Hall Effect

Chapter 7 - Magnetic Circuit

Chapter 8 - Magnetic Moment

Chapter 9 - Magnetocrystalline Anisotropy

Chapter 10 - Paramagnetism

Chapter 11 - Photomagnetism and Polarizability

Chapter 12 - Spin Glass and Spin Wave

Chapter 13 - Stoner-Wohlfarth Model

# Table of Contents

Chapter 1 - Electric Current

Chapter 2 - Electric Shock

Chapter 3 - Electroluminescence

Chapter 4 - Ferroelectricity

Chapter 5 - Photoelectric Effect

Chapter 6 - Piezoelectricity

Chapter 7 - Static Electricity

Chapter 8 - Direct Current & Telluric Current

Chapter 9 - Pyroelectricity

Chapter 10 - Triboelectric Effect & Electric Spark

Chapter 11 - Piezoresistive Effect & Electrosphere

Chapter 12 - Classical and Quantum Conductivity

## Table of Contents

Chapter 1 - Classical Electromagnetism

Chapter 2 - Lorentz Force

Chapter 3 - Lepton

Chapter 4 - Antiparticle

Chapter 5 - Electromotive Force

Chapter 6 - Positronium

Chapter 7 - Quantum Electrodynamics

Chapter 8 - Waveguide (Electromagnetism)

Chapter 9 - Electric Current

Chapter 10 - Electric Shock

Chapter 11 - Electroluminescence

Chapter 12 - Ferroelectricity

Chapter 13 - Photoelectric Effect

Chapter 14 - Piezoelectricity

Chapter 15 - Static Electricity

Chapter 16 - Direct Current & Telluric Current

Chapter 17 - Pyroelectricity

## **Electrodynamics (branch of physics which deals with rapidly changing electric and magnetic fields)**

# **Table of Contents**

Chapter 1 - Classical Electromagnetism

Chapter 2 - Lorentz Force

Chapter 3 - Lepton

Chapter 4 - Antiparticle

Chapter 5 - Electromotive Force

Chapter 6 - Positronium

Chapter 7 - Quantum Electrodynamics

Chapter 8 - Waveguide (Electromagnetism)

Chapter 9 - Lienard–Wiechert Potential

Chapter 10 - Eddy Current

Chapter 11 - Electromagnetic Field

## **Electromagnetism (Elements, Theory, Concepts and Applications)**

# **Table of Contents**

Chapter 1 - History of Electromagnetic Theory

Chapter 2 - Electromagnetic Field

Chapter 3 - Electromagnetism

Chapter 4 - Classical Electrodynamics

Chapter 5 - Electromagnetic Radiation

Chapter 6 - Electromagnetic Spectrum

Chapter 7 - Electromagnetic Brake and Quantum Electrodynamics

Chapter 8 - Computational Electromagnetics

Chapter 9 - Electromagnetic Wave Equation

## Electron (Fundamental Concept of Physics)

# Table of Contents

Chapter 1 - Electron

Chapter 2 - Virtual Particle

Chapter 3 - Atom

Chapter 4 - Electron Diffraction

Chapter 5 - Reflection High Energy Electron Diffraction

Chapter 6 - Valence Electron

Chapter 7 - Free Electron Model

# Table of Contents

Chapter 1 - Introduction to Electrostatics

Chapter 2 - Fundamental Concepts in Electrostatics

Chapter 3 - Poisson's Equation and Laplace's Equation

Chapter 4 - Electrostatic Generator and Induction

Chapter 5 - Static Electricity

Chapter 6 - Electrostatic Discharge

Chapter 7 - Classical Electromagnetism

Chapter 8 - Lorentz Force

Chapter 9 - Lepton

Chapter 10 - Antiparticle

Chapter 11 - Electromotive Force

Chapter 12 - Positronium

Chapter 13 - Quantum Electrodynamics

Chapter 14 - Waveguide (Electromagnetism)

# **Electrostatics and Classical Electromagnetism (Prominent Elements, Concepts and Applications)**

## **Table of Contents**

Chapter 1 - Electric Charge and Electric Current

Chapter 2 - Electric Field and Electric Potential

Chapter 3 - Electromagnetism

Chapter 4 - Electrical Network

## Electrostatics

# Table of Contents

Introduction

Chapter 1 - Fundamental Concepts in Electrostatics

Chapter 2 - Poisson's Equation and Laplace's Equation

Chapter 3 - Electrostatic Generator and Induction

Chapter 4 - Static Electricity

Chapter 5 - Electrostatic Discharge

Chapter 6 - Electric Charge

Chapter 7 - Electrostatic Potential

## Elementary and Hypothetical Particle Physics

# Table of Contents

Chapter 1 - Standard Model

Chapter 2 - Fermion and Antimatter

Chapter 3 - Quark

Chapter 4 - Fundamental Bosons

Chapter 5 - Grand Unification Theory and Supersymmetry

Chapter 6 - Magnetic Monopole

Chapter 7 - Axion

Chapter 8 - Goldstone Boson

Chapter 9 - Supersymmetric Quantum Mechanics

Chapter 10 - Supermanifold

Chapter 11 - Weakly Interacting Massive Particles

Chapter 12 - Tachyon

Chapter 13 - Higgs Boson

Chapter 14 - W' and Z' Bosons & X and Y Bosons

## Elementary Particle Physics

# Table of Contents

Chapter 1 - Standard Model

Chapter 2 - Fermion and Antimatter

Chapter 3 - Quark

Chapter 4 - Fundamental Bosons

Chapter 5 - Grand Unification Theory and Supersymmetry

Chapter 6 - String Theory

Chapter 7 - Technicolor

## Elements & Components of Radioactivity

# Table of Contents

Chapter 1 - Introduction to Radioactive Decay

Chapter 2 - Ionizing Radiation

Chapter 3 - Decay Chain

Chapter 4 - Radiation Poisoning and Radioactive Contamination

Chapter 5 - Radioactive Waste and Radioactive Scrap Metal

Chapter 6 - Spent Nuclear Fuel and Beta Decay

## Elements of General Relativity

# Table of Contents

Chapter 1 - Special Relativity

Chapter 2 - Consequences of Special Relativity

Chapter 3 - Equivalence Principle

Chapter 4 - World Line

Chapter 5 - Gravitational Wave

Chapter 6 - Two-Body Problem in General Relativity

Chapter 7 - Frame-Dragging

Chapter 8 - Geodetic Effect

Chapter 9 - Einstein Field Equations

Chapter 10 - Linearized Gravity

Chapter 11 - Doubly-Special Relativity

# Table of Contents

Chapter 1 - Energy

Chapter 2 - Work (Physics)

Chapter 3 - Thermodynamics

Chapter 4 - Potential Energy

Chapter 5 - Elastic Energy

Chapter 6 - Kinetic Energy

Chapter 7 - Internal Energy

Chapter 8 - Energy Transformation

Chapter 9 - Electricity

Chapter 10 - Electromagnetism

# **Energy Physics & Thermodynamic Entropy (Concepts and Applications)**

## **Table of Contents**

Chapter 1 - Energy

Chapter 2 - Work (Physics)

Chapter 3 - Thermodynamics

Chapter 4 - Potential Energy

Chapter 5 - Elastic Energy

Chapter 6 - Kinetic Energy

Chapter 7 - Internal Energy

Chapter 8 - Thermodynamic Free Energy

Chapter 9 - Exergy

Chapter 10 - Flory–Huggins Solution Theory

Chapter 11 - Helmholtz Free Energy

Chapter 12 - Standard Gibbs Function of Formation

Chapter 13 - Entropy

Chapter 14 - Maximum Entropy Thermodynamics

Chapter 15 - Entropy (arrow of time)

# Table of Contents

Chapter 1 - Cryogenics

Chapter 2 - Cryogenic Grinding & Cryogenic Processor

Chapter 3 - Joule–Thomson Effect

Chapter 4 - Pulse Tube Refrigerator

Chapter 5 - Boiler

Chapter 6 - Condensing Boiler

Chapter 7 - Fire-Tube Boiler

Chapter 8 - Flued Boiler

Chapter 9 - Vacuum Flask & Stoddard Engine

Chapter 10 - Stirling Boiler

Chapter 11 - Superheater

Chapter 12 - Water Heating

Chapter 13 - Water-Tube Boiler

# Table of Contents

Introduction to Entropy

Chapter 1 - Entropy in Statistical and Classical Thermodynamics

Chapter 2 - History of Entropy

Chapter 3 - Entropy (Arrow of time) and Entropy Applications

Chapter 4 - Order and Disorder

Chapter 5 - Cosmological Applications

Chapter 6 - Applications and Concepts of Entropy in Information Theory

## Equations of Fluid Dynamics

# Table of Contents

Chapter 1 - Bernoulli's Principle

Chapter 2 - Benedict–Webb–Rubin Equation

Chapter 3 - Continuity Equation

Chapter 4 - Camassa–Holm Equation

Chapter 5 - Darcy Friction Factor Formulae

Chapter 6 - Euler Equations (Fluid Dynamics)

Chapter 7 - Derivation of the Navier–Stokes Equations

Chapter 8 - Navier–Stokes Equations

Chapter 9 - Orr–Sommerfeld Equation

Chapter 10 - Mild-Slope Equation

Chapter 11 - Morison Equation

Chapter 12 - Taylor–Goldstein Equation & Pressure-Correction Method

Chapter 13 - Stokes Flow

Chapter 14 - Vorticity Equation

Chapter 15 - Rankine–Hugoniot Conditions

## Equipments of Telescope

# Table of Contents

Chapter 1 - Astronomical Filter

Chapter 2 - Curved Mirror

Chapter 3 - Eyepiece

Chapter 4 - Liquid Mirror

Chapter 5 - Optical Coating

Chapter 6 - Parabolic Reflector

Chapter 7 - Telescope Mount

Chapter 8 - Charge-Coupled Device

Chapter 9 - Other Equipments of Telescope

## Essence of Electromagnetism

# Table of Contents

Chapter 1 - History of Electromagnetic Theory

Chapter 2 - Electromagnetic Field

Chapter 3 - Electromagnetism

Chapter 4 - Classical Electrodynamics

Chapter 5 - Electromagnetic Radiation

Chapter 6 - Electromagnetic Spectrum

Chapter 7 - Maxwell's Equations

Chapter 8 - Ampère's Circuital Law

Chapter 9 - Gauss's Law

Chapter 10 - Electromagnetic Wave Equation

Chapter 11 - Telegrapher's Equations

Chapter 12 - Gauss's Law for Magnetism

Chapter 13 - Faraday's Law of Induction

# Ferromagnetism and Ferromagnetic Materials

## Table of Contents

Introduction

Chapter 1 - Explanation of Ferromagnetism

Chapter 2 - Ising Model

Chapter 3 - Ferromagnetic Materials

# Table of Contents

Chapter 1 - Fluid Mechanics

Chapter 2 - Navier–Stokes Equations

Chapter 3 - Fluid Dynamics

Chapter 4 - Fluid Power and Capillary Surface

Chapter 5 - Viscosity

Chapter 6 - Compressible Flow

Chapter 7 - Incompressible Flow

Chapter 8 - Viscoelasticity

Chapter 9 - Plasticity

Chapter 10 - Fracture Mechanics

Chapter 11 - Bending

Chapter 12 - Failure Theory (Material)

Chapter 13 - Hooke's Law

## Fluid Dynamics and Mechanics

# Table of Contents

Chapter 1 - Fluid Dynamics

Chapter 2 - Aerodynamics

Chapter 3 - Boundary Layer

Chapter 4 - Computational Fluid Dynamics

Chapter 5 - Convection

Chapter 6 - Flow Measurement

Chapter 7 - Magnetohydrodynamics

Chapter 8 - Turbulence

Chapter 9 - Wind Wave

Chapter 10 - Fluid Mechanics

Chapter 11 - Navier–Stokes Equations

Chapter 12 - Fluid Power and Capillary Surface

Chapter 13 - Viscosity

Chapter 14 - Compressible Flow

Chapter 15 - Incompressible Flow

## Foundations of Classical Electromagnetism

# Table of Contents

Chapter 1 - Maxwell's Equations

Chapter 2 - Ampère's Circuital Law

Chapter 3 - Gauss's Law

Chapter 4 - Electromagnetic Wave Equation

Chapter 5 - Telegrapher's Equations

Chapter 6 - Gauss's Law for Magnetism

Chapter 7 - Faraday's Law of Induction

Chapter 8 - Lorentz Force

Chapter 9 - Biot–Savart Law

## Friction Physics (Concepts and Applications)

# Table of Contents

Chapter 1 - Friction

Chapter 2 - Viscosity

Chapter 3 - Plastic Deformation in Solids

Chapter 4 - Types of Friction

Chapter 5 - Friction Stir Welding

## Fundamental Concepts and Specific Fields of Physics

# Table of Contents

Chapter 1 - Space

Chapter 2 - Force

Chapter 3 - Matter

Chapter 4 - Energy

Chapter 5 - Acoustics and Astrophysics

Chapter 6 - Atomic Physics and Optics

Chapter 7 - Computational Physics and Condensed Matter Physics

Chapter 8 - Nuclear Physics and Particle Physics

## Fundamental Concepts and Theories of Gravitational Physics

# Table of Contents

Chapter 1 - History of Gravitational Theory

Chapter 2 - Newton's Law of Universal Gravitation

Chapter 3 - General Relativity

Chapter 4 - Alternatives to General Relativity

Chapter 5 - Graviton and Quantum Gravity

Chapter 6 - Bimetric Theory and Brans–Dicke Theory

Chapter 7 - Conformal Gravity and Cosmological Constant

Chapter 8 - Einstein Aether Theory and Einstein–Cartan Theory

Chapter 9 - Entropic Gravity and Gravitational Field

Chapter 10 - Kaluza–Klein Theory

Chapter 11 - Le Sage's Theory of Gravitation

Chapter 12 - Modified Newtonian Dynamics

## Fundamental Concepts of Physics and Electromagnetic Radiation

# Table of Contents

Chapter 1 - Fourier Optics

Chapter 2 - Radio Waves

Chapter 3 - Fundamental Physics Concepts

Chapter 4 - Ionosphere

## Fundamental Concepts of Physics

# Table of Contents

Chapter 1 - Space

Chapter 2 - Force

Chapter 3 - Matter

Chapter 4 - Energy

Chapter 5 - Electromagnetism

Chapter 6 - Gravitation

Chapter 7 - Entropy

## Fundamental Theorems, Laws and Theories of Physics

# Table of Contents

Chapter 1 - Poynting's Theorem

Chapter 2 - Runge–Gross Theorem

Chapter 3 - No–Communication Theorem

Chapter 4 - Shell Theorem

Chapter 5 - Wick's Theorem

Chapter 6 - Noether's Theorem

Chapter 7 - Liouville's Theorem (Hamiltonian)

Chapter 8 - Mermin–Wagner Theorem

Chapter 9 - Leggett–Garg Inequality & Kutta–Joukowski Theorem

Chapter 10 - Laws and Theories of Optics and Acoustics

Chapter 11 - Laws of Mechanics and Thermodynamics

Chapter 12 - Laws and Theories of Electricity, Quantum Mechanics and Particle Physics

## Fundamentals of Physics 1

# Table of Contents

Chapter 1 - Mechanics and Electromagnetism

Chapter 2 - Statistical Mechanics and Thermodynamics

Chapter 3 - Quantum Mechanics and Theory of Relativity

Chapter 4 - Optics

Chapter 5 - Particle Physics

Chapter 6 - Magnetic Field

## Table of Contents

<b>Preface</b>	<b>VII</b>
<b>Chapter 1 Introduction to Physics</b>	<b>1</b>
<b>Chapter 2 Branches of Physics</b>	<b>21</b>
a. Particle Physics	21
b. Astrophysics	25
c. Condensed Matter Physics	30
d. Atomic, Molecular and Optical Physics	39
e. Electromagnetism	48
f. Quantum Mechanics	58
g. Fluid Mechanics	77
h. Theoretical Physics	81
<b>Chapter 3 Physics: Theories, Principles and Laws</b>	<b>89</b>
a. Classical Physics	89
b. Hamiltonian Mechanics	91
c. Archimedes' Principle	100
d. Bernoulli's Principle	102
e. Physical Law	116
f. Conservation Law	119
g. Inverse-square Law	124
h. Stokes' Law	129
i. Faxén's Law	133
j. Hagen–Poiseuille Equation	134
<b>Chapter 4 Motion: A Comprehensive Study</b>	<b>144</b>
a. Motion (Physics)	144
b. Velocity	148
c. Momentum	154
d. Frame of Reference	171
e. Newton's Laws of Motion	181
<b>Chapter 5 Work and Energy: An Integrated Study</b>	<b>192</b>
a. Force	192
b. Fundamental Interaction	215
c. Friction	223
d. Impulse (Physics)	235
e. Work (Physics)	237
f. Power (Physics)	251
g. Energy	256
h. Forms of Energy	272
i. Conservation of Energy	284

# Fundamentals of Physics

## Chapter 6 Fundamental States of Matter

a. Matter	294
b. State of Matter	308
c. Phase (Matter)	318
d. Solid	322
e. Liquid	336
f. Gas	343
g. Plasma (Physics)	356

**Permissions**

**Index**

## Table of Contents

<b>Preface</b>	<b>VII</b>
<b>Chapter 1 Introduction to General Relativity</b>	<b>1</b>
<b>Chapter 2 Gravity: A Comprehensive Study</b>	<b>23</b>
a. Gravity	23
b. Newton's Law of Universal Gravitation	33
c. Introduction to General Relativity	43
d. Gravity of Earth	58
e. Gravitational Wave	68
f. Alternatives to General Relativity	90
g. History of Gravitational Theory	117
<b>Chapter 3 Key Concepts of General Relativity</b>	<b>123</b>
a. Spacetime	123
b. Galilean Invariance	131
c. Lorentz Covariance	134
d. Cosmological Constant	138
e. BKL Singularity	143
f. Relativistic Angular Momentum	173
g. Wormhole	186
<b>Chapter 4 Mathematical Tools of General Relativity</b>	<b>195</b>
a. Introduction to the Mathematics of General Relativity	195
b. Tensor	203
c. Riemann Curvature Tensor	215
d. Stress-energy Tensor	221
e. Covariant Derivative	227
f. Parallel Transport	236
g. Geodesics in General Relativity	240
h. Einstein Field Equations	246
i. Solutions of the Einstein Field Equations	253
j. Schwarzschild Metric	255
<b>Chapter 5 Special Relativity: An Overview</b>	<b>263</b>
a. Special Relativity	263
b. Lorentz Transformation	282
c. Ladder Paradox	307
d. Time Dilation	315

# Fundamentals of Relativity

e. Length Contraction	329
f. Mass–energy Equivalence	339
g. Minkowski Space	360
h. Tests of Special Relativity	374
i. Classical Electromagnetism and Special Relativity	383

**Permissions**

**Index**

## Gas Laws in Physics

# Table of Contents

Introduction

Chapter 1 - Boyle's Law

Chapter 2 - Charles's Law

Chapter 3 - Combined Gas Law

Chapter 4 - Compressibility Factor

Chapter 5 - Equation of State

Chapter 6 - Gas

Chapter 7 - Ideal Gas Law

Chapter 8 - Henry's Law

Chapter 9 - Gay-Lussac's Law & Graham's Law

Chapter 10 - Van Der Waals Equation

Chapter 11 - Amagat's Law & Avogadro's Law

# Gas Physics: Concepts, Models and Applications

## Table of Contents

Chapter 1 - Introduction to Gas

Chapter 2 - Macroscopic Models, Theories and Concepts in Gas Physics

Chapter 3 - Kinetic Theory

Chapter 4 - Simplified Models

Chapter 5 - Prominent Gas Laws

Chapter 6 - Compressibility Factor and Boundary Layer

## Geometrical Optics

# Table of Contents

- Chapter 1 - Geometrical Optics
- Chapter 2 - Astigmatism
- Chapter 3 - Brewster's Angle and Chromatic Aberration
- Chapter 4 - Circle of Confusion
- Chapter 5 - Defocus Aberration and Depth of Focus
- Chapter 6 - Fermat's Principle and Focal Length
- Chapter 7 - Focus (Optics) and Fresnel Equations
- Chapter 8 - Optical Aberration
- Chapter 9 - Ray Transfer Matrix Analysis
- Chapter 10 - Snell's Law
- Chapter 11 - Cardinal Point
- Chapter 12 - Reflection

# Table of Contents

Chapter 1 - Glass

Chapter 2 - Calculation of Glass Properties

Chapter 3 - Fracture Mechanics

Chapter 4 - Light Scattering and Abbe Number

Chapter 5 - Dispersion (Optics)

Chapter 6 - Refractive Index

Chapter 7 - Total Internal Reflection and Opacity (optics)

Chapter 8 - Supercooling, Spontaneous Glass Breakage and Tempering

Chapter 9 - Glass Transition

Chapter 10 - Surface Tension

# Table of Contents

<b>Preface</b>	<b>VII</b>
<b>Chapter 1 Introduction to Glass</b>	<b>1</b>
<b>Chapter 2 Physical Properties of Glass</b>	<b>17</b>
• Viscosity	17
• Low Emissivity	36
• Heatable Glass	38
• Corrosion	42
• Glass Transition	58
• Thermal Expansion	66
• Density	78
• Refractive Index	87
• Dispersion (Optics)	105
• Liquidus	115
• Heat Capacity	116
• Fused Quartz	156
• Borosilicate Glass	161
• Soda-lime Glass	169
• Float Glass	171
• Stained Glass	174
• Crown Glass (Window)	196
• Chemically Strengthened Glass	197
<b>Chapter 3 Architectural Glass: An Integrated Study</b>	<b>199</b>
• Architectural Glass	199
• Glass Brick	207
• Annealing (Glass)	209
• Laminated Glass	210
• Toughened Glass	214
• Self-cleaning Glass	218
• Insulated Glazing	221
• Flat Glass	228
<b>Chapter 4 Natural Occurrence of Glass</b>	<b>230</b>
• Libyan Desert Glass	230
• Darwin Glass	231
• Tektite	232
• Volcanic Glass	239
• Tachylite	240
• Obsidian	242
• Perlite	248
• Pele's Tears	251
• Palagonite	252
• Pumice	253

# Glass Physics

• Diamond	255
• Hyalite	275
• Slocum Stone	276
• Opal	277
<b>Chapter 5 Production of Glass</b>	<b>287</b>
• Glass Production	287
• Glassblowing	294
• Cylinder Blown Sheet Glass	301
• Machine Drawn Cylinder Sheet Glass	302
• Silicon Dioxide	302
• Polished Plate Glass	313
• Fourcault Process	313
• Broad Sheet Glass	316
• Blown Plate Glass	317
• Glazier	317
• Glass Coloring and Color Marking	320
<b>Chapter 6 Applications of Glass</b>	<b>325</b>
• Glass Tile	325
• Glass-bottom Boat	326
• Fiberglass	328
• Windshield	338
• Storm Glass	343
• Photchromic Lens	345
• Picture Framing Glass	346
<b>Chapter 7 Recycling of Glass</b>	<b>353</b>
• Glass Recycling	353
• Recycled Glass Countertops	356
• Glass Wool	357
<b>Permissions</b>

# Handbook of Classical Physics

## Table of Contents

Chapter 1 - Classical Mechanics

Chapter 2 - Kinematics

Chapter 3 - Velocity and Speed

Chapter 4 - Acceleration

Chapter 5 - Newton's Laws of Motion

Chapter 6 - Potential Energy

Chapter 7 - Hamiltonian Mechanics

Chapter 8 - Lagrangian Mechanics

Chapter 9 - Thermodynamics

Chapter 10 - Electromagnetism

Chapter 11 - Solid Mechanics

Chapter 12 - Fluid Mechanics

Chapter 13 - Acoustics

## Table of Contents

Chapter 1 - Experimental Physics

Chapter 2 - Experimental Techniques

Chapter 3 - Bell Test Experiments

Chapter 4 - Double-slit Experiment

Chapter 5 - Gravity Probe A and B

Chapter 6 - Fizeau Experiment & Hafele–Keating Experiment

Chapter 7 - Michelson–Morley Experiment

Chapter 8 - Oil Drop Experiment

Chapter 9 - Trouton–Rankine Experiment & Trouton–Noble Experiment

Chapter 10 - Cavendish Experiment

Chapter 11 - Schiehallion Experiment

Chapter 12 - Pound–Rebka Experiment

Chapter 13 - Bedford Level Experiment

Chapter 14 - Molten–Salt Reactor Experiment

Chapter 15 - Cowan–Reines Neutrino Experiment & Pitch Drop Experiment

Chapter 16 - Geiger–Marsden Experiment & Homestake Experiment

Chapter 17 - Afshar Experiment

Chapter 18 - Stern–Gerlach Experiment

# **Handbook of Geometrical and Nonlinear Optics**

## **Table of Contents**

Chapter 1 - Geometrical Optics

Chapter 2 - Astigmatism

Chapter 3 - Brewster's Angle and Chromatic Aberration

Chapter 4 - Circle of Confusion

Chapter 5 - Defocus Aberration and Depth of Focus

Chapter 6 - Fermat's Principle and Focal Length

Chapter 7 - Focus (Optics) and Fresnel Equations

Chapter 8 - Optical Aberration

Chapter 9 - Ray Transfer Matrix Analysis

Chapter 10 - Nonlinear Optics

Chapter 11 - 3D Optical Data Storage

Chapter 12 - Acousto–Optics

Chapter 13 - Cross–Polarized Wave Generation & Electro–Optic Modulator

Chapter 14 - GRENOUILLE

Chapter 15 - Kerr Effect

Chapter 16 - Kerr–Lens Modelocking

Chapter 17 - Quasi-Phase-Matching

Chapter 18 - Optical Parametric Oscillator & Multiphoton Intrapulse  
Interference Phase Scan

# **Handbook of Heat Conduction and Heat Engine Systems**

## **Table of Contents**

Chapter 1 - Conduction (Heat)

Chapter 2 - Heat Equation

Chapter 3 - Thermal Grease

Chapter 4 - Heat Pipe

Chapter 5 - Thermal Conductivity

Chapter 6 - Thermal Contact Conductance

Chapter 7 - Heat Transfer Coefficient

Chapter 8 - Heat Engine

Chapter 9 - Rankine Cycle

Chapter 10 - Gas Only Cycles

Chapter 11 - Stirling Engine

Chapter 12 - Steam Engine

## Handbook of Magnetism

# Table of Contents

Chapter 1 - History of Electromagnetic Theory

Chapter 2 - Types of Magnetism

Chapter 3 - Magnetic Field

Chapter 4 - Magnetic Dipole and Monopole

# Handbook of Nuclear Reactor Technology

## Table of Contents

Chapter 1 - Introduction to Nuclear Reactor Technology

Chapter 2 - Nuclear Reactor Physics

Chapter 3 - Control Rod

Chapter 4 - Generation IV Reactor

Chapter 5 - Nuclear Fusion

Chapter 6 - Nuclear Fuel Cycle

Chapter 7 - Nuclear Safety

Chapter 8 - Natural Nuclear Fission Reactor

## Handbook of Optical Materials

# Table of Contents

Chapter 1 - Glass

Chapter 2 - Phosphor

Chapter 3 - Scintillator

Chapter 4 - Transparency and Translucency

Chapter 5 - Sapphire

Chapter 6 - Negative Index Metamaterials

Chapter 7 - Light-emitting Diode

# **Handbook of Optical Phenomenons and Illusions**

## **Table of Contents**

Chapter 1 - Optical Phenomenon

Chapter 2 - Iridescence

Chapter 3 - Shadow

Chapter 4 - Zodiacal Light

Chapter 5 - Entoptic Phenomenon

Chapter 6 - Diffraction

Chapter 7 - Dispersion

Chapter 8 - Birefringence

Chapter 9 - Double-slit Experiment

Chapter 10 - Optical Illusion

Chapter 11 - Autostereogram

Chapter 12 - Filling-in

Chapter 13 - Wagon-wheel Effect

Chapter 14 - Lilac Chaser and Blivet

Chapter 15 - Liquid Crystal Shutter Glasses

Chapter 16 - McCollough Effect and Barberpole Illusion

Chapter 17 - Moon Illusion and Missing Square Puzzle

# **Handbook of Physics Phenomenons & Constants**

## **Table of Contents**

- Chapter 1 - Aharonov–Bohm Effect
- Chapter 2 - Butterfly Effect
- Chapter 3 - Biefeld–Brown Effect
- Chapter 4 - Coanda Effect
- Chapter 5 - Charge Separation
- Chapter 6 - Coriolis Effect
- Chapter 7 - Doppler Broadening & Mossbauer Effect
- Chapter 8 - Stark Effect
- Chapter 9 - Thermoelectric Effect
- Chapter 10 - Physical Constant
- Chapter 11 - Gravitational Constant
- Chapter 12 - Planck Constant
- Chapter 13 - Vacuum Permittivity
- Chapter 14 - Elementary Charge
- Chapter 15 - Oort Constants
- Chapter 16 - Fine–structure Constant
- Chapter 17 - Avogadro Constant
- Chapter 18 - Natural Units

# **Handbook of Thermodynamic Potential, Free Energy and Entropy**

## **Table of Contents**

Chapter 1 - Thermodynamic Potential

Chapter 2 - Enthalpy

Chapter 3 - Internal Energy

Chapter 4 - Gibbs Free Energy

Chapter 5 - Free Entropy and Thermodynamic Free Energy

Chapter 6 - Exergy

Chapter 7 - Flory–Huggins Solution Theory

Chapter 8 - Helmholtz Free Energy

Chapter 9 - Standard Gibbs Function of Formation

Chapter 10 - Entropy

Chapter 11 - Maximum Entropy Thermodynamics

Chapter 12 - Entropy (arrow of time)

Chapter 13 - Entropy and Life

Chapter 14 - Geometrical Frustration

# Table of Contents

Chapter 1 - Thermodynamic Potential

Chapter 2 - Enthalpy

Chapter 3 - Internal Energy

Chapter 4 - Helmholtz Free Energy

Chapter 5 - Gibbs Free Energy

Chapter 6 - Free Entropy and Thermodynamic Free Energy

# **Handbook of Thermodynamic Properties and Processes**

## **Table of Contents**

Chapter 1 - Activity (Chemistry)

Chapter 2 - Chemical Potential

Chapter 3 - Enthalpy of Fusion

Chapter 4 - Fugacity

Chapter 5 - Heat of Combustion

Chapter 6 - Vapor Pressure, Vapour Pressure of Water & Volumetric Heat Capacity

Chapter 7 - Enthalpy of vaporization

Chapter 8 - Temperature

Chapter 9 - Adiabatic Process

Chapter 10 - Gas

Chapter 11 - Thermodynamic Process

Chapter 12 - Isentropic Process

Chapter 13 - Isobaric Process

Chapter 14 - Isochoric Process & Isothermal Process

Chapter 15 - Cryogenic Nitrogen Plant

Chapter 16 - Supercooling & Superheating

Chapter 17 - Polytropic Process

Chapter 18 - Quasistatic Process & Reversible Process (Thermodynamics)

Chapter 19 - Thermodynamic Cycle

# **Handbook of Transparent and Optical Materials**

## **Table of Contents**

Chapter 1 - Transparency and Translucency

Chapter 2 - Properties of Water

Chapter 3 - Sol-gel

Chapter 4 - Transparent Ceramics

Chapter 5 - Polyethylene Terephthalate

Chapter 6 - Poly(methyl methacrylate)

Chapter 7 - Polycarbonate

Chapter 8 - Glass

Chapter 9 - Phosphor

Chapter 10 - Scintillator

Chapter 11 - Sapphire

Chapter 12 - Negative Index Metamaterials

# **Handbook of Wave and Field Physics (Concepts and Applications)**

## **Table of Contents**

Chapter 1 - Wave Equation

Chapter 2 - Phase Velocity and Group Velocity

Chapter 3 - Plane Waves and Standing Waves

Chapter 4 - Dispersion (optics)

Chapter 5 - Seismic Wave

Chapter 6 - Electromagnetic Radiation

Chapter 7 - Classical Field Theory

Chapter 8 - Electromagnetic Field

Chapter 9 - Quantum Field Theory

## Heat Conduction Handbook

# Table of Contents

Chapter 1 - Conduction (Heat)

Chapter 2 - Heat Equation

Chapter 3 - Thermal Grease

Chapter 4 - Heat Pipe

Chapter 5 - Thermal Conductivity

Chapter 6 - Thermal Contact Conductance

Chapter 7 - Heat Transfer Coefficient

Chapter 8 - Lumped Capacitance Model

Chapter 9 - Relativistic Heat Conduction

Chapter 10 - Heat Kernel & Thermal Diffusivity

Chapter 11 - Heat Transfer

Chapter 12 - Enthalpy of Fusion

# Table of Contents

Chapter 1 - Heat Engine

Chapter 2 - Rankine Cycle

Chapter 3 - Gas Only Cycles

Chapter 4 - Stirling Engine

Chapter 5 - Steam Engine

Chapter 6 - Steam Turbine

## History of Physics

# Table of Contents

Chapter 1 - Introduction to History of Physics

Chapter 2 - History of Astronomy

Chapter 3 - History of General Relativity & History of Special Relativity

Chapter 4 - History of Thermodynamics

Chapter 5 - Aristotelian Physics and Theory of Impetus

## Ideal Gas, Material Properties and System of Thermodynamics

# Table of Contents

Chapter 1 - Ideal Gas

Chapter 2 - Equation of State

Chapter 3 - Heat Capacity

Chapter 4 - Thermodynamic System and Equilibrium

Chapter 5 - Compressibility Factor

Chapter 6 - Adiabatic Process

## Important Concepts and Applications of Phase Changes

# Table of Contents

Chapter 1 - Crystallization

Chapter 2 - Supercooling and Enthalpy of Fusion

Chapter 3 - Glass Transition and Boiling

Chapter 4 - Melting Point and Boiling Point

Chapter 5 - Distillation

Chapter 6 - Evaporation and Leidenfrost Effect

Chapter 7 - Boiling-Point Elevation and Boiling Water Reactor

# Important Concepts and Components of Introductory Physics

## Table of Contents

Chapter 1 - Heat Capacity

Chapter 2 - Density

Chapter 3 - Diffraction

Chapter 4 - Kinetic Energy and Internal Energy

## Important Concepts and Elements of Electromagnetism

# Table of Contents

Chapter 1 - Permeability (electromagnetism)

Chapter 2 - Electromagnetism

Chapter 3 - Diamagnetism and Paramagnetism

Chapter 4 - Electric Field

Chapter 5 - Permittivity

Chapter 6 - Vacuum and Relative Permittivity

Chapter 7 - Dielectric Spectroscopy

## Important Concepts and Elements of Radiations and Radioactivity

# Table of Contents

Chapter 1 - Ionizing Radiation

Chapter 2 - Alpha Decay and Beta Decay

Chapter 3 - Gamma Ray

Chapter 4 - X-ray

Chapter 5 - Non-Ionizing Radiation

Chapter 6 - Electromagnetic Radiation

Chapter 7 - Background and Cherenkov Radiation

## Important Electromagnetic Components & Concepts of Magnetism

# Table of Contents

Chapter 1 - Magnetic Circuit

Chapter 2 - Electromagnet

Chapter 3 - Magnetic Core

Chapter 4 - Electric Motor

Chapter 5 - Magnetic Refrigeration

Chapter 6 - Gauss's Law for Magnetism

# Table of Contents

- Chapter 1 - Fizeau Experiment & Hafele–Keating Experiment
- Chapter 2 - Michelson–Morley Experiment
- Chapter 3 - Oil Drop Experiment
- Chapter 4 - Trouton–Rankine Experiment & Trouton–Noble Experiment
- Chapter 5 - Cavendish Experiment
- Chapter 6 - Schiehallion Experiment
- Chapter 7 - Pound–Rebka Experiment
- Chapter 8 - Bedford Level Experiment
- Chapter 9 - Molten-Salt Reactor Experiment
- Chapter 10 - Cowan–Reines Neutrino Experiment & Pitch Drop Experiment
- Chapter 11 - Geiger–Marsden Experiment & Homestake Experiment
- Chapter 12 - Afshar Experiment
- Chapter 13 - Stern–Gerlach Experiment
- Chapter 14 - Quantum Eraser Experiment
- Chapter 15 - Franck–Hertz Experiment & Davisson–Germer Experiment
- Chapter 16 - Eotvos Experiment

## Important Physics Theorems

# Table of Contents

Chapter 1 - Bell's Theorem

Chapter 2 - Buckingham  $\pi$  Theorem

Chapter 3 - Adiabatic Theorem

Chapter 4 - Earnshaw's Theorem

Chapter 5 - Equipartition Theorem

Chapter 6 - Fluctuation-Dissipation Theorem

Chapter 7 - Hellmann–Feynman Theorem

Chapter 8 - No-Cloning Theorem

Chapter 9 - Virial Theorem

## Infrared and Electromagnetic Radiation (Concepts and Applications)

# Table of Contents

Chapter 1 - Infrared

Chapter 2 - Thermal Radiation

Chapter 3 - Thermography and Infrared Homing

Chapter 4 - Infrared Heater and Infrared Spectroscopy

Chapter 5 - Near-infrared Spectroscopy

Chapter 6 - Black Body

# Instability and Key Concepts of Physics

## Table of Contents

Chapter 1 - Baroclinity and Convective Available Potential Energy

Chapter 2 - Rayleigh–Taylor Instability

Chapter 3 - Plasma Stability

Chapter 4 - Jeans Instability and Firehose Instability

Chapter 5 - Electrothermal Instability and Taylor–Couette Flow

Chapter 6 - Pinch (plasma physics)

## International System of Units

# Table of Contents

Chapter 1 - International System of Units

Chapter 2 - SI Base Unit

Chapter 3 - Metre

Chapter 4 - Kilogram

Chapter 5 - Second

Chapter 6 - Ampere

Chapter 7 - Kelvin

Chapter 8 - Mole (Unit)

Chapter 9 - Candela

Chapter 10 - SI Derived Unit

Chapter 11 - Non-SI Units Mentioned in the SI

Chapter 12 - Units of Measurement

Chapter 13 - Systems of Measurement

Chapter 14 - Metre Convention & General Conference on Weights and Measures

Chapter 15 - International Bureau and Committee of Weights and Measures

## **Introduction to Dipoles (Fundamental Physics Concepts)**

# **Table of Contents**

Chapter 1 - Introduction to Dipole

Chapter 2 - Dipole Moment

Chapter 3 - Electric Dipole Moment

Chapter 4 - Dipole Antenna

## Introduction to Energy Physics

# Table of Contents

Chapter 1- Kinetic Energy

Chapter 2 - Potential Energy

Chapter 3 - Conservation of Energy

Chapter 4 - Mechanical Work

Chapter 5 - Electromagnetism

Chapter 6 - Mass–Energy Equivalence

Chapter 7 - Binding Energy

## Introduction to Fluid Dynamics

# Table of Contents

Chapter 1 - Fluid Dynamics

Chapter 2 - Aerodynamics

Chapter 3 - Boundary Layer

Chapter 4 - Computational Fluid Dynamics

Chapter 5 - Convection

Chapter 6 - Flow Measurement

Chapter 7 - Magnetohydrodynamics

Chapter 8 - Turbulence

Chapter 9 - Wind Wave

Chapter 10 - Centrifugal Pump

Chapter 11 - Choked Flow

Chapter 12 - Compressibility

# Introduction to Force & its Applications in Physics

## Table of Contents

Introduction

Chapter 1 - Newton's Laws of Motion

Chapter 2 - Descriptions and Applications of Different Forces in Physics

Chapter 3 - Fundamental Models of Force

Chapter 4 - Non-Fundamental Forces

## Introduction to General Relativity

# Table of Contents

Chapter 1 - Introduction to General Relativity

Chapter 2 - History of General Relativity

Chapter 3 - Einstein's Field Equations and Mathematics of General Relativity

Chapter 4 - Two-Body Problem in General Relativity

Chapter 5 - Geodetic Precession and Frame-Dragging

Chapter 6 - Gravitational Waves

# Introduction to Heat Transfer

## Table of Contents

<b>Preface</b>	<b>VII</b>
<b>Chapter 1 Introduction to Heat Transfer</b>	<b>1</b>
<b>Chapter 2 Heat: An Overview</b>	<b>18</b>
<b>Chapter 3 Modes of Heat Transfer</b>	<b>36</b>
a. Thermal Conduction	36
b. Convective Heat Transfer	47
c. Radiation	50
<b>Chapter 4 Essential Concepts of Heat Transfer</b>	<b>65</b>
a. Thermal Expansion	65
b. Thermal Conductivity	77
c. Thermal Insulation	90
d. Thermal Equilibrium	95
e. Interfacial Thermal Resistance	99
f. Waste Heat	104
g. Heat Flux	109
h. Heat Transfer Coefficient	111
<b>Chapter 5 Fundamental Theories of Heat Transfer</b>	<b>121</b>
a. First Law of Thermodynamics	121
b. Second Law of Thermodynamics	142
c. Zeroth Law of Thermodynamics	164
d. Convective Heat Transfer	169
e. NTU Method	172
<b>Chapter 6 Techniques and Tools of Heat Transfer</b>	<b>175</b>
a. Heat Exchanger	175
b. Heat Spreader	196
c. Heat Sink	198
d. Heat pipe	217
e. Loop Heat Pipe	231
f. Thermosiphon	233
g. Thermal reservoir	237

<b>Index</b>	

## Introduction to Mass in Physics

# Table of Contents

Chapter 1 - Introduction to Mass

Chapter 2 - Mass–energy Equivalence

Chapter 3 - Weight

Chapter 4 - Center of Mass

Chapter 5 - Mass in Special Relativity and Mass in General Relativity

Chapter 6 - Effective Mass and Invariant Mass

## Table of Contents

<b>Preface</b>	<b>VII</b>
<b>Chapter 1 Introduction to Optics in Engineering</b>	<b>1</b>
<b>Chapter 2 Evolution of Optics</b>	<b>31</b>
<b>Chapter 3 Branches of Optics</b>	<b>41</b>
a. Geometrical Optics	41
b. Physical Optics	47
c. Quantum Optics	48
d. Nonimaging Optics	50
e. Nonlinear Optics	64
f. Crystal Optics	76
g. Near-field Optics	78
h. Lens (Optics)	79
<b>Chapter 4 Significant Topics of Optics</b>	<b>94</b>
a. Optical Instrument	94
b. Optical Engineering	95
<b>Chapter 5 Concepts of Optics</b>	<b>97</b>
a. Photometry (Optics)	97
b. Exposure (Photography)	105
c. Atmospheric Optics	118
d. Wave-particle Duality	129
e. Optical Vortex	141
f. Focus (Optics)	144
g. Dispersion (Optics)	146
h. Opacity (Optics)	152
i. Fourier optics	154
j. Fermat's Principle	172
<b>Chapter 6 Applications of Optics</b>	<b>177</b>
a. Fiber-optic Communication	177
b. Electromagnetically Induced Transparency	190
c. Superlens	193
d. Optical Fiber	211
e. Spectrometer	234

# Introduction to Optics

f. Light-emitting diode	236
g. Photonic Integrated Circuit	268
h. Optical Computing	269

**Permissions**

**Index**

# Introductory Matter Physics & its Applications

## Table of Contents

Chapter 1 - Structure of Matter

Chapter 2 - Phase (matter) and Antimatter

Chapter 3 - Other Important Types of Matter

Chapter 4 - Matter Wave and Hadron

Chapter 5 - Ion

## Introductory Physics

# Table of Contents

Chapter 1 - Theory of Relativity

Chapter 2 - Thermodynamics

Chapter 3 - Electromagnetism

Chapter 4 - Optics

Chapter 5 - Particle Physics

Chapter 6 - Magnetic Field

## Introductory Sound Physics (Concepts and Applications)

# Table of Contents

Chapter 1 - Introduction to Sound

Chapter 2 - Speed of Sound

Chapter 3 - Acoustics and Noise

Chapter 4 - Sound Wave Properties and Characteristics

Chapter 5 - Sound Pressure

Chapter 6 - Absolute Threshold of Hearing

## Invisibility and Vacuum (Fundamental Physics Concepts and Applications)

# Table of Contents

Chapter 1 - Introduction to Invisibility

Chapter 2 - Metamaterial Cloaking

Chapter 3 - Vacuum

Chapter 4 - Outer Space

Chapter 5 - Vacuum Pump

Chapter 6 - Vacuum State

## Isaac Newton's Inventions, Laws and Theorems

# Table of Contents

Chapter 1 - Newton's Reflector and Newtonian Telescope

Chapter 2 - Rotating Spheres

Chapter 3 - Newton's Theorem of Revolving Orbits

Chapter 4 - Newton's Cannonball and Newton Disc

Chapter 5 - Newton's Laws of Motion

Chapter 6 - Newton's Method

Chapter 7 - Newton's Law of Universal Gravitation

Chapter 8 - Calculus

Chapter 9 - Bucket Argument

## Key Concepts in Physics and Mathematics

# Table of Contents

Chapter 1 - Fluid Dynamics

Chapter 2 - Differential Geometry and Spectral Theory

Chapter 3 - Atomic Spectral Line and Linear Algebra

Chapter 4 - Group Theory

Chapter 5 - Statistical Mechanics and Ergodic Theory

Chapter 6 - Ordinary Differential Equation and Representation Theory

Chapter 7 - String Theory

## Table of Contents

Chapter 1 - Newton's Law of Universal Gravitation and Newton's Laws of Motion

Chapter 2 - Grand Unified Theory and String Theory

Chapter 3 - Quantum Field Theory

## Laws and Theories of Electricity and Relativity

# Table of Contents

Chapter 1 - Coulomb's Law and Kirchhoff's Circuit Laws

Chapter 2 - Ohm's Law

Chapter 3 - Theory of Relativity

Chapter 4 - Special Relativity

## Laws and Theories of Physics

# Table of Contents

Chapter 1 - Laws and Theories of Optics and Acoustics

Chapter 2 - Laws of Mechanics and Thermodynamics

Chapter 3 - Laws and Theories of Electricity, Quantum Mechanics and Particle Physics

Chapter 4 - Theories of Relativity

# Table of Contents

Chapter 1 - Avogadro, Joule, Boyle and Dalton Law

Chapter 2 - Charles's Law, First Law, Second Law and Third Law of Thermodynamics

Chapter 3 - Entropy in Thermodynamics and Information Theory & Fluctuation Theorem

## Laws, Concepts and Applications of Electron and Electromagnetism

# Table of Contents

Chapter 1 - Electron

Chapter 2 - Virtual Particle

Chapter 3 - Atom

Chapter 4 - Electron Diffraction

Chapter 5 - Reflection High Energy Electron Diffraction

Chapter 6 - Magnetic Flux

Chapter 7 - Faraday's Law of Induction

Chapter 8 - Gauss's Law for Magnetism

Chapter 9 - Magnetic Field

Chapter 10 - Magnetic Moment

## Laws, Concepts, Elements and Applications of Gas Physics

# Table of Contents

Chapter 1 - Boyle's Law

Chapter 2 - Charles's Law

Chapter 3 - Combined Gas Law

Chapter 4 - Compressibility Factor

Chapter 5 - Equation of State

Chapter 6 - Gas

Chapter 7 - Ideal Gas Law

Chapter 8 - Henry's Law

Chapter 9 - Macroscopic Models, Theories and Concepts in Gas Physics

Chapter 10 - Kinetic Theory

Chapter 11 - Simplified Models

Chapter 12 - Prominent Gas Laws

## Laws, Theories and Branches of Thermodynamics

# Table of Contents

Chapter 1 - Avogadro, Joule, Boyle and Dalton Law

Chapter 2 - Charles's Law, First Law, Second Law and Third Law of Thermodynamics

Chapter 3 - Chemical Thermodynamics

Chapter 4 - Atmospheric Thermodynamics

Chapter 5 - Equilibrium Thermodynamics & Non-Equilibrium Thermodynamics

Chapter 6 - Thermochemistry

Chapter 7 - Thermal fluids

# Table of Contents

Chapter 1 - Introduction to Light

Chapter 2 - Speed of Light

Chapter 3 - Electromagnetic Spectrum and Refraction

Chapter 4 - Optics and Photometry

Chapter 5 - Light Sources

Chapter 6 - Radiation Pressure

Chapter 7 - Special Theory of Relativity

## **Liquid Physics and Liquid Chemistry (Concepts and Applications)**

# **Table of Contents**

Chapter 1 - Liquid

Chapter 2 - Fluid Dynamics and Viscosity

Chapter 3 - Liquid-liquid Extraction and Ionic Liquid

Chapter 4 - Vapor-liquid Equilibrium and Liquid Nitrogen Vehicle

# Table of Contents

Chapter 1 - Nuclear Magnetic Resonance

Chapter 2 - Coilgun

Chapter 3 - Electromagnetic Suspension

Chapter 4 - Helmholtz Coil

Chapter 5 - Magnetic Developer and Magnetic Shark Repellent

Chapter 6 - Magnetic Storage

Chapter 7 - Magnetic Stripe Card

Chapter 8 - Magnetic Tape

Chapter 9 - Magnetic Tape Data Storage

Chapter 10 - Magnetometer

Chapter 11 - Maxwell Coil and Preservation of Magnetic Audiotape

Chapter 12 - Proton Magnetometer and Tape Drive

Chapter 13 - Tape Head and Transcranial Magnetic Stimulation

Chapter 14 - Mass Driver

Chapter 15 - Electromagnetic Propulsion

## Mass and Density Physics

# Table of Contents

Chapter 1 - Introduction to Mass

Chapter 2 - Mass–energy Equivalence

Chapter 3 - Weight

Chapter 4 - Center of Mass

Chapter 5 - Introduction to Density

Chapter 6 - Density Functional Theory

Chapter 7 - Density Matrix

Chapter 8 - Density of States

Chapter 9 - Energy Density

# **Mass-Energy Equivalence & Important Concepts of Special Relativity and Energy Physics**

## **Table of Contents**

Chapter 1 - Mass–energy Equivalence

Chapter 2 - Binding Energy and Kinetic Energy

Chapter 3 - Mass in Special Relativity

Chapter 4 - Conservation of Mass and Conservation of Energy

Chapter 5 - Internal Energy and Invariant Mass

Chapter 6 - Beta Decay

## Measurement Handbook

# Table of Contents

Chapter 1 - Introduction to Measurement

Chapter 2 - History of Measurement

Chapter 3 - Units and Systems of Measurement

Chapter 4 - Imperial Units

Chapter 5 - Metric System

Chapter 6 - Weighing Scale

Chapter 7 - Levels of Measurement

Chapter 8 - Measuring Instrument

## Modern Physics

# Table of Contents

Chapter 1 - Special Relativity and General Relativity

Chapter 2 - Quantum Mechanics

Chapter 3 - Quantum Field Theory

Chapter 4 - Quantum Gravity

Chapter 5 - Nuclear Physics and Particle Physics

Chapter 6 - Atomic Physics and Plasma

## Momentum & Fundamental Physics Concepts

# Table of Contents

Chapter 1 - Momentum

Chapter 2 - Coefficient of Restitution and Transport Phenomena

Chapter 3 - Stress-energy Tensor and Einstein Field Equations

Chapter 4 - Angular Momentum

Chapter 5 - General Relativity

Chapter 6 - Force

Chapter 7 - Fermi Energy

## Momentum, Invisibility, Vacuum & Fundamental Physics Concepts

# Table of Contents

Chapter 1 - Momentum

Chapter 2 - Coefficient of Restitution and Transport Phenomena

Chapter 3 - Stress–energy Tensor and Einstein Field Equations

Chapter 4 - Angular Momentum

Chapter 5 - General Relativity

Chapter 6 - Introduction to Invisibility

Chapter 7 - Metamaterial Cloaking

Chapter 8 - Vacuum

Chapter 9 - Outer Space

Chapter 10 - Vacuum Pump

## Neutron Physics and its Applications

# Table of Contents

Chapter 1 - Introduction to Neutron

Chapter 2 - Neutron Moderator

Chapter 3 - Neutron Detection

Chapter 4 - Neutron Temperature

Chapter 5 - Neutron Radiation

Chapter 6 - Neutron Generator

# Table of Contents

Chapter 1 - Non-equilibrium Thermodynamics

Chapter 2 - Fluctuation Theorem

Chapter 3 - Fluctuation-dissipation Theorem

Chapter 4 - Maximum Entropy Thermodynamics

Chapter 5 - Second Law of Thermodynamics

Chapter 6 - Extremal Principles in Non-equilibrium Thermodynamics

Chapter 7 - Onsager Reciprocal Relations and H-Theorem

Chapter 8 - Autocatalytic Reaction

Chapter 9 - Combustion

Chapter 10 - Thermal Efficiency

Chapter 11 - Equation of State

## Nonlinear Optics

# Table of Contents

Chapter 1 - Nonlinear Optics

Chapter 2 - 3D Optical Data Storage

Chapter 3 - Acousto-Optics

Chapter 4 - Cross-Polarized Wave Generation & Electro-Optic Modulator

Chapter 5 - GRENOUILLE

Chapter 6 - Kerr Effect

Chapter 7 - Kerr-Lens Modelocking

Chapter 8 - Quasi-Phase-Matching

Chapter 9 - Optical Parametric Oscillator & Multiphoton Intrapulse  
Interference Phase Scan

Chapter 10 - Second-Harmonic Generation

Chapter 11 - Self-Phase Modulation

Chapter 12 - Soliton (Optics)

Chapter 13 - Two-Photon Absorption

# Table of Contents

Chapter 1 - Nuclear Engineering

Chapter 2 - Neutron Moderator

Chapter 3 - Nuclear Criticality Safety and Atomic Battery

Chapter 4 - Nuclear Fuel Cycle

Chapter 5 - Critical Mass

Chapter 6 - Neutron Poison and Neutron Source

Chapter 7 - Nuclear Decommissioning

Chapter 8 - Long-lived Fission Product and Nuclear Fusion-Fission Hybrid

Chapter 9 - Prompt Neutron and Prompt Critical

Chapter 10 - Nuclear Weapon Design

Chapter 11 - Nuclear Reactor Physics

Chapter 12 - Nuclear Submarine

Chapter 13 - Thorium Fuel Cycle

## Nuclear Fission & its Applications

# Table of Contents

Chapter 1 - Introduction to Nuclear Fission

Chapter 2 - Fission Reactors & Nuclear Power

Chapter 3 - Nuclear Weapon

Chapter 4 - History of Nuclear Fission

## Nuclear Fission and Fusion (Concepts & Applications)

# Table of Contents

Chapter 1 - Introduction to Nuclear Fission

Chapter 2 - Fission Reactors & Nuclear Power

Chapter 3 - Nuclear Weapon

Chapter 4 - Introduction to Nuclear Fusion

Chapter 5 - Inertial Confinement Fusion

Chapter 6 - Generally Cold, Locally Hot Fusion

# Table of Contents

Chapter 1 - Introduction to Nuclear Fusion

Chapter 2 - Inertial Confinement Fusion

Chapter 3 - Generally Cold, Locally Hot Fusion

Chapter 4 - Fusion Power

# Table of Contents

Chapter 1 - Semi-empirical Mass Formula and Nuclear Shell Model

Chapter 2 - Radioactive Decay

Chapter 3 - Nuclear Fusion

Chapter 4 - Nuclear Fission

Chapter 5 - Nucleon

Chapter 6 - Nuclear Engineering

Chapter 7 - Neutron Moderator

Chapter 8 - Nuclear Criticality Safety and Atomic Battery

Chapter 9 - Nuclear Fuel Cycle

Chapter 10 - Critical Mass

Chapter 11 - Neutron Poison and Neutron Source

Chapter 12 - Nuclear Decommissioning

Chapter 13 - Long-lived Fission Product and Nuclear Fusion-Fission Hybrid

Chapter 14 - Prompt Neutron and Prompt Critical

# Nuclear Power: An Introduction

## Table of Contents

<b>Preface</b>	<b>VII</b>
<b>Chapter 1</b> <b>Introduction to Nuclear Power</b>	<b>1</b>
<b>Chapter 2</b> <b>Nuclear Power Plant: An Overview</b>	<b>37</b>
• Nuclear Power Plant	37
• Nuclear Reactor	46
• Steam Turbine	107
• Nuclear Reactor Coolant	127
• Nuclear Reprocessing	128
• Base Load	138
<b>Chapter 3</b> <b>Nuclear Power Reactor: A Design Classification</b>	<b>142</b>
• Generation II Reactor	142
• Generation III Reactor	143
• Generation IV Reactor	146
<b>Chapter 4</b> <b>Nuclear Reaction: An Integrated Study</b>	<b>183</b>
• Nuclear Reaction	183
• Nuclear Fusion	189
• Fusion Power	223
• Nuclear Fission	252
• Radioactive Decay	270
• Nuclear Binding Energy	290
<b>Chapter 5</b> <b>Nuclear Safety and Decommissioning</b>	<b>303</b>
• Nuclear Safety and Security	303
• Nuclear Decommissioning	326
• Reactor Protection System	336
• Passive Nuclear Safety	337
<b>Permissions</b>

## Nuclear Power: World Study

# Table of Contents

Chapter 1- Introduction

Chapter 2 - Nuclear Power in the People's Republic of China

Chapter 3 - Nuclear Power in India

Chapter 4 - Nuclear Power in Japan

Chapter 5 - Nuclear Power in North Korea & South Korea

Chapter 6 - Nuclear Power in Pakistan

Chapter 7 - Nuclear Power in France

Chapter 8 - Nuclear Power in Sweden

Chapter 9 - Nuclear Power in the United Kingdom

Chapter 10 - Nuclear Power in the United States

Chapter 11 - Nuclear Program of Iran

## Nuclear Reactor Technology & Nuclear Safety

# Table of Contents

Chapter 1 - Nuclear Reactor Technology

Chapter 2 - Advanced Gas-Cooled Reactor

Chapter 3 - Boiling Water Reactor

Chapter 4 - CANDU Reactor

Chapter 5 - Pressurized Water Reactor

Chapter 6 - RBMK

Chapter 7 - Nuclear Safety

Chapter 8 - Boiling Water Reactor Safety Systems

Chapter 9 - Control Rod

Chapter 10 - International Nuclear Event Scale

Chapter 11 - Nuclear Meltdown

Chapter 12 - Nuclear Safety in the United States

Chapter 13 - Passive Nuclear Safety

## Nuclear Reactor Technology

# Table of Contents

Chapter 1- Nuclear Reactor Technology

Chapter 2 - Advanced Gas-Cooled Reactor

Chapter 3 - Boiling Water Reactor

Chapter 4 - CANDU Reactor

Chapter 5 - Pressurized Water Reactor

Chapter 6 - RBMK

Chapter 7 - Fast Breeder Reactor

Chapter 8 - Breeder Reactor

Chapter 9 - Pebble Bed Reactor

# Table of Contents

Chapter 1 - Nuclear Safety

Chapter 2 - Boiling Water Reactor Safety Systems

Chapter 3 - Control Rod

Chapter 4 - International Nuclear Event Scale

Chapter 5 - Nuclear Meltdown

Chapter 6 - Nuclear Safety in the United States

Chapter 7 - Passive Nuclear Safety

Chapter 8 - Nuclear Law

Chapter 9 - Containment Building

Chapter 10 - Radioactive Contamination

# Table of Contents

Chapter 1 - Nuclear Technology

Chapter 2 - Deuterium

Chapter 3 - Neutron

Chapter 4 - Positron Emission Tomography

Chapter 5 - Single Photon Emission Computed Tomography

Chapter 6 - Radioisotope Thermoelectric Generator

Chapter 7 - Pebble Bed Reactor

Chapter 8 - Nuclear Engineering

Chapter 9 - Neutron Moderator

Chapter 10 - Nuclear Criticality Safety and Atomic Battery

Chapter 11 - Nuclear Fuel Cycle

Chapter 12 - Critical Mass

Chapter 13 - Neutron Poison and Neutron Source

Chapter 14 - Nuclear Decommissioning

Chapter 15 - Long-lived Fission Product and Nuclear Fusion-Fission Hybrid

Chapter 16 - Prompt Neutron and Prompt Critical

## Nuclear Technology

# Table of Contents

Chapter 1 - Nuclear Technology

Chapter 2 - Deuterium

Chapter 3 - Neutron

Chapter 4 - Positron Emission Tomography

Chapter 5 - Single Photon Emission Computed Tomography

Chapter 6 - Radioisotope Thermoelectric Generator

Chapter 7 - Pebble Bed Reactor

Chapter 8 - Advanced Boiling Water Reactor

Chapter 9 - VVER

Chapter 10 - Nuclear Weapons Testing

## Optical Devices and Materials

# Table of Contents

Chapter 1 - Binoculars

Chapter 2 - Optical Coatings

Chapter 3 - Optical Microscope

Chapter 4 - Eyepiece

## Table of Contents

Chapter 1 - Laser Diode

Chapter 2 - Photodiode

Chapter 3 - Organic Light-Emitting Diode

Chapter 4 - Blue Laser

Chapter 5 - Vertical-Cavity Surface-Emitting Laser

Chapter 6 - Quantum Well Laser and Hybrid Silicon Laser

Chapter 7 - Quantum Cascade Laser

Chapter 8 - Diode-Pumped Solid-State Laser

Chapter 9 - Superluminescent Diode

Chapter 10 - Single-Photon Avalanche Diode and Thermal Management of High-Power LEDs

Chapter 11 - PIN Diode

Chapter 12 - Phosphorescent Organic Light-Emitting Diode, Avalanche Photodiode and Laser Diode Rate Equations

# Table of Contents

Chapter 1 - Optical Lens Design

Chapter 2 - Optical Disc

Chapter 3 - Optics

Chapter 4 - Optical Aberration

Chapter 5 - Dispersion (Optics)

Chapter 6 - Optical Coherence Tomography

Chapter 7 - Opto-Isolator

Chapter 8 - Charge-Coupled Device

Chapter 9 - Blinky (Novelty)

Chapter 10 - Digital Light Processing

Chapter 11 - Laser Diode

# Table of Contents

Introduction

Chapter 1 - Optical Lens Design

Chapter 2 - Optical Disc

Chapter 3 - Optics

Chapter 4 - Optical Aberration

Chapter 5 - Dispersion (Optics)

Chapter 6 - Optical Coherence Tomography

Chapter 7 - Laser

Chapter 8 - Optical Fiber

Chapter 9 - Holography

## Optical Illusion

# Table of Contents

Chapter 1 - Optical Illusion

Chapter 2 - Autostereogram

Chapter 3 - Filling-in

Chapter 4 - Wagon-wheel Effect

Chapter 5 - Lilac Chaser and Blivet

Chapter 6 - Liquid Crystal Shutter Glasses

Chapter 7 - McCollough Effect and Barberpole Illusion

Chapter 8 - Moon Illusion and Missing Square Puzzle

Chapter 9 - Necker Cube and Impossible Object

Chapter 10 - Perceived Visual Angle

Chapter 11 - List of Optical Illusions

## Optical Phenomenons

# Table of Contents

Chapter 1 - Optical Phenomenon

Chapter 2 - Iridescence

Chapter 3 - Optical Illusion

Chapter 4 - Shadow

Chapter 5 - Zodiacal Light

Chapter 6 - Entoptic Phenomenon

Chapter 7 - Diffraction

Chapter 8 - Dispersion

Chapter 9 - Birefringence

Chapter 10 - Double-slit Experiment

Chapter 11 - Electroluminescence and Evanescent Wave

Chapter 12 - Mie Theory

Chapter 13 - Moiré Pattern

# Table of Contents

Chapter 1 - Maxwell–Boltzmann Statistics

Chapter 2 - Fermi–Dirac Statistics

Chapter 3 - Pauli Exclusion Principle

Chapter 4 - Uncertainty Principle

Chapter 5 - Spin (Physics)

Chapter 6 - Bose–Einstein statistics

Chapter 7 - Spin Network

Chapter 8 - Spin-Statistics Theorem

Chapter 9 - Fermion

Chapter 10 - Fermionic Field & Yukawa Interaction

Chapter 11 - Gauge Theory

# Particle Physics: A Comprehensive Introduction

## Table of Contents

<b>Preface</b>	<b>VII</b>
<b>Chapter 1 Introduction to Particle Physics</b>	<b>1</b>
<b>Chapter 2 Fundamentals of Particle Physics</b>	<b>7</b>
i. Field (Physics)	7
ii. Weak Interaction	17
iii. Strong Interaction	24
iv. Electroweak Interaction	28
<b>Chapter 3 Theories of Particle Physics</b>	<b>34</b>
i. Quantum Chromodynamics	34
ii. Quantum Field Theory	45
iii. Gauge Theory	67
iv. Peccei–Quinn Theory	81
<b>Chapter 4 Standard Models of Particle Physics</b>	<b>83</b>
i. Standard Model	83
ii. Standard Model (Mathematical Formulation)	93
iii. Higgs Mechanism	110
iv. Cabibbo–Kobayashi–Maskawa Matrix	121
v. Spontaneous Symmetry Breaking	128
<b>Chapter 5 Elementary Particles of Particle Physics</b>	<b>136</b>
i. Elementary Particle	136
ii. Quark	144
iii. Photon	157
iv. Lepton	174
v. Gluon	182
vi. W and Z Bosons	186
vii. Higgs Boson	192
viii. Fermion	221
ix. Antimatter	223
x. Boson	232
<b>Chapter 6 Technologies Related to Particle Physics</b>	<b>237</b>
i. Particle Accelerator	237
ii. Accelerator Physics	253
iii. Particle Physics Experiments	256

# Particle Physics: A Comprehensive Introduction

Chapter 7 Evolution of Particle Physics

262

**Permissions**

**Index**

## Particle Physics

# Table of Contents

Chapter 1 - Introduction to Particle Physics

Chapter 2 - Subatomic Particle and Standard Model

Chapter 3 - Elementary Particle and Strong Interaction

Chapter 4 - Magnetic Monopole

Chapter 5 - Meson and Boson

Chapter 6 - String Theory

## **Particles of the Standard Model (Particle Physics)**

# **Table of Contents**

Chapter 1 - Standard Model

Chapter 2 - Quark

Chapter 3 - Lepton

Chapter 4 - Neutrino

Chapter 5 - Electron and Electron Neutrino

Chapter 6 - Muon and Muon Neutrino

Chapter 7 - Tau and Tau Neutrino

Chapter 8 - Gauge Boson and Gluon

Chapter 9 - Photon

Chapter 10 - Higgs Boson

Chapter 11 - Meson

Chapter 12 - Baryon

Chapter 13 - Hadron

## Pendulum in Physics

# Table of Contents

Chapter 1 - Pendulum

Chapter 2 - Gridiron Pendulum and Kater's Pendulum

Chapter 3 - Ballistic Pendulum

Chapter 4 - Conical Pendulum and Doubochinski's Pendulum

Chapter 5 - Foucault Pendulum

Chapter 6 - Foucault Pendulum Vector Diagrams

Chapter 7 - Furuta Pendulum

Chapter 8 - Pendulum (Mathematics)

## Phase Changes and Transitions (Concepts and Applications)

# Table of Contents

Chapter 1 - Crystallization

Chapter 2 - Supercooling and Enthalpy of Fusion

Chapter 3 - Melting Point and Boiling Point

Chapter 4 - Distillation

Chapter 5 - Evaporation and Leidenfrost Effect

Chapter 6 - Boiling–Point Elevation and Boiling Water Reactor

Chapter 7 - Phase Transition

Chapter 8 - Boiling

Chapter 9 - Ferromagnetism

Chapter 10 - Freezing

Chapter 11 - Glass Transition

Chapter 12 - Liquid Crystal

Chapter 13 - Spinodal Decomposition

Chapter 14 - Sublimation and Fréedericksz Transition

## Phase of Matter & Thermodynamic System

# Table of Contents

Chapter 1 - Phase (matter)

Chapter 2 - Phase Transition

Chapter 3 - States of Matter

Chapter 4 - Superfluid

Chapter 5 - Thermodynamic System

Chapter 6 - Phase Diagram

## **Table of Contents**

Chapter 1 - Phase Transition

Chapter 2 - Boiling

Chapter 3 - Crystallization

Chapter 4 - Ferromagnetism

Chapter 5 - Freezing

Chapter 6 - Glass Transition

Chapter 7 - Liquid Crystal

Chapter 8 - Spinodal Decomposition

Chapter 9 - Sublimation and Fréedericksz Transition

Chapter 10 - Superconductivity

## Philosophy of Physics

# Table of Contents

Introduction

Chapter 1 - Time in Physics

Chapter 2 - Time Travel

Chapter 3 - Space

Chapter 4 - Interpretation & Philosophy of Quantum Mechanics

Chapter 5 - Uncertainty Principle

Chapter 6 - Philosophy of Thermal and Statistical Physics

# Philosophy of Thermal and Statistical Physics

## Table of Contents

Introduction

Chapter 1 - Entropy

Chapter 2 - Brownian Ratchet

Chapter 3 - Entropy in Thermodynamics and Information Theory

Chapter 4 - Maximum Entropy Thermodynamics

Chapter 5 - Loschmidt's Paradox & Ergodic Hypothesis

Chapter 6 - H-Theorem

Chapter 7 - Maxwell's Demon

Chapter 8 - Statistical Ensemble (Mathematical Physics)

Chapter 9 - T-Symmetry

Chapter 10 - First Law of Thermodynamics

Chapter 11 - Third Law of Thermodynamics

Chapter 12 - Zeroth Law of Thermodynamics

# Table of Contents

Chapter 1 - Photonics

Chapter 2 - Photonic Crystal

Chapter 3 - Photonic-Crystal Fiber

Chapter 4 - Biophotonics

Chapter 5 - Bloch Wave – MoM Method

Chapter 6 - Fiber–Optic Communication

Chapter 7 - Diffraction Grating

Chapter 8 - Monte Carlo Method for Photon Transport

Chapter 9 - Nanophotonics

Chapter 10 - Silicon Photonics

Chapter 11 - Optical Hybrid

Chapter 12 - Opto–Isolator

Chapter 13 - Charge–Coupled Device

Chapter 14 - Blinky (Novelty)

Chapter 15 - Digital Light Processing

Chapter 16 - Laser Diode

## **Photonics (science and technology of generating and controlling photons)**

# **Table of Contents**

Chapter 1 - Photonics

Chapter 2 - Photonic Crystal

Chapter 3 - Photonic-Crystal Fiber

Chapter 4 - Biophotonics

Chapter 5 - Bloch Wave – MoM Method

Chapter 6 - Fiber-Optic Communication

Chapter 7 - Diffraction Grating

Chapter 8 - Monte Carlo Method for Photon Transport

Chapter 9 - Nanophotonics

Chapter 10 - Silicon Photonics

Chapter 11 - Optical Hybrid

Chapter 12 - Optical Tweezers

Chapter 13 - Time Stretch Analog-to-Digital Converter

Chapter 14 - Slot-Waveguide

Chapter 15 - Subwavelength-Diameter Optical Fibre & Optical Interleaver

# Table of Contents

Chapter 1 - Diffraction

Chapter 2 - Polarization (Waves)

Chapter 3 - Airy Disk

Chapter 4 - Adaptive–Additive Algorithm

Chapter 5 - Fourier Optics

Chapter 6 - Total Internal Reflection

Chapter 7 - Nonlinear Optics

Chapter 8 - 3D Optical Data Storage

Chapter 9 - Acousto–Optics

Chapter 10 - Cross–Polarized Wave Generation & Electro–Optic Modulator

Chapter 11 - GRENOUILLE

Chapter 12 - Kerr Effect

Chapter 13 - Kerr–Lens Modelocking

Chapter 14 - Quasi-Phase-Matching

Chapter 15 - Optical Parametric Oscillator & Multiphoton Intrapulse  
Interference Phase Scan

Chapter 16 - Second–Harmonic Generation

## Physical Constants

# Table of Contents

Chapter 1 - Physical Constant

Chapter 2 - Gravitational Constant

Chapter 3 - Planck Constant

Chapter 4 - Vacuum Permittivity

Chapter 5 - Elementary Charge

Chapter 6 - Oort Constants

Chapter 7 - Fine-structure Constant

Chapter 8 - Avogadro Constant

Chapter 9 - Natural Units

Chapter 10 - Dimensionless Quantity

Chapter 11 - Speed of Light

Chapter 12 - Time Constant

# Table of Contents

Introduction

Chapter 1 - Diffraction

Chapter 2 - Polarization (Waves)

Chapter 3 - Airy Disk

Chapter 4 - Adaptive-Additive Algorithm

Chapter 5 - Fourier Optics

Chapter 6 - Total Internal Reflection

Chapter 7 - Transfer-Matrix Method (Optics)

Chapter 8 - Interference (Wave Propagation)

# Table of Contents

Introduction

Chapter 1 - Polarization (Waves)

Chapter 2 - Airy Disk

Chapter 3 - Interference (Wave Propagation)

Chapter 4 - Transfer-Matrix Method (Optics)

Chapter 5 - Fourier Optics

Chapter 6 - Optical Phase Space

Chapter 7 - Displacement Operator and Englert–Greenberger Duality Relation

Chapter 8 - Hanbury Brown and Twiss Effect

Chapter 9 - Hong–Ou–Mandel Effect

Chapter 10 - Quantum Amplifier

Chapter 11 - Quantum Reflection

## Physics of Force and Friction (Concepts and Applications)

# Table of Contents

Chapter 1 - Newton's Laws of Motion

Chapter 2 - Descriptions and Applications of Different Forces in Physics

Chapter 3 - Fundamental Models of Force

Chapter 4 - Non-Fundamental Forces

Chapter 5 - Friction

Chapter 6 - Viscosity

Chapter 7 - Plastic Deformation in Solids

Chapter 8 - Types of Friction

## Physics of Velocity and Pressure

# Table of Contents

- Chapter 1 - Introduction to Velocity
- Chapter 2 - Angular Velocity and Escape Velocity
- Chapter 3 - Group Velocity and Proper Velocity
- Chapter 4 - Four-velocity and Terminal Velocity
- Chapter 5 - Speed of Light
- Chapter 6 - Introduction to Pressure
- Chapter 7 - Pressure Measurement
- Chapter 8 - Vapor Pressure
- Chapter 9 - Partial Pressure
- Chapter 10 - Pressure Sensor and Atmospheric Pressure

# Table of Contents

Chapter 1 - Aharonov–Bohm Effect

Chapter 2 - Butterfly Effect

Chapter 3 - Biefeld–Brown Effect

Chapter 4 - Coanda Effect

Chapter 5 - Charge Separation

Chapter 6 - Coriolis Effect

Chapter 7 - Doppler Broadening & Mossbauer Effect

Chapter 8 - Stark Effect

Chapter 9 - Thermoelectric Effect

Chapter 10 - Zeeman Effect

Chapter 11 - Radiation Pressure

Chapter 12 - Photoacoustic Doppler Effect

## Polarization (Fundamental Physics Concept)

# Table of Contents

Chapter 1 - Polarization (Waves)

Chapter 2 - Photon Polarization

Chapter 3 - Circular Polarization

Chapter 4 - Polarizer

## Potential and Energy Physics (Concepts and Applications)

# Table of Contents

Chapter 1 - Potential Energy

Chapter 2 - Gravitational Potential

Chapter 3 - Elastic Energy

Chapter 4 - Chemical Potential

Chapter 5 - Electric Potential Energy

Chapter 6 - Electric Potential

Chapter 7 - Convective Available Potential Energy

Chapter 8 - Chemical Thermodynamics

## Table of Contents

<b>Preface</b>	<b>VII</b>
<b>Chapter 1 Introduction to Power and Energy Engineering</b>	<b>1</b>
i. Power Engineering	1
ii. Energy Engineering	9
iii. Electrical Engineering	11
<b>Chapter 2 Power Electronics: Features and Applications</b>	<b>29</b>
i. Power Electronics	29
ii. DC-to-DC Converter	47
iii. Rectifier	54
iv. Power Inverter	74
<b>Chapter 3 Methods of Generating Electricity</b>	<b>90</b>
i. Static Electricity	90
ii. Wind Turbine	98
iii. Electromagnetic Induction	113
iv. Photovoltaics	121
<b>Chapter 4 Electric Power System: An Overview</b>	<b>143</b>
i. Electric Power System	143
ii. Electric Power Distribution	153
iii. Electric Power Transmission	161
iv. Power-system Protection	183
v. Transformer	188
vi. Fault Current Limiter	211
<b>Chapter 5 Analysis of Power Engineering</b>	<b>215</b>
i. Power-flow Study	215
ii. One-line Diagram	219
<b>Chapter 6 Essential Aspects of Power and Energy Engineering</b>	<b>221</b>
i. Electricity Generation	221
ii. Efficient Energy Use	229
iii. Alternative Energy	245
<b>Permissions</b>	
<b>Index</b>	

## Table of Contents

Chapter 1 - Precession

Chapter 2 - Axial Precession (Astronomy)

Chapter 3 - Apsidal Precession and Larmor Precession

Chapter 4 - Axial Tilt

Chapter 5 - Nutation and Polar Motion

Chapter 6 - Precession (Mechanical) and Thomas Precession

Chapter 7 - Rigid Body

Chapter 8 - Rigid Body Dynamics

Chapter 9 - Angular Velocity

Chapter 10 - Kinetic Energy of Rigid Bodies

Chapter 11 - Rigid Rotor

# Pressure, Viscosity and Important Concepts of Fluid Dynamics

## Table of Contents

Chapter 1 - Introduction to Pressure

Chapter 2 - Pressure Measurement

Chapter 3 - Vapor Pressure

Chapter 4 - Partial Pressure

Chapter 5 - Pressure Sensor and Atmospheric Pressure

Chapter 6 - Viscosity

Chapter 7 - Important Concepts of Viscosity

Chapter 8 - Viscometer

Chapter 9 - Viscoelasticity

Chapter 10 - Rheology

# Table of Contents

Chapter 1 - Prism (optics)

Chapter 2 - Dispersive Prisms

Chapter 3 - Reflective Prisms

Chapter 4 - Polarizing Prisms

Chapter 5 - Antiprism

Chapter 6 - Triangular Antiprism

Chapter 7 - Prism (geometry)

## Prominent Theorems and Conservation Laws in Physics

# Table of Contents

Chapter 1 - Bell's Theorem

Chapter 2 - Buckingham  $\pi$  Theorem

Chapter 3 - Adiabatic Theorem

Chapter 4 - Earnshaw's Theorem

Chapter 5 - Equipartition Theorem

Chapter 6 - Fluctuation–Dissipation Theorem

Chapter 7 - Hellmann–Feynman Theorem

Chapter 8 - Conservation of Energy

Chapter 9 - Conservation of Mass

Chapter 10 - Charge Conservation

Chapter 11 - Mass–Energy Equivalence

Chapter 12 - Momentum

Chapter 13 - Parity (Physics)

Chapter 14 - Angular Momentum

## Redshift & Doppler Effects in Physics & Cosmology

# Table of Contents

Chapter 1 - Redshift

Chapter 2 - Gravitational Redshift

Chapter 3 - Metric Expansion of Space

Chapter 4 - Doppler Effect and Relativistic Doppler Effect

Chapter 5 - Doppler Cooling

Chapter 6 - Lorentz Factor and Photoacoustic Doppler Effect

Chapter 7 - Doppler Broadening and Doppler Imaging

# Table of Contents

Chapter 1 - Reflection

Chapter 2 - Diffuse Reflection and Retroreflector

Chapter 3 - Total Internal Reflection

Chapter 4 - Reflection Seismology

Chapter 5 - Anti-reflective Coating

## **Refraction and Reflection Physics (Concepts and Applications)**

### **Table of Contents**

Chapter 1 - Refraction

Chapter 2 - Snell's Law

Chapter 3 - Refractive Index

Chapter 4 - Negative Index Metamaterials

Chapter 5 - Reflection

Chapter 6 - Diffuse Reflection and Retroreflector

Chapter 7 - Total Internal Reflection

Chapter 8 - Reflection Seismology

## Refraction Physics (Concepts and Applications)

# Table of Contents

Chapter 1 - Refraction

Chapter 2 - Snell's Law

Chapter 3 - Refractive Index

Chapter 4 - Negative Index Metamaterials

Chapter 5 - Birefringence

## Rigid Body and Fundamental Concepts of Classical Mechanics

# Table of Contents

Chapter 1 - Rigid Body

Chapter 2 - Rigid Body Dynamics

Chapter 3 - Angular Velocity

Chapter 4 - Kinetic Energy of Rigid Bodies

Chapter 5 - Rigid Rotor

Chapter 6 - Moment of Inertia

## Table of Contents

Chapter 1 - Scattering Theory

Chapter 2 - Absorption (Electromagnetic Radiation)

Chapter 3 - Backscatter and Brillouin Scattering

Chapter 4 - Beer–Lambert Law

Chapter 5 - Computational Electromagnetics

Chapter 6 - Dynamic Light Scattering

Chapter 7 - Opacity (Optics) and Opposition Surge

Chapter 8 - Optical Depth and Optical Theorem

Chapter 9 - Geometric Albedo and Lambertian Reflectance

Chapter 10 - Light Scattering

Chapter 11 - Light Scattering by Particles and Mathematical Descriptions of Opacity

Chapter 12 - Mie Theory

Chapter 13 - Multiangle Light Scattering

Chapter 14 - Phase Curve (Astronomy)

Chapter 15 - Raman Scattering

Chapter 16 - Rayleigh Scattering

Chapter 17 - Scattering

## Science of Atoms and Molecules

# Table of Contents

Chapter 1 - Introduction to Atom

Chapter 2 - Atomic Number and Exotic Atom

Chapter 3 - Helium Atom

Chapter 4 - Hydrogen Atom

Chapter 5 - Hydrogen-like Atom

Chapter 6 - Atomic Mass

Chapter 7 - Atomic Radius

Chapter 8 - Molecule

Chapter 9 - History of Molecular Theory

Chapter 10 - Molecular Geometry

Chapter 11 - Diatomic Molecule

Chapter 12 - Molecular Hamiltonian

Chapter 13 - Molecular Orbital

Chapter 14 – Biomolecule

Chapter 15 - Membrane-active Molecules

## Science of Atoms

# Table of Contents

Chapter 1 - Introduction to Atom

Chapter 2 - Atomic Number and Exotic Atom

Chapter 3 - Helium Atom

Chapter 4 - Hydrogen Atom

Chapter 5 - Hydrogen-like Atom

Chapter 6 - Atomic Mass

Chapter 7 - Atomic Radius

Chapter 8 - Chemical Element

Chapter 9 - Atomic Nucleus

# Table of Contents

Chapter 1 - Molecule

Chapter 2 - History of Molecular Theory

Chapter 3 - Molecular Geometry

Chapter 4 - Diatomic Molecule

Chapter 5 - Molecular Hamiltonian

Chapter 6 - Molecular Orbital

Chapter 7 - Biomolecule

Chapter 8 - Membrane-active Molecules

Chapter 9 - Polymer

## Table of Contents

Chapter 1 - Introduction to Sound

Chapter 2 - Speed of Sound

Chapter 3 - Acoustics and Noise

Chapter 4 - Sound Wave Properties and Characteristics

Chapter 5 - Sound Pressure

Chapter 6 - Ocean Acoustic Tomography and Wave Equation

Chapter 7 - Underwater Acoustics

Chapter 8 - Acoustic Metamaterials

Chapter 9 - Musical Acoustic

## Specific Fields of Physics

# Table of Contents

Chapter 1 - Acoustics and Astrophysics

Chapter 2 - Atomic Physics and Optics

Chapter 3 - Computational Physics and Condensed Matter Physics

Chapter 4 - Nuclear Physics and Particle Physics

Chapter 5 - Plasma

## **Speed of Light and Speed of Sound (Concepts and Applications)**

# **Table of Contents**

Chapter 1 - Speed of Light

Chapter 2 - Transparency and Translucency

Chapter 3 - Faster-than-light

Chapter 4 - Rømer's Determination of the Speed of Light

Chapter 5 - Speed of Sound

## State Functions in Thermodynamics

# Table of Contents

Introduction

Chapter 1 - Density

Chapter 2 - Enthalpy

Chapter 3 - Exergy

Chapter 4 - Internal Energy

Chapter 5 - Gibbs Free Energy

Chapter 6 - Mass

Chapter 7 - Pressure

Chapter 8 - Volume (Thermodynamics)

Chapter 9 - Thermodynamic Temperature

Chapter 10 - Fugacity

## State of Matter

# Table of Contents

Introduction

Chapter 1 - Classical States of Matter

Chapter 2 - Non-Classical States of Matter

Chapter 3 - Low-Temperature States of Matter

Chapter 4 - High-Energy States of Matter

# Table of Contents

- Chapter 1 - Classical States of Matter
- Chapter 2 - Non-Classical States of Matter
- Chapter 3 - Low-Temperature States of Matter
- Chapter 4 - Negative Mass
- Chapter 5 - Dark Matter
- Chapter 6 - Bose-Einstein Condensate
- Chapter 7 - Compact Star
- Chapter 8 - Degenerate Matter
- Chapter 9 - Quark Star and Strange Matter
- Chapter 10 - Weakly Interacting Massive Particles
- Chapter 11 - White Dwarf

## **Subatomic Particles and Standard Model of Particle Physics**

# **Table of Contents**

Chapter 1 - Elementary Particle

Chapter 2 - Antimatter

Chapter 3 - Ultra-High-Energy Cosmic Ray

Chapter 4 - Tachyon

Chapter 5 - Boson and Positronium

Chapter 6 - Fermion and Gluon

Chapter 7 - Atomic Nucleus

Chapter 8 - Standard Model

Chapter 9 - Quark

Chapter 10 - Lepton

Chapter 11 - Neutrino

Chapter 12 - Electron and Electron Neutrino

Chapter 13 - Muon and Muon Neutrino

Chapter 14 - Tau and Tau Neutrino

Chapter 15 - Gauge Boson

Chapter 16 - Photon

Chapter 17 - Higgs Boson

## Subatomic Particles in Physics

# Table of Contents

Introduction

Chapter 1 - Elementary Particle

Chapter 2 - Antimatter

Chapter 3 - Ultra-High-Energy Cosmic Ray

Chapter 4 - Tachyon

Chapter 5 - Boson and Positronium

Chapter 6 - Fermion and Gluon

Chapter 7 - Atomic Nucleus

Chapter 8 - Quark

Chapter 9 - Standard Model

Chapter 10 - Baryon and Hadron

## Systems of Units

# Table of Contents

Chapter 1 - Metric System

Chapter 2 - Imperial Units

Chapter 3 - Astronomical System of Units

## Telescope Types and Classifications

# Table of Contents

Chapter 1 - Astrograph

Chapter 2 - Infrared Telescope

Chapter 3 - Spitzer Space Telescope

Chapter 4 - Existing Infrared Telescopes

Chapter 5 - Meridian Circle

Chapter 6 - Robotic Telescope

Chapter 7 - Solar Telescope

Chapter 8 - Notable Solar Telescopes

Chapter 9 - Other Significant Telescopes

# Temperature and State Functions in Physics (Basic Concepts, Units, Measurements and Applications)

## Table of Contents

Chapter 1 - Introduction to Temperature

Chapter 2 - Thermodynamic Temperature

Chapter 3 - Celsius and Fahrenheit

Chapter 4 - Thermometer

Chapter 5 - Conversion of Units of Temperature

Chapter 6 - Density

Chapter 7 - Enthalpy

Chapter 8 - Exergy

Chapter 9 - Internal Energy

Chapter 10 - Gibbs Free Energy

Chapter 11 - Mass

Chapter 12 - Pressure

## Table of Contents

Chapter 1 - Introduction to Temperature

Chapter 2 - Thermodynamic Temperature

Chapter 3 - Celsius and Fahrenheit

Chapter 4 - Thermometer

Chapter 5 - Conversion of Units of Temperature

Chapter 6 - Scale of Temperature

Chapter 7 - Orders of Magnitude

## Theorems of Physics

# Table of Contents

Chapter 1 - Poynting's Theorem

Chapter 2 - Runge–Gross Theorem

Chapter 3 - No-Communication Theorem

Chapter 4 - Shell Theorem

Chapter 5 - Wick's Theorem

Chapter 6 - Noether's Theorem

Chapter 7 - Liouville's Theorem (Hamiltonian)

Chapter 8 - Mermin–Wagner Theorem

Chapter 9 - Leggett–Garg Inequality & Kutta–Joukowski Theorem

Chapter 10 - Bohr–Van Leeuwen Theorem

Chapter 11 - H-Theorem & Clausius Theorem

Chapter 12 - Kochen–Specker Theorem

## Theories of Gravitation

# Table of Contents

Chapter 1 - Quantum Gravity

Chapter 2 - Bimetric Theory and Brans–Dicke Theory

Chapter 3 - Conformal Gravity and Cosmological Constant

Chapter 4 - Einstein Aether Theory and Einstein–Cartan Theory

Chapter 5 - Entropic Gravity and Gravitational Field

Chapter 6 - Kaluza–Klein Theory

Chapter 7 - Le Sage's Theory of Gravitation

Chapter 8 - Modified Newtonian Dynamics

Chapter 9 - Nordström's Theory of Gravitation

# Thermodynamic Free Energy and Thermodynamic Entropy

## Table of Contents

Chapter 1 - Thermodynamic Free Energy

Chapter 2 - Exergy

Chapter 3 - Flory–Huggins Solution Theory

Chapter 4 - Helmholtz Free Energy

Chapter 5 - Standard Gibbs Function of Formation

Chapter 6 - Entropy

Chapter 7 - Maximum Entropy Thermodynamics

Chapter 8 - Entropy (arrow of time)

Chapter 9 - Entropy and Life

Chapter 10 - Geometrical Frustration

Chapter 11 - Entanglement Distillation

Chapter 12 - Isentropic Process

## Thermodynamic Processes

# Table of Contents

Chapter 1 - Adiabatic Process

Chapter 2 - Gas

Chapter 3 - Thermodynamic Process

Chapter 4 - Isentropic Process

Chapter 5 - Isobaric Process

Chapter 6 - Isochoric Process & Isothermal Process

Chapter 7 - Cryogenic Nitrogen Plant

Chapter 8 - Supercooling & Superheating

Chapter 9 - Polytropic Process

Chapter 10 - Quasistatic Process & Reversible Process (Thermodynamics)

Chapter 11 - Thermodynamic Cycle

Chapter 12 - Phase Transition

Chapter 13 - Critical Point (Thermodynamics)

Chapter 14 - Triple Point

Chapter 15 - Melting Point

## Thermodynamic Properties

# Table of Contents

Chapter 1 - Activity (Chemistry)

Chapter 2 - Chemical Potential

Chapter 3 - Enthalpy of Fusion

Chapter 4 - Fugacity

Chapter 5 - Heat of Combustion

Chapter 6 - Vapor Pressure, Vapour Pressure of Water & Volumetric Heat Capacity

Chapter 7 - Enthalpy of vaporization

Chapter 8 - Temperature

Chapter 9 - State Function

Chapter 10 - Enthalpy

Chapter 11 - Thermodynamic Temperature

## Thermoelectric Effect (Principles and Applications)

# Table of Contents

Chapter 1 - Thermoelectric Effect

Chapter 2 - Thermocouple

Chapter 3 - Thermoelectric Materials

Chapter 4 - Radioisotope Thermoelectric Generator

## Time Dilation and Theories of Relativity

# Table of Contents

Chapter 1 - Time Dilation

Chapter 2 - Gravitational Time Dilation

Chapter 3 - Special Relativity and General Relativity

Chapter 4 - Twin Paradox

Chapter 5 - Proper Time

## **Transistor and its Types (Semiconductor Devices)**

# **Table of Contents**

Chapter 1 - Introduction to Transistor

Chapter 2 - Bipolar Junction Transistor

Chapter 3 - Types of Transistor

## Transparent Materials

# Table of Contents

Chapter 1 - Transparency and Translucency

Chapter 2 - Properties of Water

Chapter 3 - Sol-gel

Chapter 4 - Transparent Ceramics

Chapter 5 - Polyethylene Terephthalate

Chapter 6 - Poly(methyl methacrylate)

Chapter 7 - Polycarbonate

Chapter 8 - Polylactic Acid

Chapter 9 - Diamond and Ice

# Types and Applications of Distortion in Optics, Electronics and Signal Processing

## Table of Contents

Chapter 1 - Introduction to Distortion

Chapter 2 - Distortion (Optics)

Chapter 3 - Distortion (Music)

Chapter 4 - Distortion Power Factor

Chapter 5 - Types of Distortion

Chapter 6 - Electronic Amplifier

## Types of Magnets

# Table of Contents

Chapter 1 - Cow Magnet, Dipole Magnet and Molecule-Based Magnets

Chapter 2 - Electromagnet

Chapter 3 - Magnet

Chapter 4 - Neodymium Magnet

Chapter 5 - Plastic Magnet, Programmable Magnet and Quadrupole Magnet

Chapter 6 - Rare-Earth Magnet

Chapter 7 - Refrigerator Magnet

Chapter 8 - Samarium–Cobalt Magnet

Chapter 9 - Single-Molecule Magnet

Chapter 10 - Superconducting Magnet

Chapter 11 - Photomagnetism and Sextupole Magnet

Chapter 12 - Particle Accelerator

## Types, Safety and Applications of Lasers

# Table of Contents

Chapter 1 - Types and Operating Principles of Lasers

Chapter 2 - Laser Safety

Chapter 3 - Laser Pointer

Chapter 4 - Laser Beam Profiler

Chapter 5 - Laser Cutting

Chapter 6 - Laser Engraving and Laser Welding

## **Underwater Acoustics and its Applications**

# **Table of Contents**

Chapter 1 - Introduction to Underwater Acoustics

Chapter 2 - Applications of Underwater Acoustics

Chapter 3 - Ocean Acoustic Tomography

Chapter 4 - SOFAR Channel and Echo Sounding

Chapter 5 - Speed of Sound

## Units of Mass

# Table of Contents

Chapter 1 - Kilogram

Chapter 2 - Ton and Tonne

Chapter 3 - Ounce and Grain

Chapter 4 - Pound

Chapter 5 - Maund and Candy

Chapter 6 - Carat, Tael, Batman (unit) and Kendrick Mass

Chapter 7 - Apothecaries' System

## Units of Power, Pressure and Force

# Table of Contents

Chapter 1 - Watt

Chapter 2 - Horsepower

Chapter 3 - Orders of Magnitude

Chapter 4 - Diverse Units of Power

Chapter 5 - Torr

Chapter 6 - Pascal and Pounds Per Square Inch

Chapter 7 - Atmosphere (unit) and Bar (unit)

Chapter 8 - Diverse Units of Pressure

Chapter 9 - Newton (unit), Poundal, Pound-force and Planck Force

## Units of Power, Pressure, Force and Mass

# Table of Contents

Chapter 1 - Watt

Chapter 2 - Horsepower

Chapter 3 - Orders of Magnitude

Chapter 4 - Diverse Units of Power

Chapter 5 - Torr

Chapter 6 - Pascal and Pounds Per Square Inch

Chapter 7 - Atmosphere (unit) and Bar (unit)

Chapter 8 - Kilogram

Chapter 9 - Ton and Tonne

Chapter 10 - Ounce and Grain

Chapter 11 - Pound

Chapter 12 - Maund and Candy

Chapter 13 - Carat, Tael, Batman (unit) and Kendrick Mass

## Units of Speed and Time

# Table of Contents

Chapter 1 - Orders of Magnitude

Chapter 2 - Speed of Sound

Chapter 3 - Speed of Light

Chapter 4 - Variable Speed of Light

Chapter 5 - Kilometres, Miles and Metre Per Hour

Chapter 6 - Knot, Inch Per Second and Metre Per Second

Chapter 7 - Week

Chapter 8 - Year

Chapter 9 - Month

Chapter 10 - Millennium

Chapter 11 - Second

Chapter 12 - Cenomanian

## Units of Speed, Time and Mass

# Table of Contents

Chapter 1 - Orders of Magnitude

Chapter 2 - Speed of Sound

Chapter 3 - Speed of Light

Chapter 4 - Variable Speed of Light

Chapter 5 - Kilometres, Miles and Metre Per Hour

Chapter 6 - Knot, Inch Per Second and Metre Per Second

Chapter 7 - Week

Chapter 8 - Year

Chapter 9 - Month

Chapter 10 - Millennium

Chapter 11 - Kilogram

Chapter 12 - Ton and Tonne

Chapter 13 - Ounce and Grain

Chapter 14 - Pound

Chapter 15 - Maund and Candy

## Unsolved Areas & Solutions of General Relativity

# Table of Contents

Chapter 1 - Supergravity

Chapter 2 - Quantum Gravity

Chapter 3 - Canonical Quantum Gravity & Superspace

Chapter 4 - ADM Formalism

Chapter 5 - Kaluza–Klein Theory

Chapter 6 - Dark Matter

Chapter 7 - Graviton

Chapter 8 - Dark Matter Halo

Chapter 9 - Godel Metric

Chapter 10 - Friedmann–Lemaître–Robertson–Walker Metric

Chapter 11 - Milne Model & Kasner Metric

Chapter 12 - PP-Wave Spacetime

Chapter 13 - Kerr Metric

## Unsolved Problems in Physics and Chemistry

# Table of Contents

Chapter 1 - Black Hole Information Paradox

Chapter 2 - Hawking Radiation

Chapter 3 - Cosmic Censorship Hypothesis

Chapter 4 - Principle of Locality

Chapter 5 - Ultimate Fate of the Universe

Chapter 6 - Quantum Gravity

Chapter 7 - Higgs Mechanism

Chapter 8 - Magnetic Monopole

Chapter 9 - Pioneer Anomaly

Chapter 10 - Strange Matter and Unified Field Theory

Chapter 11 - Homochirality

Chapter 12 - Chemical Reaction

Chapter 13 - On Water Reaction

Chapter 14 - Alkane Stereochemistry

Chapter 15 - Alpha Effect and Water Cluster

Chapter 16 - Extended Periodic Table

Chapter 17 - Phase Diagram

Chapter 18 - Non-Classical Ion

Chapter 19 - Superconductivity (Physical Chemistry)

# Table of Contents

Chapter 1 - Ultra-High Vacuum

Chapter 2 - Vacuum Flange

Chapter 3 - Vacuum Packing and Vacuum Evaporation

Chapter 4 - Vacuum Deposition and Vacuum Chamber

Chapter 5 - Thermal Spraying

Chapter 6 - Vacuum Brake

Chapter 7 - Diffusion Pump and Sorption Pump

Chapter 8 - Titanium Sublimation Pump and Turbomolecular Pump

Chapter 9 - Vacuum Tube

Chapter 10 - Helium Mass Spectrometer

Chapter 11 - Turbopump

## Vacuum: Fundamental Physics Concept (Concepts and Applications)

# Table of Contents

Chapter 1 - Introduction to Vacuum

Chapter 2 - Outer Space

Chapter 3 - Vacuum Pump

Chapter 4 - Pressure Measurement

Chapter 5 - Vacuum Tube

Chapter 6 - Vacuum State

# Table of Contents

Chapter 1 - Introduction to Vacuum

Chapter 2 - Outer Space

Chapter 3 - Vacuum Pump

Chapter 4 - Pressure Measurement

Chapter 5 - Vacuum Tube

Chapter 6 - Ultra-High Vacuum

Chapter 7 - Vacuum Flange

Chapter 8 - Vacuum Packing and Vacuum Evaporation

Chapter 9 - Vacuum Deposition and Vacuum Chamber

Chapter 10 - Thermal Spraying

Chapter 11 - Vacuum Brake

Chapter 12 - Diffusion Pump and Sorption Pump

Chapter 13 - Titanium Sublimation Pump and Turbomolecular Pump

## Velocity Physics

# Table of Contents

Chapter 1 - Introduction to Velocity

Chapter 2 - Angular Velocity and Escape Velocity

Chapter 3 - Group Velocity and Proper Velocity

Chapter 4 - Four-velocity and Terminal Velocity

Chapter 5 - Speed of Light

Chapter 6 - Speed of Sound

Chapter 7 - Equations of Motion and Doppler Spectroscopy

## Viscosity and Important Concepts in Fluid Dynamics

# Table of Contents

Chapter 1 - Viscosity

Chapter 2 - Important Concepts of Viscosity

Chapter 3 - Viscometer

Chapter 4 - Viscoelasticity

Chapter 5 - Rheology

Chapter 6 - Hagen–Poiseuille Equation

# Table of Contents

Chapter 1 - Diffraction

Chapter 2 - Doppler Effect

Chapter 3 - Wave Power

Chapter 4 - Coherence (Physics)

Chapter 5 - Double-Slit Experiment

Chapter 6 - Group Velocity

Chapter 7 - Lamb Waves

Chapter 8 - Longitudinal Wave

Chapter 9 - Phase (Waves)

Chapter 10 - Wave Packet

Chapter 11 - Wave Vector

Chapter 12 - Wave Propagation & Wave Impedance

Chapter 13 - Standing Wave Ratio

Chapter 14 - Surface Wave

# Wave Physics and Engineering (Concepts and Applications)

## Table of Contents

Chapter 1 - Wave Equation

Chapter 2 - Phase Velocity and Group Velocity

Chapter 3 - Plane Waves and Standing Waves

Chapter 4 - Dispersion (optics)

Chapter 5 - Seismic Wave

Chapter 6 - Electromagnetic Radiation

Chapter 7 - Wave Function

Chapter 8 - Airy Wave Theory

Chapter 9 - Rogue Wave

Chapter 10 - Cnoidal Wave

Chapter 11 - Stokes Drift

Chapter 12 - Breaking Wave

Chapter 13 - Radiation Stress

Chapter 14 - Internal Wave & Kelvin Wave

Chapter 15 - Wave Radar

Chapter 16 - Wave Shoaling & Wind Wave Model

Chapter 17 - Mild-Slope Equation

# Table of Contents

Chapter 1 - Wave Equation

Chapter 2 - Phase Velocity and Group Velocity

Chapter 3 - Plane Waves and Standing Waves

Chapter 4 - Dispersion (optics)

Chapter 5 - Seismic Wave

Chapter 6 - Electromagnetic Radiation

Chapter 7 - Wave Function

Chapter 8 - Gravitational Wave

Chapter 9 - Amplitude Modulation and Frequency Modulation

## **Weight and Mass: Basic Physical Quantities (Concepts and Applications)**

# **Table of Contents**

Chapter 1 - Weight

Chapter 2 - Mass versus Weight and Apparent Weight

Chapter 3 - Weighing Scale

Chapter 4 - Body Mass Index

Chapter 5 - Atomic Weight and Specific Weight

Chapter 6 - Mass

## World Study of Nuclear Power and Solar Power

# Table of Contents

Chapter 1 - Introduction to Nuclear Power

Chapter 2 - Nuclear Power in the People's Republic of China

Chapter 3 - Nuclear Power in India

Chapter 4 - Nuclear Power in Japan

Chapter 5 - Nuclear Power in North Korea & South Korea

Chapter 6 - Nuclear Power in Pakistan

Chapter 7 - Nuclear Power in France

Chapter 8 - Nuclear Power in Sweden

Chapter 9 - Solar Power in India

Chapter 10 - Solar Power in the United States

Chapter 11 - Solar Power in Oregon

Chapter 12 - Solar Power in California

Chapter 13 - Solar Power in New Jersey

Chapter 14 - Solar Power in Spain

Chapter 15 - Solar Power in Australia

Chapter 16 - Feed-In Tariffs in Australia

Chapter 17 - Solar Hot Water in Australia
